公司简介 BRIEF INTRODUCTION

捷泰豪力
JIETAI HAOLI

公司简介》 BRIEF INTRODUCTION

北京捷泰豪力科技发展有限公司,是集旋挖钻杆研发生产,旋挖钻机维修保养,供应各型号旋挖钻机配件,二手钻机收购租赁销售等为一体的综合性企业。公司成立于2004年,总部设于北京,分厂设于山东寿光。拥有完备的钻杆生产专用制造及检测设备,专业的员工队伍和完善的开发、设计制造和营销及售后服务体系,秉承以技术引领行业发展的宗旨,致力于建设服务全球的技术领先型专业钻杆生产基地。钻杆设计采用国内外多项先进技术,具有强度高,重量轻,高耐磨,质量可靠等优势。专利产品大锁扣加压钻杆针对硬岩地层设计,钻进效率更高,加压键更耐磨。公司具有规模化生产优势,备有大量的成品和半成品钻杆库存,生产周期短,交货快捷,服务配件充足。钻杆及配件成功配套宝峨、意马、土力、迈特、卡萨格兰地、三一、徐工、中车、中联等品牌旋挖钻机,批量出口到阿联酋、埃及、印度、新加坡、马来西亚、泰国、越南、哥伦比亚等。

公司以“诚信做人,用心做事”为基本原则,本着“以客户为本”的服务态度,以“诚信、开拓、创新、务实”的经营理念,不断推动旋挖钻机钻杆加工工艺技术的改良,旋挖钻机维修国产化,配件国产产业化,不断提高产品质量,用一流的管理,先进的制造工艺,专业的维修技术和售后服务,努力为客户提供优质的产品和一流的服务。竭诚与所有的旋挖钻机客户形成最佳的合作伙伴!

JTHL is a professional Kelly bar manufactory which founded in 2004 year, the main workshop located in Beijing. The branch workshop located in Shouguang city, Shandong province, China. Which specialized in producing Kelly bar , refurbished used drilling rig. Drilling rig spare parts, like gearbox, motor, swivel joint, etc. The advantages of our Kelly bar ,such as low weight,high strength,high abrasion-resistance, highly-reliability are safeguarded technology by superior process, advanced machining equipments and special fixtures. Especially the patent technology bigger lock Kelly bar is specially for strong hard rock layer, higher drilling working efficiency, more resistant to wear and tear.Normal standard dimension replacement spare parts as ready stock to ensure quickly delivery time. Till now we have dozens of technical patents, ISO9001:2008 certifications, SGS, 35 production proprietary technologies . And we have dealer in Hunan province, middle agent in Singapore, UAE, Thailand. End customer in Colombia, Malaysia, Egypt, Vietnam, Pakistan, etc. We sincerely to supply you with good quality and professional technology.

Our company is based on the "Conduct myself faithfully,Concentrate on work" as the principle, based on the spirit of "Customer-oriented" service attitude, and " Honesty , Pioneering ,Innovative and Pragmatic" as the business management philosophy. Aiming to imporve technology of piling rig kelly bars constantly. Continuously improve the localization work of piling rig maintenance and spares. Continuously imporve product quality. We strive to provide customer with the first-class management , advanced manufacturing technology, professional maintenance technology and after-sale service , and hope to be best cooperation partner with all the rotary piling rig customers.

■ 旋挖钻杆 Kelly Bar

完备的钻杆生产专用制造及检测设备,专业的员工队伍和完善的开发、

设计制造和营销及售后服务体系,采用国内外多项先进技术。

Complete drill pipe production special manufacturing and testing equipment,
professional staff and improve the development, design and manufacture and marketing
and after-sales service system, using a number of advanced technology at home and abroad.

复合式钻杆是一种由机锁式和全锁扣式、摩阻式等多种形式组合在一起的钻杆，可有多种不同的搭配方式。

全锁扣加压钻杆是由三组带凹凸齿的键条等分组合而成(见图所示)。

全锁扣加压钻杆在钻孔过程中动力头旋转的内键与钻杆外键可以随时形成锁扣加压，直接将动力头上的加压力通过钻杆的凹凸齿直接全力传送到钻头上，目前这种钻杆传递加压力是最好的，特别是对坚硬的地层及冻土层的施工。

在钻进过程中对钻杆每个部位都可以形成加压点，减少对始终局部受加压齿键条的磨损，也避免了钻杆始终在某一部位加压易造成管壁变形卡钻的难点，用时驱动内键均布的凹凸齿键与外凹凸齿键形成良好的啮合，在加压的部位形成多点加压，受力均匀稳定不易卡钻，尤为提高工作效率，从而得到很多旋挖用户的好评。

该钻杆已申请专利，专利号：ZL 201220161611.0 ZL201320083189.6

Combined type kelly bar is one kind of kelly bar which can be formed by interlocking type,full-interlocking type ,frictional type and other various types.

