Company & Products

Since 1981, JMFT has been developing and manufacturing specialized various friction materials and such core component of power train as clutch, brake friction plate, steel plate and also, related power train assemblies. Based on our effort and technology accumulated so far, we have manufactured and supplied our product to well-known foreign and Korean domestic manufacturer of Automotive, Construction, Farm and Industrial equipments on OEM basis. JMFT have created a comprehensive force which also acts as the source of our proposals that satisfy our customer's requirement for quality and cost. JMFT is always making an effort to improve production efficiency and continuously looking for way to improve our current developing and production ability so that we can open our new chapter as a global specialized enterprise in the for coming advanced generation.

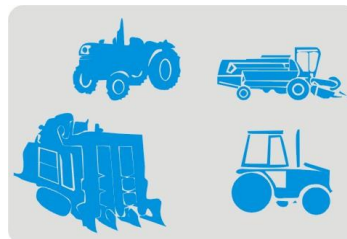

Application & Products

For Construction, Heavy duty

- ▶ Transmission Clutch
- ▶ Wheel Brake
- ▶ Parking Brake
- ▶ Steering Clutch
- ▶ P.T.O Clutch
- ▶ Differential Clutch

For Argricultural Machines

- ▶ Main Clutch
- ▶ Wheel Brake
- ▶ Parking Brake
- ▶ Differential Clutch
- ▶ P.T.O Clutch

For Special Purpose Equipments

- ▶ Converter Clutch
- ▶ Transmission Clutch
- ▶ Hydraulic Motor Brake
- ▶ P.T.O Clutch
