9 Interpump Group: Part of a Major Group

Engineered to Perform. Built to Last.

Interpump Hydraulics (IPH) is more than an industrial company: it is a global partner that builds trust and guarantees excellence through advanced, integrated, and customised hydraulic solutions. Part of Interpump Group S.p.A. since 1997, Interpump Hydraulics represents the perfect synthesis of history and innovation. We combine experience, manufacturing expertise, and continuous technological research to deliver solutions capable of meeting the specific needs of the automotive industry with precision and reliability.

A member of INTERPUMP GROUP

Among the world's leading players in the design and production of **power take-offs (PTOs)**, **hydraulic cylinders**, **hydraulic pumps**, and **integrated systems**, we actively collaborate with major global manufacturers of transmissions and industrial vehicles (OEMs – Original Equipment Manufacturers).

We support our partners' technological evolution by delivering superior performance over time.

We are committed, on a daily basis, to creating lasting value for people and the planet.

A global presence built on quality and innovation

An integral part of Interpump Group, IPH reported consolidated revenues exceeding **€229.5 million** in 2025, employs more than **1,500 people** worldwide, operates manufacturing sites in Europe, Asia, and the Americas, and relies on an extensive global network of sales subsidiaries, distributors, and dealers. IPH ensures deep market knowledge, strong local presence, and the ability to respond quickly to customer needs.

Our Strengths

Our strength lies in a unique combination of expertise and strategic resources:

- **Research & Development**: a multidisciplinary team constantly committed to innovation and technological improvement.
- **Integration and Quality**: highly integrated production processes and rigorous, certified quality controls ensure maximum reliability and long-term durability of our solutions.
- **Breadth and Diversification of Product**: a comprehensive and diversified range of power take-offs, pumps, cylinders, and integrated systems.
- **Efficient Supply Chain**: advanced logistics and an international sales network that enable us to remain competitive and responsive in every context.
- **Customer Care**: extensive technical and commercial support, from pre-sales consulting to structured and customised after-sales assistance.

On the road with leading OEMs

Our close, long-standing collaboration with leading international OEMs is a strategic asset: our experience and engineering expertise underpin active listening and co-design capabilities with transmission and industrial vehicle manufacturers.

A History of excellence, innovation, and integration

Interpump Hydraulics was created through the merger of historic brands - PZB (Oleodinamica Pederzani & Zini), Hydrocar, and H.S. Penta - bringing together over 70 years of experience and a deeply-rooted tradition of excellence and innovation in the hydraulic sector.
The company has rapidly consolidated its position as a global leader thanks to a clear strategy focused on enhancing and integrating distinctive expertise and the manufacturing and technological heritage of the incorporated companies, which today operate on the market under a single brand: Interpump Hydraulics.

PZB, Hydrocar, Penta now united into one single brand: IPH.

Today, Interpump Hydraulics is a synergistic union of diverse experiences converging into a shared vision: to deliver high-performance, long-lasting hydraulic solutions.
A company rooted in history and firmly focused on the future.

A History stretching over 70 Years, the Strength of a System.

An innovative headquarters, a symbol of our present and future

The new Interpump Hydraulics headquarters at Sala Bolognese (BO), inaugurated on 20 September, 2025, now represents a strategic and symbolic reference point in our evolutionary journey: an investment of approximately **€30 million** that strengthens our role as a global leader in the hydraulic industry. The total area of **62,000 square metres** includes a **24,000-square-metre** office, production, and research facility, as well as significant additional space to support future expansions.

Innovation and Modernity

The headquarters is equipped with state-of-the-art infrastructure and machining centres, along with a 640-square-metre R&D department where our products are thoroughly tested under a wide range of conditions. The new-generation machining centres ensure outstanding performance in terms of precision, reliability, and speed. The overall layout is designed to optimise lead times, reduce waste, and enhance overall process quality.

