江西鑫田车业有限公司位于江西省宜春市，是江西省同行业著名工业企业之一，专业从事“塑料进气歧管、汽车空调冷凝器及其零部件、汽车冷却散热器和加热器等产品的设计、制造和销售”。通过 IATF16949:2016, ISO14001:2015, ISO45001:2018, OHSAS18001 国际质量管理体系，被评为江西省重点先进企业，拥有进出口营业执照。

自成立以来，我们建立了完善的营销网络。我们的产品赢得了市场的青睐，销量超过二十个国家和地区，例如(美国、德国、俄罗斯、波兰)以及被指定十余家国内主要大小汽车主机配套产品制造商，如“四川现代、中国重汽”。“以极致服务客户概念”“以工匠精神制造产品”，秉承“科技兴业”、“以质取胜”的原则，我们热衷于新产品的研发，不断为“科技兴业”的目标做出努力和贡献。“以制造高品质产品为永恒目标，鑫田人始终为实现“鑫田与时代同行”的目标不懈努力。

Located in Yichun city of Jiangxi province, Jiangxi Xintian Auto Industry Co., Ltd is one of the famous industrial enterprise of the fellow trade in Jiangxi province, Being specialized in "designing,manufacturing and sales of plastic intake manifold, auto A/C Condenser and its parts, auto cooling radiator and heater and etc.. Being recognized by IATF16949:2016, ISO14001:2015, ISO45001:2018, OHSAS18001 International Quality and Management System. We are entitled to be a key advanced enterprise of Jiangxi province, with the license to handle import and export.

Since our founding, we have established perfect marketing network. Our products which have won the favor of the market, are sold in more than twenty countries and regions such as (the USA, Germany, Russia, Poland) as well as being designated accessory products by over ten large sized main vehicle manufacturers at domestic, such as Sichuan Hyundai, Hasi-no-Truk Serving customers with the ultimate concept" Manufacturing products with the spirit of artisans" Adhering to the principle of "bring forth new science and technology" and "winning with high quality". We are keen on a research and development of new products and make efforts and contribution to the goal of "invigor business by applying science and technology". With the eternal goal of manufacturing high quality product Xintian people are making unremitting efforts to realize the goal "Xintian Synchronized with the time".

品质追求

PARTNERS

伙伴

Our supply at home and abroad, due to a large supply and demand relationship, we have almost all products in our warehouse, from the beginning to meet the needs of customers in terms of price, quality and on-time delivery.

我们的货源遍及国内外，由于庞大的供需关系，我们的仓库里几乎都有所有的产品，从一开始就满足客户在价格、质量和准时交货方面的需求。

At present, we export Chinese auto parts to more than 50 countries. Our exports are not limited to XINTIAN products. We deal in all automotive parts, complete vehicles and aftermarket brands. Based on these capabilities, we will meet your needs for automotive parts.

目前，我们向50多个国家出口中国汽车零部件。我们的出口不限于鑫田产品。我们经营所有汽车零部件、整车和售后市场品牌。基于这些能力，我们将满足您对汽车零部件的需求。

For nearly 20 years,
we have continued to innovate and move forward
近20年来，我们不断创新，不断前行

With advanced production technology and scale
拥有先进的生产技术和规模

Zero Defect Policy Is Followed By Entire Company Members.
Zero Defect In The Raw Material Control.
Zero Defect In The Production Line.
Immediate Action Against The Customer's Complaint
Implementing Quality Standard
Keep Improving On The Product Quality

整个公司成员都遵循零缺陷政策。
原材料控制零缺陷。
生产线零缺陷。
针对客户的投诉立即采取行动
执行质量标准
精益求精的产品品质

INNOVATION & CHALLENGE

创新 & 挑战

SHORT LEAD TIME 交货时间短

With ERP/MES system supports, Xintian will shorten production lead time to comply with customer's minimum stock requirement.
我们的货源遍及国内外，由于庞大的供需关系，我们的仓库里几乎都有所有的产品，从一开始就满足客户在价格、质量和准时交货方面的需求。

FULL QUALITY INSPECTION 全面质检

Computerized production process with vision system to prevent defective parts passed to the next process train zero defect policy to all company members.
电脑化生产流程，配备可视化系统，防止缺陷零件传递到下一道工序，向所有公司成员培训零缺陷政策。

MARKET AND CUSTOMER 市场与客户

Monitoring product performance and market response immediate action against customer's requirements precise service until customers are satisfied.
监控产品性能和市场反馈，针对客户的要求立即采取行动提供精准服务，直至客户满意。

Passenger Car Engine Peripheral Parts And Motors
乘用车发动机周边件及电机

VALVE COVER
气门室盖

The valve cover is a casing found on the top of the engine. It covers the valves of the engine, protects the machinery from the elements, and prevents oil leaks. Cracks, corrosion, and misalignment of the valve cover can cause fluid to leak into the engine compartments and lead to engine failure.

气门室盖是位于发动机顶部的外壳。它覆盖发动机的阀门，保护机械免受元件影响，并防止漏油。气门室盖的裂纹、腐蚀和错位会导致液体泄漏到发动机舱中并导致发动机故障。

INTAKE MANIFOLD
进气歧管

Featuring a series of tubes, the intake manifold ensures that the air coming into the engine is evenly distributed to all the cylinders. This air is used during the first stroke of the combustion process. The intake manifold also helps cool down the cylinders to prevent the engine from overheating.

进气歧管具有一系列管道，可确保进入发动机的空气均匀分布到所有气缸。该空气在燃烧过程的第一个冲程中使用。进气歧管还有助于冷却气缸，以防止发动机过热。

NOX SENSOR
氮氧传感器

The nitrogen oxide sensor is used to detect the concentration of nitrogen oxides in the exhaust gas to determine whether the exhaust gas meets the regulatory requirements.

氮氧化物传感器用于检测尾气中的氮氧化物浓度，以判断尾气是否符合法规要求。

CARBON CANISTER
碳罐

An activated carbon canister is used to capture hydrocarbon vapor emissions from the fuel tank as part of an evaporative emission control system (EVAP).

活性炭罐用于收集燃油箱中排放的碳氢化合物蒸汽，作为蒸发排放控制系统 (EVAP) 的一部分。

EXHAUST MANIFOLD
排气歧管

Bolted directly to the engine block, the exhaust manifold is the first section of a vehicle's exhaust system. It funnels exhaust gases from all the cylinders and routes them to the car's catalytic converter.

排气歧管直接用螺栓固定在发动机缸体上，是车辆排气系统的第一部分。它将所有气缸中的废气汇集到汽车的催化转化器中。

TRANSFER CASE MOTOR
分动箱电机

A transfer case motor is a part of the drive train of four-wheel-drive, all-wheel-drive, and other multiple powered axle vehicles. The transfer case motor transfer power from the transmission to the front and rear axles by means of drive shafts.

分动箱电机是驱动装置的一部分 四轮驱动、全轮驱动和其他多动力轴车辆的列车。分动箱电机通过驱动轴将动力从变速器传递到前轴和后轴。
