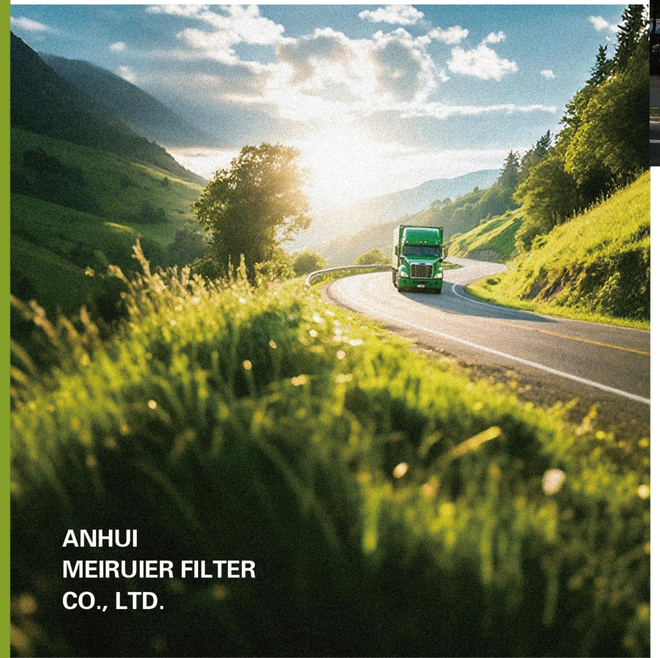
MREFILTER®

Since 1999

2026 Corporate Profile & Business Promotion



# ANHUI MEIRUIER FILTER CO., LTD.

## ABOUT US

Anhui Meiruier Filter Co., Ltd. (MRE Filter), established in January 2009, is a national high-tech company which develop, produce and sale filter include lube oil filter, diesel fuel filter, air cleaner, and other type filter. MRE filter drafted national filter standard , is member of China Internal Combustion Engine Association.

MRE Filter has 50000+$M^2$ factory, with 200+ employees which include 30+ R&D person. MRE Filter has complete filter production line and test equipment.

MRE Filter export its product to all over the world like Europe, America, Middle East, South East Asia. MRE Filter has a complete sales network in China，and provide product to well-know domestic and international OEM company.

MRE Filter produce 3000+ PN covers oil filter, diesel fuel filter, air filter, fuel water separator. MRE filter fit for various truck, construction machine and agriculture machine. Since the start of MRE Filter build its own brand by advanced production line, high level manufacture process and quality control. MRE Filter realize unified management of business process and electronic process flow, improve business collaboration and efficiency by introduce ERP/OA/PLM/CRM system.

MRE Filter has 1 core invention patent related to its main business, 6 invention patents in the substantive examination stage, 15 core utility model technology patents, and 20 utility model patents in the substantive examination stage. It has signed a joint research and development agreement with Anhui Information Engineering College to initiate a school-enterprise cooperation model for research and development.

# Main Products

Oil Filter | Fuel Filter | Hydraulic Filter | Air Filter | Air Dryer Cartridge

## OIL FILTER

**Using multi-layer composite gradient and optimizingstructure design, it has the following significant advantages.**

- The overall structure is optimized, and the reliability is greatly improved (for example, the pulse resistance performance can reach more than 1 million times)
- High efficiency, High dust capacity, long service life.
- Use composite media of full synthetic media,with higher strength and better resistance to high oil temperature aging

## FUEL FILTER

**The HPCR is mainly used in the diesel fuel system above Euro 3.The pre filter capture most of the water and large particles, and the fine filter capture the small particles.**

.

## HYDRAULIC FILTER

**Protection in hard operating conditions**

**As hydraulic systems become increasingly complex, hydraulic filter are becoming more important. Reduced throughput, shorter cycle times, increased pressures, and longer maintenance intervals are placing increasing demands on hydraulic filters.**

**A properly organized cleaning process begins with selecting the appropriate filter based on the equipment manufacturer's recom-mendations. This includes:**

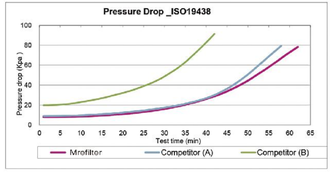
- The type of hydraulic oil used and the operating pressure of the system.
- The oil consumption required for the hydraulic system to operate.
- The degree of flow restriction (fluid flow resistance) created by the filter.
- The amount of contaminant the filter must capture and retain to meet the calculated maintenance interval.
- The quality of filtration (degree of fluid purification) and the requirements of the application.

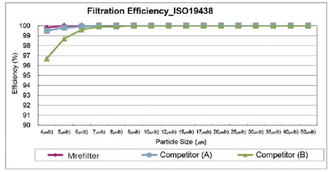
**Mrefilter considers not only these factors but also the increasing requirement of modern hydraulic systems.**

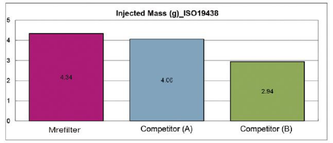
**Mrefilter for maximum performance of your equipment.**
**Effective industry solutions and high cleaning standards.**
**Since 1999. Professional filter supplier & manufacturer.**
**Own brand. Key part 100% self production.**
**innovative filtration technologies.**

- Highly specialized enterprises with advanced German equipment.
- High degree of automation of processes in all areas.
- Effective industry solutions for special equipment and industrial equipment.
- Modern technologies for maximum engine protection.
- The testing center confirms the conformity of the quality of the finished product.

**Mrefilter products for engines.**
**Filters for Oil, Fuel, Air, Hydraulic.**
**New engineering and technical solutions.**
**Primary dry, two-stage and purge air filters.**
**Effective protection for motors of varying load levels.**







## MARKETING

**MRE Filter has been committed to the construction of marketing network for a long time. The marketing network covers all provinces and municipalties in the country. And actively participate in international competition, products are exported to Spain/Russia/Argentina/Brazil/the United States and other international markets. Relying on the advantages of leading technology, qualty and service, we have won the trust and care of partners all over the world.**

## EXCLUSIVE AGENCY RECRUITMENT

**We are sincerely looking for exclusive agents nationwide to share the brand dividends!**

- **Advantages: Endorsement by well-known brands, diversi-fied high-quality products, high profit margins + exclusive regional protection;**
- **Support: Free product training, market promotion subsidies, efficient logistics distribution, full after-sales assistance;**
- **Requirements: Having relevant industry resources, legal business qualifications, recognition of the brand concept, and market development capabilities.**
