

Company profile

Established in 1999, Shanghai Chunxu Group is a leading and most professional manufacturer of rotational moulds and products in China. Being one of the first councilmen of the International Plastic Rotational Mould Association, and member of Australia Rotational Moulders Association, we keep cooperation with rotational moulding associations of America, Italy, Australia. At the same time, we exchange science and technology with global authorized experts in the fields of aero-space, military, chemical engineering, gardening, institutes and so on.

Shanghai Chunxu Group, a joint stock system private enterprise, has subsidiary companies: Shanghai Chunxu Mould Industrial Co. Ltd and Shanghai Chunyang Roto Moulding Co. Ltd. The registered capital is about 11 million, total investment of 32 million, factory area of 20000 square meters, and more than 200 employees. Our factory is a garden-like modern company, and connects the outer ring roads of Shanghai, so the transportation is very convenient.

In 2001, we were awarded ISO9001:2000 International Quality Certificate, and be one member of the first group that update to ISO9001:2008 edition. As for enterprise management and technology research, Chunxu has a large number of highly educated and rich experienced managers and technicians, from the product design, the mould manufacture to the mass production all done by an elite team. On the other hand, Chunxu currently has hundreds of high-tech equipments, such as imported CNC, digital millers, electrical sparkles, linear cutting machines, automatic rotational molding machines and so on.

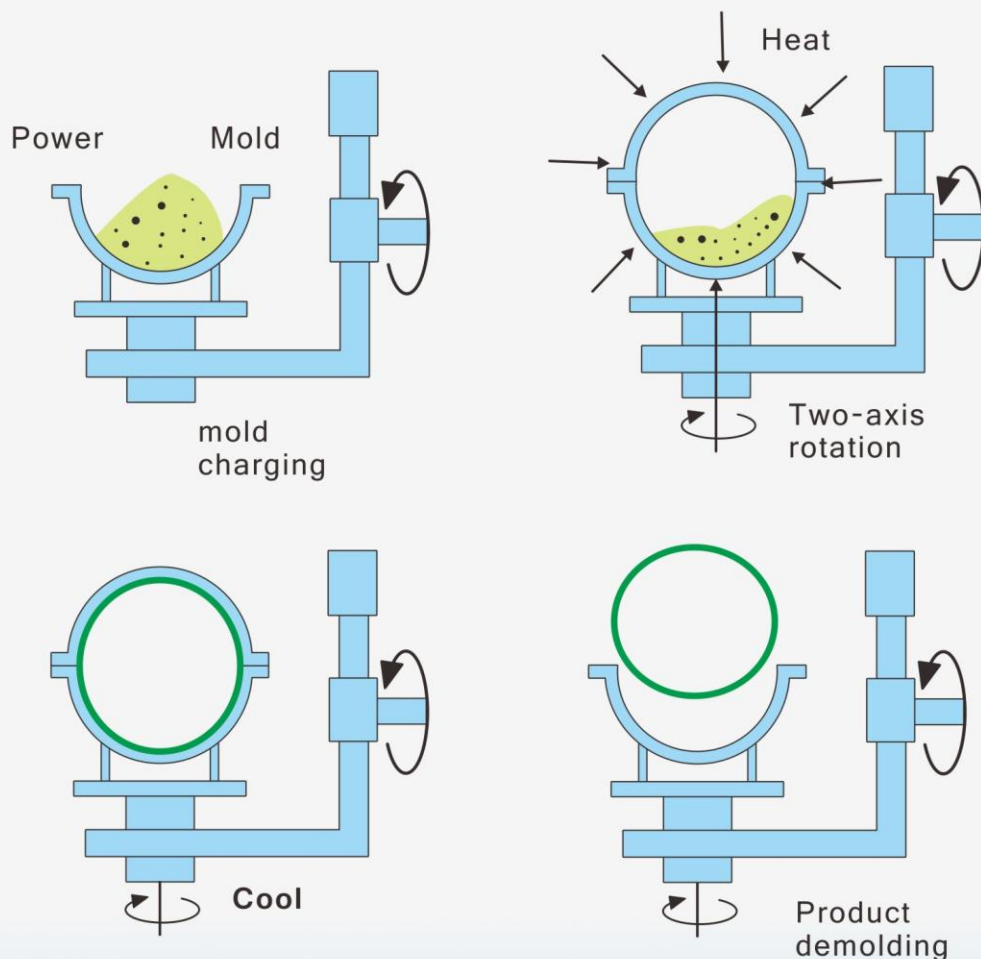

That advanced technology, internationalized production process, world class quality, high standard self-requirement and super efficient work team, make Chunxu enjoy high favor among more and more customers. Over last 10 years, Chunxu has expanded its both domestic and overseas markets, approximately 95% of our molds and products are exported to 40 different countries, such as the USA, the UK, France, Germany, Italy, Canada, Australia, Brazil etc, and range over every field, like enterprises, governments, schools, hospitals, parks and hotels. Chunxu is using his perfect quality and excellent service attract our customers. Therefore, the world can enjoy the convenience and happiness brought by Chinese rotational products, from Chunxu.

