Empowerment for the world
Innovation from
SHANGHAI

CUSTOMIZED, HIGH-PERFORMANCE LIFTING & TRANSPORT SOLUTIONS for SHIPBUILDING, PRECAST & CONSTRUCTION

CENGINCRANES SHANGHAI
– A Legacy of Innovation and Trust

1976 — Already in the Industry
From our very first steps in the crane industry, we have been passionate about delivering customized and comprehensive solutions tailored to diverse user needs. Over the years, CENGIN has accumulated rich experience across multiple fields, including shipbuilding, construction, and precast — mastering both crane design & manufacturing as well as after-sales service.

1995 — The First Overseas Order
In 1995, we received our first overseas order — supplying five gantry cranes to a client in Kazakhstan.
This milestone marked our official entry into the global market and accelerated our growth in export business.

2007 — A New Beginning
In 2007, we officially established CENGINCRANES SHANGHAI in one of Asia's most dynamic cities, with a clear focus on serving the global mid-to-high-end market. From day one, we have firmly rejected irrational competition based on low technology, low quality, or low pricing.
Though young as an independent brand, we are driven by bold ambitions, a global vision, and a commitment to long-term value.
Today, we are exactly where we envisioned — steadily walking the right path toward sustainable and lasting success.Rooted in Shanghai, we now deliver world-class crane products and services to clients around the globe.

Our Mission & Vision
Mission:
To empower global premium clients with smarter, more efficient, and safer crane operations through continuous technological innovation and deep customization.
Vision:
To become a globally trusted designer and manufacturer of customized cranes — respected for our technology, trusted for our quality.

MORE SENSORS, MUCH SMARTER

As a dedicated and continuously innovative crane design and manufacturing company, CENGINCRANES proves that proper maintenance exponentially extends crane service life. By integrating advanced multi-sensor systems, our engineered solutions continuously enhance cost performance, delivering unprecedented precision and durability.

Minimize Downtime Cost,
Maximize Uptime Value

PERFORMANCE WITH PROTECTION – THAT'S OUR STANDARD

To ensure the safety of the crane, the loaded goods, and personnel involved, based on our analysis and assessment of various operating conditions, the following sensors are typically selected and equipped as standard configurations on CENGINCRANES cranes.

- Load sensor
- 2-stage Travel limiter
- Anemometer
- Laser sensor
- LiDAR sensor
- Inclination sensor
- 2-stage Height limiter
- 2-stage Angle limiter
- Audible & visual alarm
- Encoder
- Ultrasonic sensor
- Photoelectric Sensor

LESS & SWIFT MAINTENANCE

Commitment to design and manufacture that requires minimal maintenance and to provide the best after-sales service. Remote online service CSMU\RDMS provides more values to clients.

THINKING MORE

A DEDICATED DESIGNER & MANUFACTURER, WITH RICH INDUSTRY EXPERIENCE AND PROFESSIONAL ABILITIES FOR CUSTOMIZED LIFTING & TRANSPORT SOLUTIONS

Integral Solution —
Moderate Cost While Considering Overall

Don't forget to evaluate the total investment and maintenance costs when getting a crane price. Consider not only the initial investment but also operating costs, spare part costs beyond schedule, maintenance, and the unimaginable cost of downtime.
All these factors should be fully considered.

We always focus on the total cost and save through designing and fabricating the most suitable cranes for our clients.

What we are talking about does not refer solely to the product itself, but a complete solution that you may not have in mind.
This solution covers everything from daily performance, visible or invisible hazard prevention, to overall efficiency in everyday working.
What we have done before is absolutely different from solutions offered by other companies.