Full-interlocking Kelly bar is composed of three weld-on ribs with continuous concave and convex keys (see chart) During the drilling process, the downward thrust is transmitted to drill bucket directly by rotation power of Rotary head inner ribs and Kelly bar outer ribs at any time . This type of Kelly bar is the best one of transferring pressure at present , especially for hard ground and frozen oil layer construction. In the drilling process , every continuous steps can form pressure point to reduce wear and tear of local pressurization key lines, also to avoid the stick problem that Kelly pipe is deformation always in a part pressurization. When drilling progress, driving the inner convex concave tooth key and the outer convex concave tooth key uniformly forms good engagement, the advantage is force uniform, not easy to stick pipe, particularly to improve work efficiency . It has gotten high praise from home and abroad rotary rig user.

This type Kelly bar has applied for patent, the patent No. is ZL 201220161611.0 ZL201320083189.6

机锁式加压钻杆 Interlocking Kelly Bar

机锁加压钻杆是采用国际上先进的六键式键型分布和超大加压台组成的一种钻杆形式。该钻杆外键为六键式键型分布，带有多组超大加压台组成，内键板是由整体合金钢锻压成型，经特殊热处理工艺处理，耐压耐磨焊接性良好。机锁加压钻杆是根据国内钻机配置需要和工况需求，结合国外钻杆的加工设计工艺制造，配套于国内外各种大型旋挖钻机。

Interlock Kelly bar adopts the international advanced six-ribs distribution technology. This type Kelly bar consists of telescopic tubular sections with a system of multi-step drive keys and lock recesses, welded onto their outer surfaces. The inner keyboards are manufactured from high-tensile steel. The special heat treatment which make this style Kelly bar with high abrasion resistance, compression resistance and excellent welding property.

interlock Kelly bar is based on domestic rig configuration and condition demand, combined with the home and abroad advanced manufacture technology, supporting domestic and foreign rotary piling rig.

新型高效全锁扣钻杆 是由普通机锁钻杆与全锁扣钻杆组合优化合成，为我公司的主打产品。该钻杆第一节为普通机锁钻杆形式，里面几节内键是由三组加压台阶组成，外键由三段三组凸凹形式的加压台阶组成。

新型高效全锁扣钻杆 是根据国内钻机配置需要和工况需求，结合国外钻杆的加工设计工艺制造，配套于国内外各种大型旋挖钻机。该钻杆采用高强合金管材，耐磨合金键条，并对加压点、方头、挡环等易损件作特殊工艺处理，确保钻杆的可靠性和使用性。该钻杆适合于坚硬的岩石底层，冻土层，鹅软石层，钻杆的向下传递加压力大，压力损失小且传递速度快。

该钻杆已申请专利，专利号：201420542676.9 （新型高效耐用机锁钻杆）

New High -efficiency Full-Interlocking Kelly Bar is composed of interlocking Kelly bar and full interlocking Kelly bar. It's our leading products.

The first section is ordinary interlocking type, internal keys of inner sections are composed of three groups of pressure stage. The outer keys are consisted of three- piece of three group of concave - convex pressure stage. This type kelly bar is based on domestic rig configuration and condition demand, combined with the home and abroad advanced manufacture technology, supporting domestic and foreign rotary piling rig. Adopte high-strength alloy steel and wear-resistant alloy strip,take special process to the pressure point,kelly box head ,stop ring and other wearing spares,to make sure the durability and reliability of kelly bars.This kind of kelly bar is especially suitable for hard layer,frozen layer,pebble layer.With the advantage of large downward transmission pressure ,small pressure loss,fast transmission speed.