Environmental Sustainability and Workplace Comfort

The headquarters features a photovoltaic system with a total capacity of 1,870,000 kWh. Extensive green areas and shared spaces promote the physical, psychological, and social well-being of employees.

Furthermore, a machine emission filtration system is capable of capturing and breaking down oil mists, emulsions and dust: the air inside the plant is thus completely free of harmful particles and the air released back into the atmosphere is cleaned of pollutants.

Growth and Positioning

The new headquarters is a strategic asset that strengthens our identity, becoming a reference point for customers, partners, and international stakeholders. It represents the perfect synthesis of who we are and the future we aim to build.

A complete range serving the Automotive industry

Interpump Hydraulics offers the market a wide spectrum of cutting-edge hydraulic solutions designed to meet the specific needs of the automotive sector.

IPH – Integrated and cross-functional solutions for industrial vehicles

Our offering includes a broad range of highly specialised products:

- **Power take-offs (PTOs)**: global leaders in the design and production of reliable, high-performance PTOs. The range includes PTOs for all transmission models on the market, split-shaft PTOs, and engine flywheel PTOs.
- **Hydraulic cylinders**: single-acting and double-acting telescopic cylinders, standard and customised solutions for mobile applications.
- **Hydraulic pumps and motors**: gear, piston, vane, and hand pumps, featuring innovative technologies for efficient fluid handling.
- **Tipping valves**: the outcome of extensive expertise in assessing functional control requirements for the lifting and lowering of tipping bodies on industrial vehicles.
- **Integrated Systems (Wet Kits and Accessories)**: efficiency and safety combined with high-level performance are key features of our wet kits for tipping applications.

IPH, Hydroven, and Padoan: a System in Motion

Hydroven
Hydraulic Energy

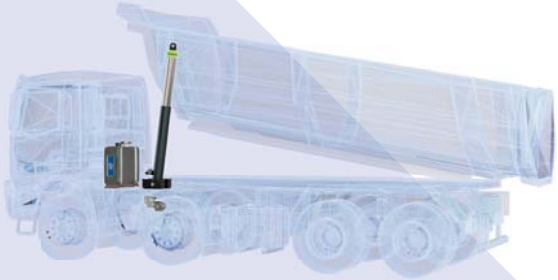
Specialists in hydraulic systems

The mobile division of Hydroven, an integral part of Interpump Hydraulics, is a market benchmark for consulting, design, and manufacturing of hydraulic power units, electric pumps, and integrated systems for mobile equipment.

Padoan
WETANKYOU SINCE 1937

Tank excellence

Since 1937, Padoan has been a reference point in the design and production of oil, diesel, and combined tanks for industrial vehicles. The company has been part of Interpump Hydraulics since 2025.



Advanced solutions for multiple application areas

Interpump Hydraulics develops innovative and versatile technological solutions for the Automotive sector, ensuring high performance, reliability, and long-term durability.

Main Applications:

- **Tipping**: Hydraulic Systems for light tipper, semi-trailers, and rigid trucks
- **Eco-Municipality Services**: solutions for garbage compactors, road sweepers, sewers, and snowploughs
- **Material Handling and Transport**: robust, high-performance solutions for dumpers such as concrete pump trucks, concrete mixers, hookloaders, and moving-floor trailers
- **Lifting and Loading**: flexibility and high reliability for truck-mounted cranes, hooklifts, and skiploader systems
- **Aerial Platforms**: compact and lightweight solutions for aerial work platforms
- **Firefighting and Safety**: reliable technologies for rescue and rapid-response vehicles, ensuring safety and innovation
- **Agriculture**: robust, powerful, and reliable components for tractors and agricultural tipping trailers

Tailor-made solutions

In addition to standard applications, IPH develops custom-designed solutions tailored to precisely meet specific customer requirements, ensuring maximum operational efficiency and technological competitiveness.

A global force in the hydraulic sector

Interpump Hydraulics ensures global coverage through manufacturing sites in Europe, Asia, and the Americas, direct commercial presence in 13 countries, and a worldwide network of distributors and dealers.

