

Company introduction

Alucool Heat Transfer Co., Ltd (AHT) is a specialized company which mainly focus on designing, manufacturing and marketing of aluminum heat exchanger products. We are founded by a group of professional engineering people who has already been in the heat exchanger fields for over decades. Why we want to set up a new company? As we hope to help our customer to get higher quality products and satisfied services based on our professional work experience and the understanding of different standard. We are focused on supplying aluminum type oil coolers, hydraulic oil coolers, transmission oil coolers, water coolers, charge air coolers and complete cooling system. Our products are widely used in many industrial fields. These fields are mainly including air compressor, construction machinery, agricultural machinery, wind power station, engine industry, aviation, marine and so on. We take 3D software and testing equipments to help us to design, manufacturing, and management. AHT will continuously focused on manufacturing of products for OEM market. And we take customer needs as our basic requirements. We believe quality should influence our entire business activity. We take every opportunity to monitor and measure our success, from improved customer satisfaction to better productivity, increased market share, reduction in quality costs and a higher quality standing of our well-trained and highly motivated workforce. In order to achieve the long development of corporation, We continue on improving the technology of manufacturing higher quality products.

Products

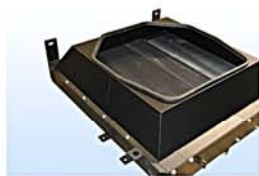

Combination cooler

Hydraulic oil cooler

Cooler for blender

Combination cooler

Complete oil cooler

Cooler core

Combination cooler

Cooler for compressor

Cooler for wind power

Intercooler

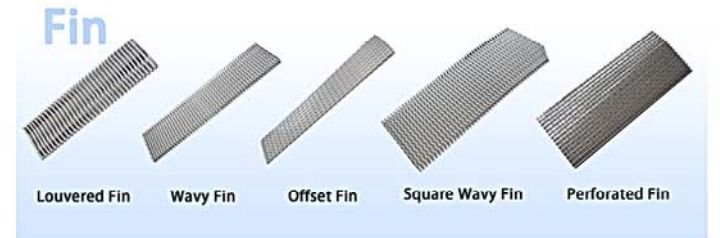

All aluminum radiator

Stacked layer cooler

Components

Core