This type Kelly bar has applied for patent, the patent No. is 201420542676.9

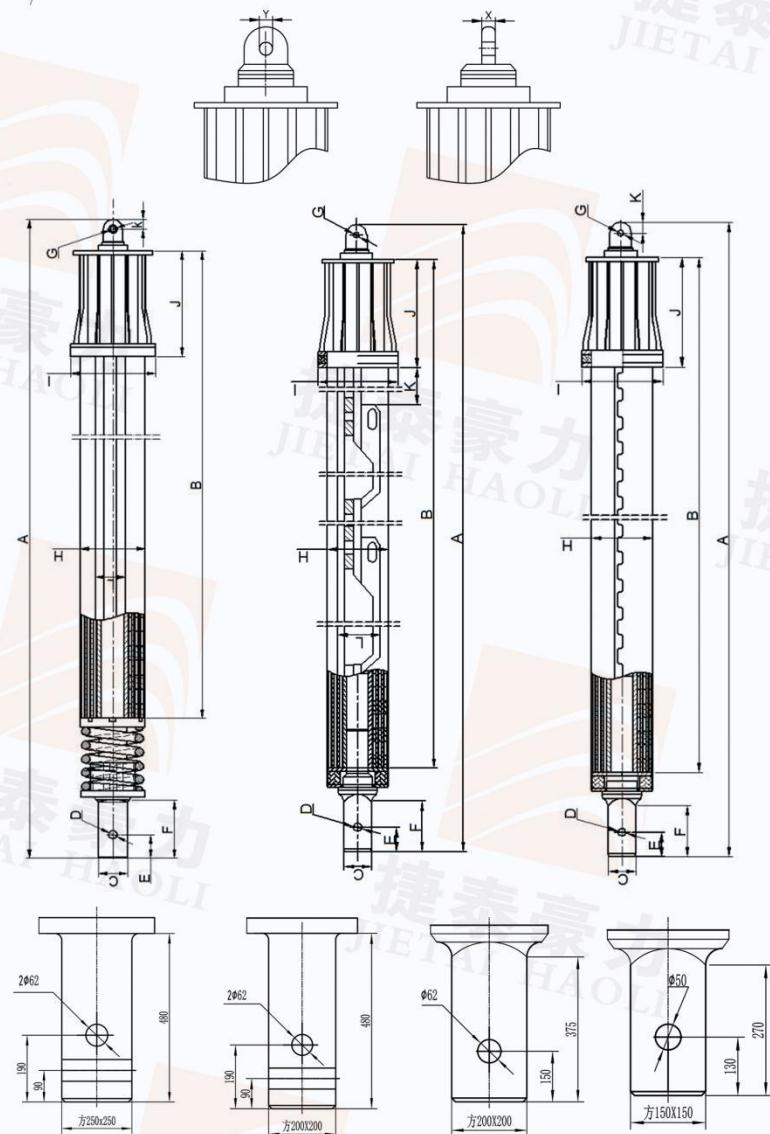

摩阻式钻杆外键是采用国际上先进的六键式键型分布技术组成的一种钻杆形式。该钻杆是在钻杆转动时产生的圆周力及动力头加压时向下传递加压产生摩擦力进行加压，操作简单，钻深大，适合钻进软土层和泥砂层。整套钻杆重量轻，强度高，单节钻杆直线度高；内外层搭配合理，键板耐磨性好，极大的满足了钻机对钻杆的特殊要求。

该钻杆已申请专利，专利号：201420542678.8

Friction type drill Kelly bar is a kind of drill pipe type with international advanced six-ribs distribution technology composition. The Kelly bar can generate pressure force when the Kelly bar rotary can produce peripheral force and the rotary passing down the pressure force can produce the friction force. It is simple operation, drilling depth, it is suitable for soft soil layer and mud sand layer. The complete set of Kelly bar is with light weight, high strength, high linearity of the single drill pipe.; The inner and outer layer collocate reasonably, with good wear resistance plate.. it is greatly to meet the special requirement of the drill rig machines.

This type Kelly bar has applied for patent, the patent No. is 201420542678.8

可定制项目 Customizable

根据客户要求定制,同时具备自行开发新产品及生产能力,可根据客户来图来样定制非标产品。

Samples to customize, we have capacity to design the new products. Can design nonstandard products according to customer's drawing and sample.

■ 旋挖钻具 Drilling Tools

多种多样的钻具型谱，同时为客户的特殊需求进行针对性研发定制。

广泛应用于回填层、土层、岩层、卵石层、砂层、黏土层、溶洞地层、基岩层等

Varity drilling tools for option, while can custom for the special demand.

All the drilling tools was widely used in Backfill layer, soil layer, rock layer, pebble layer, sand layer, clay layer, karst stratum, bedrock layer, etc.

■ 钻具特点 Feature

- 筒体环切释放岩石围压
Cutting ring with rock drilling bits and releases the internal stress of rock.
- 截齿阶跃破碎兼研磨钻进
Rock drilling bits perform stage breaking and drilling .
- 小钻具取芯率高, 大钻具分级配合破碎
Small barrel facilitates the coring operation; large barrel performs stage breaking.
- 适用地层: 回填层、中风化岩层、基岩层
Applicable layers: backfill layer, medium weathered rock, bedrock.

The unit of measurement is millimeters and the weight is kilograms. The data are for reference only.
The drill bucket type can be confirmed according to the site layer condition.

