

COMPANY Profile

Hebei Lvzhiyuan Auto Parts Co., Ltd. (Newfil Filter) is located in Qinghe County, Hebei Province, China.

Hebei Lvzhiyuan Auto Parts Co., Ltd. (Newfil Filter) is a manufacturer and exporter of car filters, heavy truck filters, construction machinery filters and agricultural machinery filters.

In 1990s filter manufacturing industry undergone rapid development of China ,especially of our city Qinghe of Hebei. But the the quality unstable ,technology is under developing. Under this background and situation, Chen Xinguo(CEO) decided to stop filter paper business to start filter manufacturing. 2003 Hebei Lvzhiyuan Auto Parts Co., Ltd is established. High quality, profession and high efficiency is Mr. Chen' s mission, it makes us different from other filter factories and well-known in the filter industry.

Plant 1 has 5 floors in total
Built 2003, rebuilt 2020 from 3,000m² expand 12,500m²

Today our own brand got high reputation on the domestic market, more than 100 distributors, attracted by Original brand concerned. Now our OEM customer such as SHACMAN, JAC, YUTONG, FAW and OES LONKING. 2003, started to developing international business---Newfil. Newfil products have been exported to Europe, Southeast Asia, America and Africa. And working with some famous OE and non-OE brands around the world. Built long term and good relation ship.

Newfil has passed ISO9001 and IATF16949 international quality system certification. Our company always produces high-quality products that meet OEM assembly standards. In order to strengthen quality control, our company has introduced various testing equipment, from material testing to product factory inspection, the entire process has undergone strict quality inspection, to maximize the performance of the product, so that the product can be used in harsh environments longer.

Insist on quality, professional team, leading technology makes us be one of leading filter manufacturers of China. Sincerely and integrity got the trusty from foreign customers. Newfil looks forward to working with you!

Plant 2 has 4 floors in total
Built 2023, floor area is 14,500m²

WORKSHOP:

Our first factory takes use of 3000 m² for producing in the fourth floor. Our company has 26 sets of advanced automatic production equipment, 6 sets of filter production lines, 4 sets of automatic pleating machines, 5 sets of injection molding machines, 2 sets of automatic air cabin filter production equipment, 4 sets of automatic packaging lines, full Automatic filter mesh welding machine, end capping equipment, automatic glue injection machine and other advanced equipment. The annual output of filters has now reached 8.3 million. Our second one prepares 4500 m² for producing in the third floor.

LABORATORY TESTING EQUIPMENT

AIR FILTER PERFORMANCE TEST EQUIPMENT

PARTICULATE FILTRATION EFFICIENCY TESTER

- ✓ Aperture tester
- ✓ Digital air permeability meter
- ✓ Electric blast drying oven
- ✓ Electronic tensile testing machine
- ✓ Pressure differential tester

