CORPORATE PROFILE II

CQ HENYOO New Material Technology Co., Ltd. is a private enterprise specializing in the research and development of new wear-resistant alloy materials, which integrates casting and machining. Our company is located in Sanjiao Town, Yongchuan District, Chongqing Municipality, with a superior geographical location and convenient transportation.

Our company covers an area of about 15,000 square meters and has a standard modern factory. The main production equipments of our factory are large-capacity medium-frequency electric furnace and large-capacity heat treatment cart furnace. And the annual production capacity of our factory is

铸心赋能 造德成势

expected to reach 5,000 tons. Our company adopts advanced environmental friendly water glass sand casting process and lost foam casting process. Our main products are wear-resistant parts for Metso, Sandvik and other import and export crushers. With high quality products and good service, our company has gained favorable comments from our customers. In addition, we also provide one-stop customized service for wear-resistant castings, trying our best to satisfy our customers.

Our company is determined to provide customers with cost-effective and high-quality wear-resistant products, adhering to the principle of "wear-resistant is the truth". We insist on making user-satisfied products and serving every customer carefully. We believe that actions speak louder than words and we will gain your praise and recognition with our good products and service.