■ 可定制项目 Customizable Items

- 切削直径定制: 根据客户需求设计切削直径, 如 $\phi 950$ 、 $\phi 1050$ 等, 配合套管施工使用居多 ;
Cutting DIA. Custom : design various cutting diameter based on demand, like $\phi 950$ 、 $\phi 1050$ etc.
- 筒体高度定制: 根据客户需求设计筒体高度, 如加高至 1500,2000, 增加单次钻进量, 提高施工效率 ;
Shell HIT. Custom : design as demand, prolong or shorten, increase of efficiency by drilling more.
- 关重结构加强定制: 根据客户需求加强各个部位参数, 如壁厚加厚, 底板加厚等 ;
Small barrel facilitates the coring operation; large barrel performs stage breaking;
- 方头尺寸定制: 根据客户钻杆方头定制钻具方头尺寸, 通常为 130×130、150×150、200×200 等;
Kelly Box Custom : custom kelly box size based on the kelly bar, like 130*130, 150*150,200*200 etc;
- 钻齿数目定制: 根据客户需求对钻齿进行加密布置;
Teeth No. Custom : encrypt the drilling teeth based on demand etc;

■ 钻具特点 Feature

- 可定制手自动一体式开锁底机构，内置防吸钻流水孔；
Option half-automatic or manul mechanic bottom open system. Built-in ventilation pipe;
- 整体式中心锥，弧形导板布齿，大钻具双开锁底机构设计；
Cast pilot with rock drilling bits , arc guide plate teeth arrangement, double unlocking system;
- 钻齿轨迹交错布置，全断面内交叉覆盖，相互制造自由面；
Staggered arrangement of rock drilling bits;
- 适用地层：砂砾层、卵石层、强风化、中风化岩层；
Applicable layers: gravel , pebble , highly or medium weathered rock;

■ 可定制项目 Customizable Items

- 切削直径定制：根据客户需求设计切削直径，如 $\phi 950$ 、 $\phi 1050$ 等，配合套管施工使用居多；
Cutting DIA. Custom : design various cutting diameter based on demand, like $\phi 950$ 、 $\phi 1050$ etc.
- 筒体高度定制：根据客户需求设计筒体高度，如加高至 1500,2000，增加单次钻进量，提高施工效率；
Shell HGT. Custom : design as demand, prolong or shorten, increase of efficiency by drilling more.
- 关重结构加强定制：根据客户需求加强各个部位参数，如壁厚加厚，底板加厚等；
Small barrel facilitates the coring operation; large barrel performs stage breaking;
- 进土口定制：单开门、双开门可依据客户需求定制；
Cutter Custom: single cutter and double cutter design as demand;
- 单双底定制：单底、双底可依据客户需求定制；
Bottom Custom : single bottom and double bottom design as demand;
- 方头尺寸定制：根据客户钻杆方头定制钻具方头尺寸，通常为 130×130、150×150、200×200 等；
Kelly Box Custom : custom kelly box size based on the kelly bar, like 130*130, 150*150,200*200 etc;
- 开锁底机构定制：半自动、手动开锁底机构可依据客户需求定制；
Bottom Open Mechanic : half-automatic or manul mechanic bottom open system.

■ 钻具特点 Feature

- 可选加长直筒体设计, 防止钻进时斜孔
Option prolong straight bucket shell can avoid drilling hole inclined
- 可以选择锥筒设计, 加快卸土, 提升施工效率
Choosing conical shell type can accelerate dumping, increase of efficiency
- 内置防吸钻流水孔, 依工况增加裙边
Ventilation pipe shaft inside prevents vacuum; add collar plate according to working conditions
- 适用地层: 淤泥层, 砂砾层, 粉(粘)土层, 强风化岩层等
Applicable scope: silt, gravel, clay and highly weathered rock

Bottom Open Mechanic : half-automatic or manul mechanic bottom open system.
- 齿型定制: 可依据客户需求定制装配 V20 齿、FZ80 齿、FZ72 齿、22S 齿、TL18 齿、TL25 齿等
Flat Teeth Custom : equip with V20, FZ80, FZ72, 22S, TL18,TL25, etc, as working condition demand .

■ 钻具特点 Feature

- 筒体环切释放岩石围压:
Cutting ring with rock drilling bits and releases the internal stress of rock;
- 牙轮钻齿滚压研磨钻进, 钻齿损耗小
Drilling with the method of rolling and squeezing can increases the anti-wear ability of the barre
- 小钻具取芯率高, 大钻具分级配合破碎
Small barrel facilitates the coring operation; large barrel performs stage breaking
- 适用地层: 中、微风化岩层, 硬岩层, 超硬基岩层
Applicable layers: medium or slightly weathered rock, hard or superhard bedrock

备注: 度量单位为mm, 重量单位为kg。数据仅供参考, 可根据施工地质确认钻斗选型。

The unit of measurement is millimeters and the weight is kilograms. The data are for reference only.

The drill bucket type can be confirmed according to the site layer condition.