OUR TEAM

PRODUCT RANGE

Passenger Car Filter

Agricultural Filter

Bus & Truck filter

Generator set filter

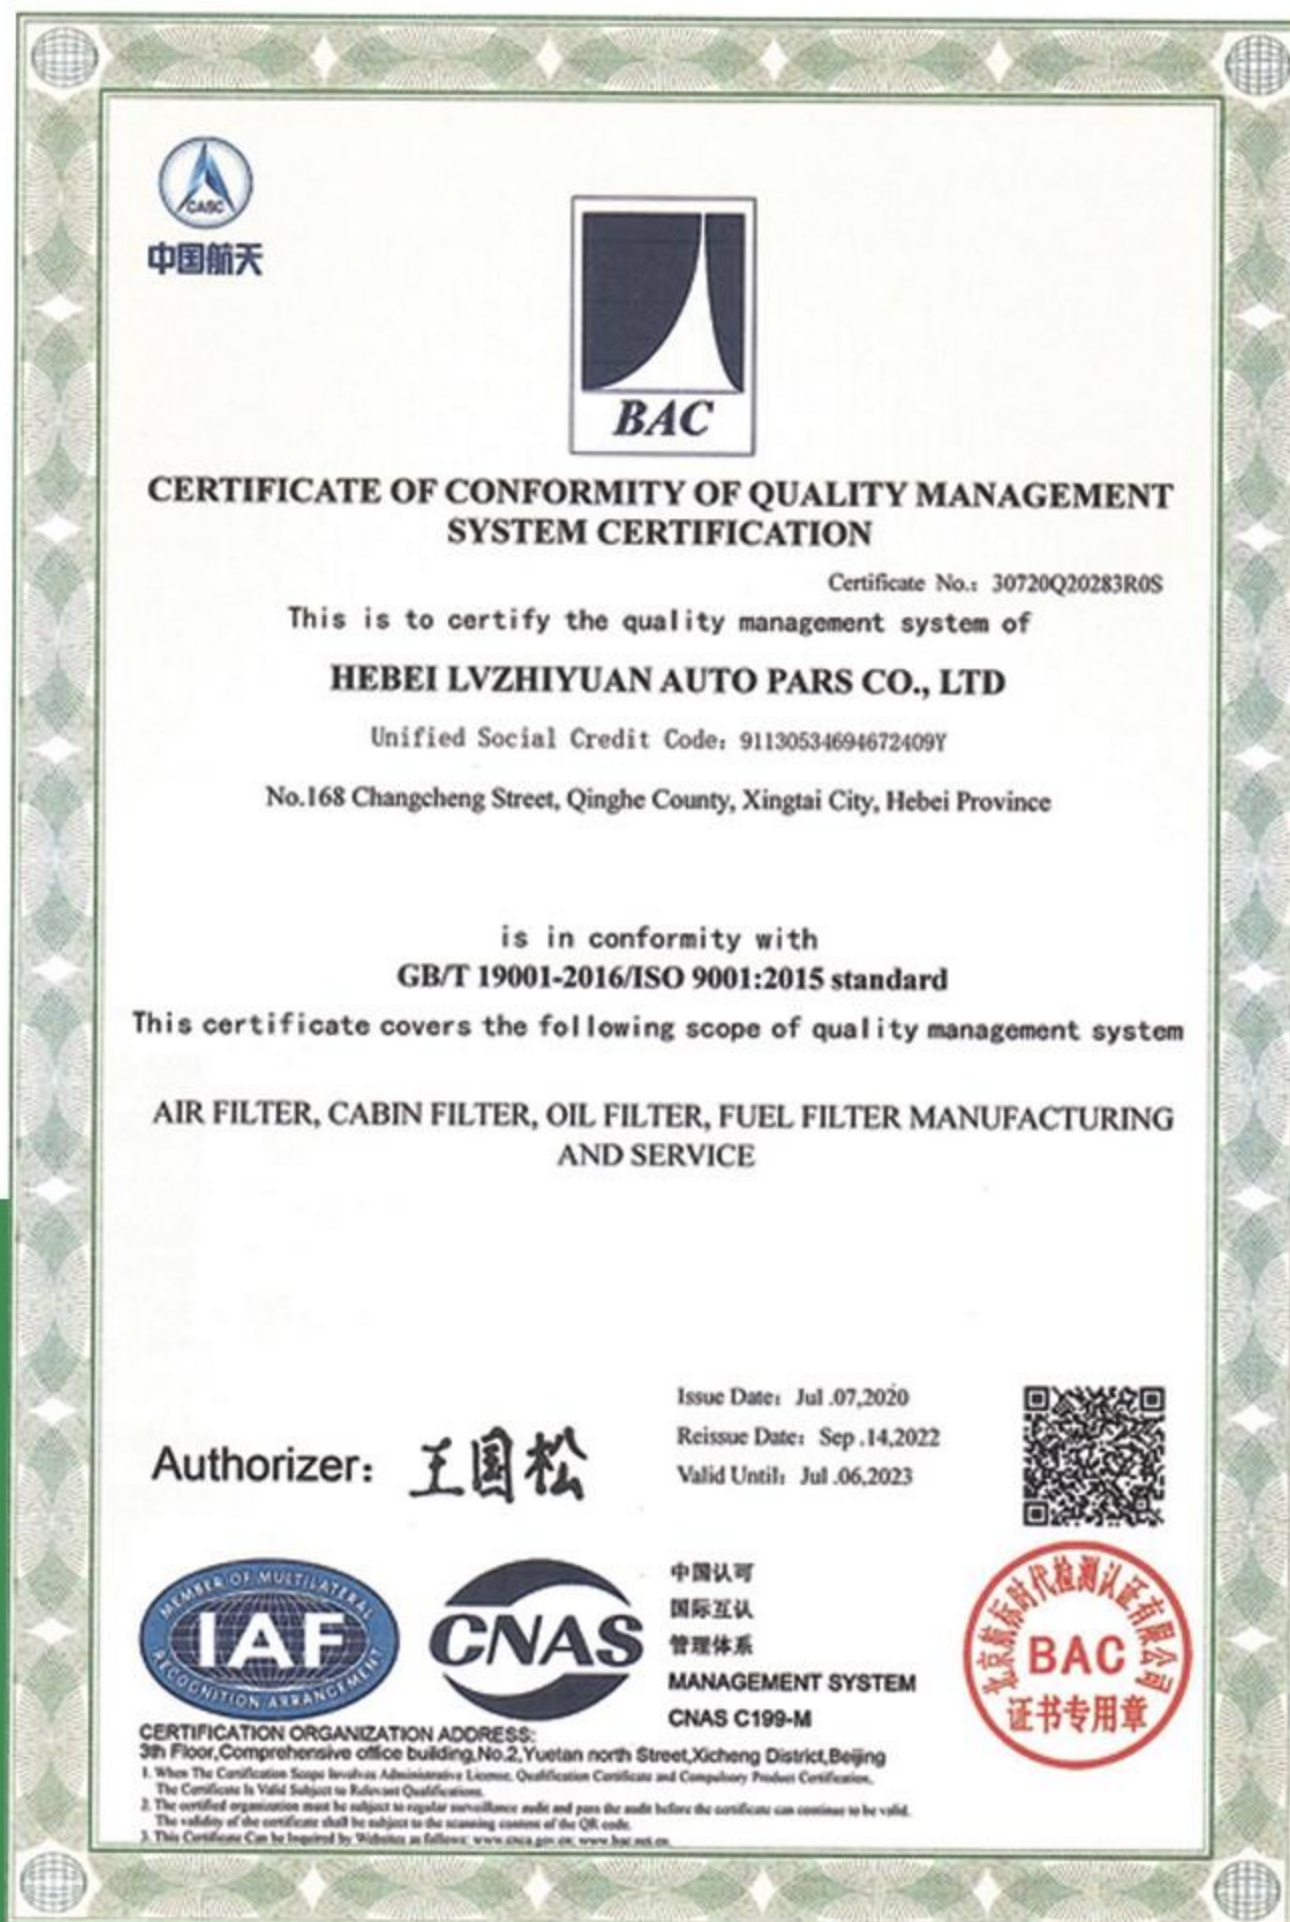

Oil & fuel filter

Engineering Machinery Filter

COMPANY CERTIFICATIONS:

IATF 16949:2016
 ISO 9001:2015
 ISO 14001:2015
 ISO 45001:2008

MIMS AUTOMECHANIKA MOSCOW 2019

SEVEN REASONS TO CHOOSE NEWFIL

WORKSHOP MANAGEMENT

Adhere to the workshop management 6S standardization, with first-class production workshop

QUALITY MANAGEMENT

Strict and standardized quality management process, from materials to production process and final product

EXPERIENCE ADVANTAGE

With more than 20 years of history in the production of filters, NEWFIL has rich market experience, market influence and competitiveness

TEAM ADVANTAGE

Relying on a stable, professional and dynamic team, more than 50% of the employees have worked for more than 10 years. What is more, a big part of workers have rich work experience as well as professional skills.

LAB AND CHECK ABILITY

Thanks to professional testing capabilities, complete testing equipment, with the latest filter performance test bench, NEWFIL can provide customers with professional experimental data

PRODUCTION ABILITY ADVANTAGE

In 2023, the completion of new plant and introduction to American and German most advanced equipments indicate more advanced production technology and larger production volume.

PRICE ADVANTAGE

Constantly optimize and upgrade production process to realize final production with higher efficiency, lower wastage, more advantageous prices.