Chunxu will always sitck to serve the world faithfully. With diversified products, perfect quality, excellent service, Chunxu is bound to be internationalized. Under the cooperation with our global friends, a new era for Rotational Molding is definitely coming.

Sincerely welcome your coming!

Rotational molding

Rotational moulding which is a high temperature, low volume, low pressure thermoplastic forming process .A pre-measured thermoplastic resin is loaded into the mould, heated while rotating on a vertical and horizontal axis, this melts the polymer causing it to evenly coat the surface of the mould giving the product its required shape and thickness, cooled to a desired temperature in a separate chamber, then the product is removed from the mould.

Company culture

Enterprise purpose: market as the guidance, quality as the life, science & technology as the driving force, prestige as the root.

Enterprise Spirit: self-improvement, struggle constantly, pursue excellence, create resplendence.

Enterprise Tenet: focus on rotational molding industry, with vigorous efforts to promote it develops energetically in China.

Operating Policy: Integrity-based, global services, production-class products, create first-class company.

Team Spirit: loyal to enterprise, loyal to employee, forms the joint effort, plans a total of Wai Yip.

Enterprise Concept of Value: unite and progress, realistic and innovative, mutual benefit and win-win co-operation

One World One Dream

We Produced many rotational molding products for Beijing Olympic Games in 2008. Especially, the most famous ones are Auspicious Drum Lamps and "UFO" Rotomolded Chairs which located in Olympic ThemePark. The photos as above:

Auspicious Drum Lamp

Better City, Better Life

In 2010, our company was very honored to be able to contribute to Shanghai WorldExposition, and successfully completed all the furniture manufacturing in the air tree projects, we are the only rotational molding products manufacturer who coo-perate with Madrid Pavilion. From we got the order to lead time confirmation, only 2 months. As time is so limited and customer sotrust us, we were determined to acc-omplish the order of best quality and best service. Therefore, we set up a special p-roject team, and arrange people specially assigned for the task in full time to ensur-e the successful completion of production. Finally, in the afternoon of April 14th, the furniture arrived at Madrid Pavilion on time. So April 15th, Madrid Pavilion got a succ-essful and wonderful testing operation.

Chunxu and Engineering Machinery Leader Hand in Hand

In 2006, we succeeded to join the purchase worldwide system of BOMAG China. BOMAG is the world market leader in the field of Compaction Technology and the manufacturing of machines for the compaction of soils, asphalt and refuse as well as stabilizers/recyclers. BOMAG have many branches in Germany, the United States, Japan, Canada and other countries and regions. We made many kinds of water tanks, oil tanks and any other machine accessories for BOMAG.

Advantage of plastic oil tanks:

light weight, no leaking, good safety, impact resistance, easy to install, structure diversification, can be easy change depend on the space of the trucks. Comprehensive performance of Plastic oil tank is very good, applied to a heavy truck and heavy vehicles, cars, modified trucks, rollers, and so on.

Quality Bears Responsibility, Technology Creates Advantage

From the end of 2009, our company build a long relationship with Changchun FAW, researching and developing projects for urea tank and mudguard. The project is a new challenge to the automotive industry.

The plastic urea tank is made of imported plastic materials LLDPE and use rotational molding process. We can develop any kinds of water tanks, oil tanks, mudguard according to customers' requirement; we provide the OEM service from Design to mould to mass production.

Advantage of plastic oil tanks:

Light weight, no leaking, good safety, impact resistance, easy-to-install, diversified modified trucks and so on.