■ 可定制项目 Customizable Items

- 切削直径定制: 根据客户需求设计切削直径, 如 $\phi 950$ 、 $\phi 1050$ 等, 配合套管施工使用居多
Cutting DIA. Custom : design various cutting diameter based on demand, like $\phi 950$ 、 $\phi 1050$ etc.
- 筒体高度定制: 根据客户需求设计筒体高度, 如加高至 1500,2000, 增加单次钻进量, 提高施工效率
Shell HIT. Custom : design as demand, prolong or shorten, increase of efficiency by drilling more.
- 关重结构加强定制: 根据客户需求加强各个部位参数, 如壁厚加厚, 底板加厚等
Small barrel facilitates the coring operation; large barrel performs stage breaking;
- 方头尺寸定制: 根据客户钻杆方头定制钻具方头尺寸, 通常为 130 × 130, 150 × 150, 200 × 200 等
Kelly Box Custom : custom kelly box size based on the kelly bar, like 130*130, 150*150, 200*200 etc;
- 钻齿数目定制: 根据客户需求对钻齿进行加密布置
Teeth No. Custom : encrypt the drilling teeth based on demand etc;
- 牙轮种类定制: 全新硬岩牙轮、二手牙轮以及可拆卸牙轮, 可依据客户需求定制
Roller Bits Custom: new roller bits, used roller bits and detachable roller bit design as demand

■ 钻具特点 Feature

- 大进土口设计，体开式筒体结构，高效卸渣，提升钻进效率
Large inlet of soil, open shell design, easy to dump spoil so increases the drilling efficiency
- 筒体、导板、加强筋强化设计，提升钻斗使用寿命
Super strength structure for shell, guide plate, etc, increase the life cycle of bucket
- 筒体周围布置导条，防止吸钻
Guide strips arranged on the surface of bucket can avoid drilling tool sucked by the pressure
- 适用地层：粘土层、淤泥层、强风化岩层
Applicable layers: clay, silt, highly weathered rock

备注：度量单位为mm，重量单位为kg。数据仅供参考，可根据施工地质确认钻斗选型。

The unit of measurement is millimeters and the weight is kilograms. The data are for reference only.
The drill bucket type can be confirmed according to the site layer condition.

■ 可定制项目 Customizable Items

- 切削直径定制：根据客户需求设计切削直径，如 $\phi 950$ 、 $\phi 1050$ 等，配合套管施工使用居多
Cutting DIA. Custom : design various cutting diameter based on demand, like $\phi 950$, $\phi 1050$ etc.
- 齿型定制：根据客户需求安装不同的齿型，可以安装截齿、FZ80、FZ72、V20、22S 等齿型
Teeth Custom : equipped different teeth, like bullet teeth, flat teeth according to different working condition
- 方头尺寸定制：根据客户钻杆方头定制钻具方头尺寸，通常为 130×130 、 150×150 、 200×200 等
Kelly Box Custom : custom kelly box size based on the kelly bar, like 130×130 , 150×150 , 200×200 etc.

■ 钻具特点 Feature

- 中心锥引导, 锥形钻进, 破碎岩石
Location by pilot, conical structure drilling into the rock
- 双头螺旋受力均匀, 不宜偏孔
Double cutter bearing uniform force, can avoid inclined hole
- 双螺旋携渣能力强, 黏性地层时, 单螺易于卸渣
Double spiral easy to carry soil, but meet cohesive soil, single spiral is easy to dump spoil
- 适用地层: 卵石层, 泥岩, 砂岩层, 强、中风化硬岩层
Applicable layers: medium weathered rock, bedrock