Direct Commercial Presence:

- **Europe**: Italy, France, Germany, United Kingdom
- **Asia**: India, China
- **Americas**: USA, Brazil, Chile, Peru
- **Oceania**: Australia, New Zealand
- **Africa**: South Africa

Muncie Power Products – Experience and Innovation serving the automotive industry

Our global presence is further strengthened by Muncie Power Products. This U.S.-based company specialises in the production of power take-offs (PTOs) and the supply of hydraulic components for heavy-duty industrial vehicles. Its integration into the Group and its over 90 years of experience have reinforced IPH's presence in the American and global markets.

IPH Brasil

In Brazil, the Takarada brand - long synonymous with expertise in the world of power take-offs - enhances IPH's product portfolio.

Quality and sustainability at the core of our commitment

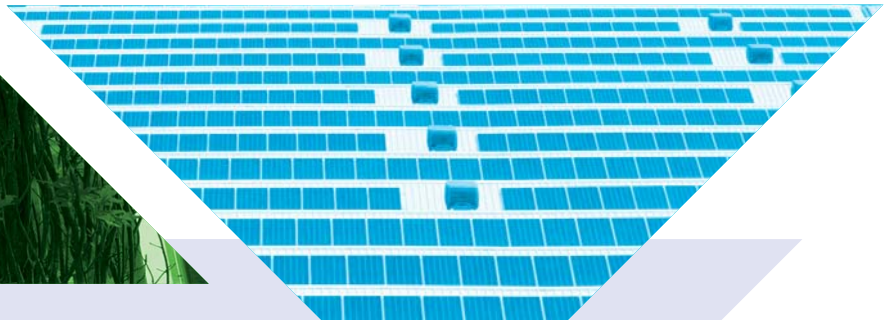
At Interpump Hydraulics, quality and sustainability are the fundamental pillars guiding every aspect of our activities, from design and production to customer service.

Quality: A daily commitment

Stringent controls at every stage of the production process, full traceability of operations, and the adoption of best manufacturing practices form the foundation of intelligent, high-performance, and sustainable products.

Sustainability: building a better future

We are committed to promoting a sustainable economy that respects the environment and generates benefits for the community and future generations. Aligned with the targets set by the European Union, we are committed to reducing net greenhouse gas emissions by approximately 45% by 2030. We also assess our suppliers using ESG (Environmental, Social & Governance) criteria. The values of our Code of Ethics guide every corporate decision, placing transparency, integrity, and environmental and social responsibility at the centre of our activities.



Our Certifications

Interpump Hydraulics holds numerous international certifications that attest to the compliance of processes and products with the highest standards of quality, safety, and sustainability:

IATF 16949: the only internationally recognised standard in the automotive industry

ISO 9001: Quality management system

ISO 14001: Environmental management

ISO 45001: Occupational health and safety

These certifications are not merely acknowledgments, but tangible evidence of our constant commitment to excellence, environmental protection, and care for people.

Proudly part of Interpump Group

A member of

Interpump Hydraulics is an integral part of Interpump Group S.p.A., a leading group in international hydraulic markets. **Founded in 1977** by Fulvio Montipò, Interpump Group is listed on the Milan Stock Exchange and operates in **40 countries** with **over 11,000 employees** and consolidated revenues exceeding **€2 billion** in 2025.
Interpump Group comprises prestigious brands, each a leader in its respective market segment, operating within two main business areas:

Water - high- and ultrahigh-pressure piston pumps with related components and accessories, special pumps, mixers and agitators, cleaning systems, valves and tanks for the food, cosmetic, and pharmaceutical industries.

Oil - power take-offs, hydraulic pumps, cylinders, valves and tipping valves, hoses and fittings, power transmissions, orbital motors and steering systems, and other hydraulic components.

The strength of Interpump Group lies in the strategic integration of acquired companies, preserving their expertise and identity while generating synergies that ensure innovation, quality, and global leadership.