Successful case

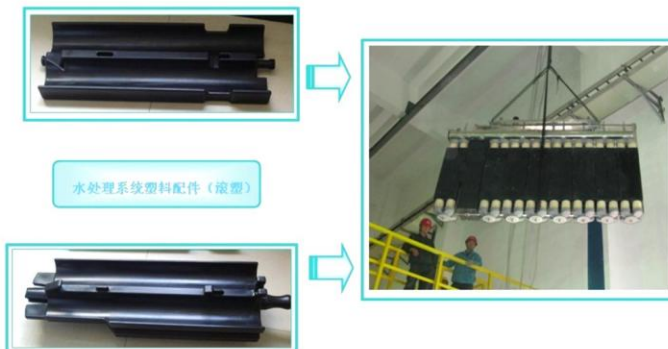

Chunxu Plug on the Wings to XCMG

In 2006, Chunxu build a long-term and stable relationship with XCMG who is one of the global giant 500. We produce water tanks, oil tanks and other important parts to them.

SIEMENS Thrive with Innovation and High Quality

From 2008, we successfully cooperate with Siemens Water Technologies in long-term relationship. As the water treatment project requires all products must have NSF certification, we import a lot of raw materials from abroad. To ensure the smooth progress of the project, from rotational molding to container loading, we control strictly to keep this project working smoother.

Rotational Mould

1. Rich experiences in rotomoulding processing.
2. We can offer the whole system services from mould design to the finished products.
3. Our experienced and highly skilled technical design team use advanced CAM software (like UG, Solid works, Auto CAD, Pro/E) to translate your ideas, pictures, drawings and prototypes into high quality, accurate molds with no pinholes at all - ensuring that the end product has uniform wall thickness and smooth surface. Full design, manufacturing process control rotational mold, CNC machining, allows us to efficiently, durability complete rotational mold.
4. High-efficiency lead time—— Generally speaking, we can finish one mould and the 1st sample in around 30 days. Even much shorter for the smaller projects.
5. Advanced equipment—— We have more than 50 high-tech equipments in mold workshop, such as imported CNC, digital miller, electrical sparkle, linear cutting machines and so on and 30 rotational molding machines in our rotomolding workshop.

Case & Container

The rotomolding case&containers we produced, replacing the traditional method of molding which used the wooden board and the steel plate, this plastic conveys case used the craft of one-time rotational molding, The advantage of this method is following: preventing the impact, anti-corrosion, strong and high intensity, convenient to carry, difficult to be damaged. Military field operations blood case can stay warm to minus 13 degrees Celsius, meet the standards of the Ministry of Health, above all, the material of the food warmer / freezer case are imported plastic raw materials from abroad, food-grade raw materials, non-toxic and tasteless, it also has the beautiful appearance and convenient to transport.

Cleaning & Environmental Protection Product

Cleaning machine introduction: special shape body, complex structure of cleaning machine must be made by rotational molding process, other plastics technology can not be replaced. Good looking and aesthetic appearance of rotomold product, color match each other, convenient installation, on the machine, insert without water leakage, shock resistance, corrosion resistance, electrical safety, to large shopping malls, public places, auto repair field and other cleaning places instead of the original artificial semi mechanized cleaning tool.

Environmental protection garbage box adopts rotomolding process produced, advantage is the ability to integral forming, green box in large shopping malls, hotels, upscale hotel lift door or place, this kind of garbage box is beautiful, colorful, easy to use, easy to clean, has been unanimously praised by users.

Military product

The Advantages of our Rotomolding military product:

- 1) Economic tooling costs.
- 2) One-piece construction.
- 3) Weight reduction-as compared to most metals.
- 4) Uniform wall thickness-nothinning in the extremities.
- 5) Thickness can be varied if required
- 6) Variety of finishes and color.
- 7) The ability to produce multi-wall moldings.
- 8) Design flexibility-from small and intricate to large and complex.
- 9) Metal inserts as integral parts.
- 10) Short lead-time.
- 11) Resistance to stress-cracking and corrosion.

Household & Garden Product

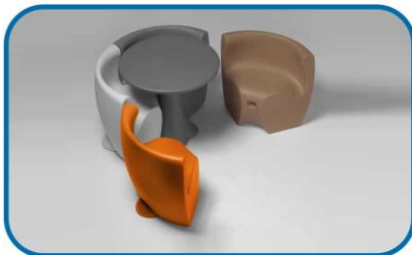

Plastic pots using foreign mature ROTATION (rotational molding) process as a whole forming. Products with seamless, non-toxic tasteless, acid and alkali resistance, impact resistance, high temperature (80), low temperature (-40), difficult to aging characteristics. Shape can be processed into fake clay type, carved type, smooth type. Size can be processed into infinity. Light weight, corrosion-resistant aging, high strength, long life series features a pot of inevitable development.