■ 可定制项目 Customizable Items

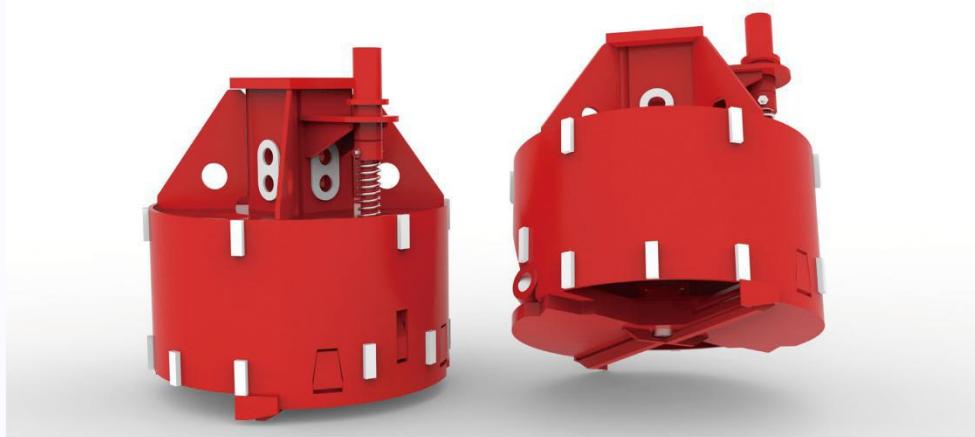

- 切削直径定制: 根据客户需求设计切削直径, 如 $\phi 950$ 、 $\phi 1050$ 等, 配合套管施工使用居多
Cutting DIA. Custom : design various cutting diameter based on demand, like $\phi 950$, $\phi 1050$ etc.
- 螺旋高度定制: 根据客户需求设计螺旋高度, 如加高至 1500,2000, 增加单次钻进量, 提高施工效率
Spiral HIT. Custom : design as demand, prolong or shorten, increase of efficiency by drilling more.
- 螺旋叶片间距定制: 根据客户需求设计螺旋叶片间距, 400、500、600, 调整携渣及卸渣能力等
Spiral Pitch Custom : adjust the spiral pitch according to different working condition.
- 方头尺寸定制: 根据客户钻杆方头定制钻具方头尺寸, 通常为 130×130 、 150×150 、 200×200 等
Kelly Box Custom : custom kelly box size based on the kelly bar, like 130×130 , 150×150 , 200×200 etc.
- 关重结构加强定制: 根据客户需求加强各个部位参数, 如壁厚加厚, 底板加厚等
Key Component Reinforce Custom : strengthen the key component to extend life cycle.

■ 可定制项目 Customizable Items

- ▶ 切削直径定制：根据客户需求设计切削直径，如 $\phi 950$ 、 $\phi 1050$ 等，配合套管施工使用居多；
Cutting DIA. Custom : design various cutting diameter based on demand, like $\phi 950$ 、 $\phi 1050$ etc.
- ▶ 筒体高度定制：根据客户需求设计筒体高度，增加单次钻进量，提高清渣效率
Shell HGT. Custom : design as demand, prolong or shorten, increase of efficiency by cleaning more.
- ▶ 单双底定制：单底、双底可依据客户需求定制
Bottom Custom : single bottom and double bottom design as demand.
- ▶ 方头尺寸定制：根据客户钻杆方头定制钻具方头尺寸，通常为 130×130 、 150×150 、 200×200 等
Kelly Box Custom : custom kelly box size based on the kelly bar, like 130×130 , 150×150 , 200×200 etc.
- ▶ 开锁底机构定制：半自动、手动开锁底机构可依据客户需求定制
Bottom Open Mechanic : half-automatic or manul mechanic bottom open system.

■ 钻具特点 Feature

- 可根据需求调节扩底直径
Adjustable cutting arms can meet the specific requirements of different reaming diameters
- 配合捞砂斗或清孔钻头一起使用
After reaming the bore hole, convey spoil with drilling bucket or cleaning bucket
- 箱式主体结构, 结构简单, 缩、扩灵活, 维护方便
Cutting arms are easy to spread and retract; box-type structure is easy to maintenance
- 适用地层: 硬质土层、冻土层、中软岩层
Applicable layers: hard stratum, frozen soil and medium soft rock

■ 可定制项目 Customizable Items

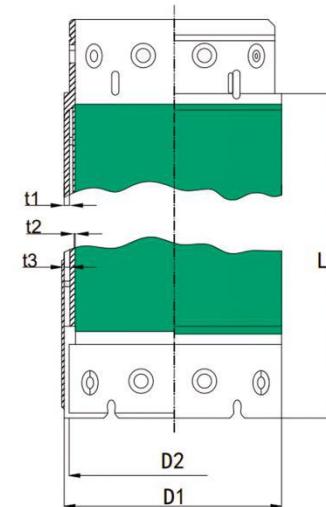

- 型号直径定制: 根据客户需求设计切削直径, 如 ϕ 950、 ϕ 1050 等
Model DIA. Custom : design various cutting diameter based on demand, like ϕ 950、 ϕ 1050 etc.
- 关重结构加强定制: 根据客户需求加强各个部位参数, 如壁厚加厚, 底板加厚等
Key Component Reinforce Custom : strengthen the key component to extend life cycle.
- 方头尺寸定制: 根据客户钻杆方头定制钻具方头尺寸, 通常为 130 × 130、150 × 150、200 × 200 等
Kelly Box Custom : custom kelly box size based on the kelly bar, like 130*130, 150*150,200*200 etc.
- 翼展数目定制: 可依据客户需求设计为两翼扩底钻、三翼扩底钻等
Swing No. Custom : double swing or triple swing design as demand.
- 限位孔数目定制: 可依据客户需求设计多个限位孔, 满足不同直径的扩底需求
Limit Hole No. Custom : add more limit hole to satisfy different reaming diameter demand.

■ 套管系列 Casing Series

根据实际工况选择配置旋挖钻机、搓管机、全回转钻机等辅助设备驱动
以及起拔。套管接口完全匹配宝峨尺寸，全套管施工工法设备全套供应。

According to the working conditions, can use rotary drilling rig, casing oscillator, casing rotator
and other auxiliary equipment to drive and extract the casing. Casing interface is fully matched
with the size of Bauer, full casing construction method one-stop shop.

■ 特点

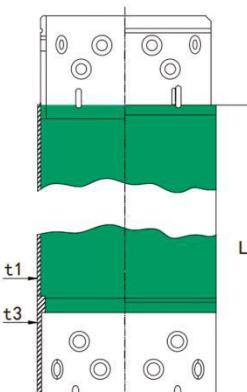

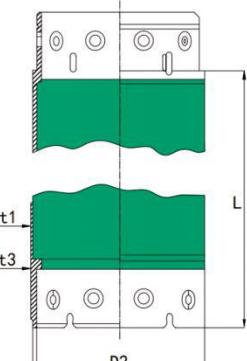

- 主要用于不稳定土壤层条件下钻孔的稳定
- 用于传输由旋挖钻机和摇管器产生的高扭矩和挖掘力
- 双层套管结构，增强了套管的刚度和硬度，使套管可以提供连续的防护（防止钻具在钻入和抽出时卡住）
- 鉴于需要传输的扭矩越来越大，客户要求的套管越来越长，磨损越来越快，可提供不同于标准套管的加强型套管以供选择。与标准套管不同之处在于它的内管要更加坚硬。内管壁厚有12mm（外径为620–1300mm）和16mm（外径为1500–1800mm）两种

■ Feature

- Designed for the transmission of high torques and crowd forces generated by rotary drilling rigs and casing oscillators.
- Produced in double-walled construction as standard. This gives casings additional rigidity and strength and provides a continuous flush drill string (preventing jamming of drilling tools during insertion and extraction).
- As the amount of torque to be transmitted as well as the required casing depths continue to increase further and further, accompanied by increased wear, we offers a reinforced version as an alternative to standard casings. It differs by comprising a stronger inner tube with a wall thickness of 12 mm (OD 620 – 1300mm) and 16 mm (OD 1500 – 1800 mm).

型谱表 ModelList

■ 特点 Feature

- 优质的旋转特性
Optimal rotation characteristics.
- 公接头和切削环之间的连接为全焊型实体
Fully welded solid wall connection between male joint section and cutting ring.
- 可选择垂直耐磨板，增加耐磨防护
Increased wear protection optionally available in the form of vertical wear plates.
- 必要时切削环可进行拆卸更换
Cutting ring can be removed and replaced when necessary.
- 因持续钻进和长钻头的使用，推荐使用加长型套管底环
With increased operational demands and for long drilling tools.
- 磨损最严重的区域为套管底环内壁，靠近钻头的区域。因此套管底环制造的实壁结构就可以保证整个套管的较长的使用寿命。
use of the long version of the casing shoe is recommended as the most intense strain occurs on the inner surface of the casing shoe in the area of drilling tool action. At this point, the solid-walled construction of the casing shoe ensures a long ensures a long.
- 套管底环适合装配WS齿座 (WS39) 或BR和BH型焊接钻齿 (其他齿可按要求定制)
Casing shoes can be fitted with WS tooth holders (WS 39) or weld-on teeth type BR or BH (other types of teeth are available on request).

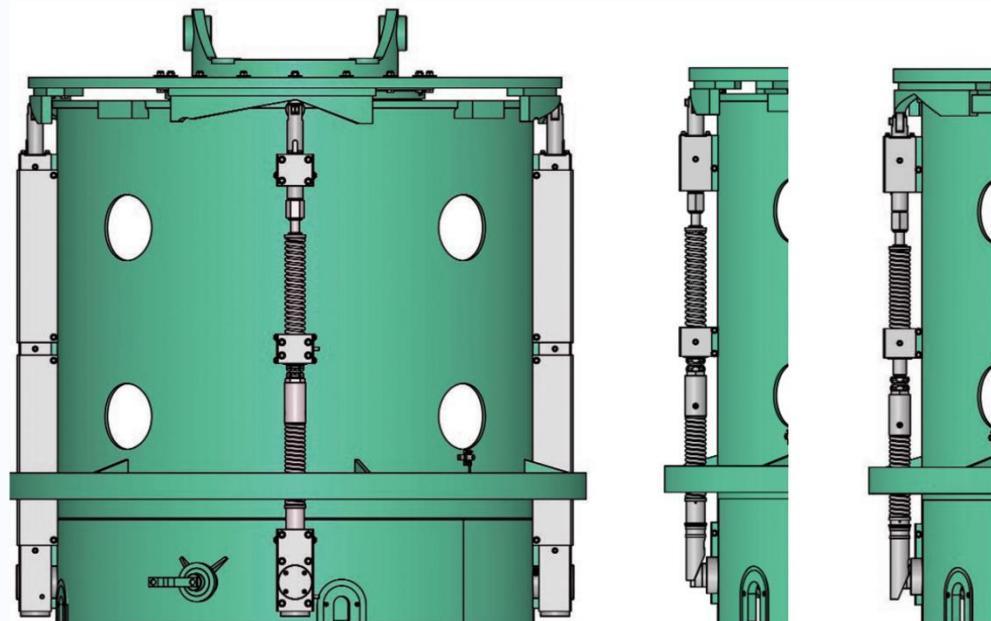

有效直径范围: 从620mm到2500mm
Available range of diameters 620 to 2,500 mm

手动驱动偏心锁的套管驱动器

Casing drive adapter with manually actuated with eccentric lock

自动套管驱动器
Automatic casing drive adapter

有效直径范围: 从1000mm到1800mm

Available range of diameters 1,000 to 1,800 mm

钻机的必要改造:

- 动力头上的制动结构
- 所有机械、液压、电气设备

Necessary modifications on drilling rig:

- Break mechanism for rotary drive
- All mechanical, hydraulic and electrical preparation

旋挖钻机再制造 Refurbishment of Piling Rigs

本公司专业革新出售二手旋挖钻机 15 年，品牌有意马、土力、宝峨、卡萨、迈特、CMV、三一、徐工、中车、中联重工、山河智能等。再制造钻机出售国内外，深得新老客户信赖与支持。

With 15 years experience of refurbishment piling rigs, such as IMT, MAIT, SOILMEC, BAUER, CASAGRANDE, LIEBHERR, CMV, SANY, XCMG, CRRC, Zoomlion, Sunward, etc. Refurbishment equipments have been sold to home and abroad, good quality won the trust and support of new and regular customers.

Professional maintenance technology

Good working condition

Cheap price

旋挖钻机再制造 Refurbishment of Piling Rigs

本公司专业从事旋挖钻机维修和售后服务,专业的维修团队,成熟的维修经验,承接过国外品牌钻机意马、土力、宝岐、迈特、卡萨格兰地及国内品牌钻机三一、徐工、中车、中联、山河智能等。

维修项目包括:

- 旋挖钻机的大修、项修及维护; 液压系统的维修和故障排除; 电路系统的维修和故障排除;
- 发动机的大修和故障排除; 减速机及液压马达的维修,更换及改装;

Jietaihaoli specialized in rotary piling rig maintenance and aftersales service, own professional maintenance team, 15 years abundant experience. We can maintain piling rig machine include abroad brand IMT, Soilmec, Bauer, Mait, Casagrande, and home brand SANY, XCMG, CRRC, Zoomlion, Sunward etc.

Maintenance Projects Include:

- Rotary piling rig overhaul, repair and maintenance items;
- Hydraulic systems mainenance and troubleshooting;
- Circuit system maintance and troubleshooting;
- Engine overhaul and troubleshooting;
- Maintenance ,replacement and modification of gearbox and motors.

Customers from Germany, America, India, Turkey, Russia, Indonesia, Colombia, Brazil, Southeast Asia, etc visited factory inspected Kelly bars and refurbished drilling rig, high quality and professional technology got high praise.

来自德国，美国，印度，土耳其，俄罗斯，印度尼西亚，哥伦比亚，巴西，及东南亚的客户来场验收钻杆及再制造钻机，高品质和专业技术得到客户一致好评。

公司拥有专业的技术团队和销售团队,具有丰富的实战经验和理论知识,公司本着“以客户为本”的原则,用一流的管理,先进的制造工艺,专业的维修技术和售后服务体系,全方位为旋挖钻机客户提供钻机维修、技术咨询、钻杆维修、施工经验,赢得客户的信赖和支持。公司竭诚与国内外旋挖钻机界客户成为最佳合作伙伴!

Jietaihaoli own professional technical team and sales team, has a wealth of practical experience and theoretical knowledge, with the principle of "Customer-oriented", with first-class management, advanced manufacturing technology, professional maintenance technology and after-sales service system,support for customers with rotating drill rig maintenance, technical consulting, drill pipe maintenance and construction experience, win customers' trust and support. We sincerely hope to be the best partner with home and abroad client engaged in rotary piling rig field.

JTHL Kelly bar matched different brand drilling rig at project site in China and overseas, by virtue of its high efficient, durability, longer working life, which has won unanimous praise. Especially the refurbished drilling rig, good working condition with cheaper price, the best choice for project site.

捷泰豪力钻杆配套各品牌钻机在国内外施工现场,凭高效、耐用等优势,赢得客户的一致好评,尤其再制造旋挖钻机,质优价廉,是客户的施工首选。
