COMPANY INTRODUCTION

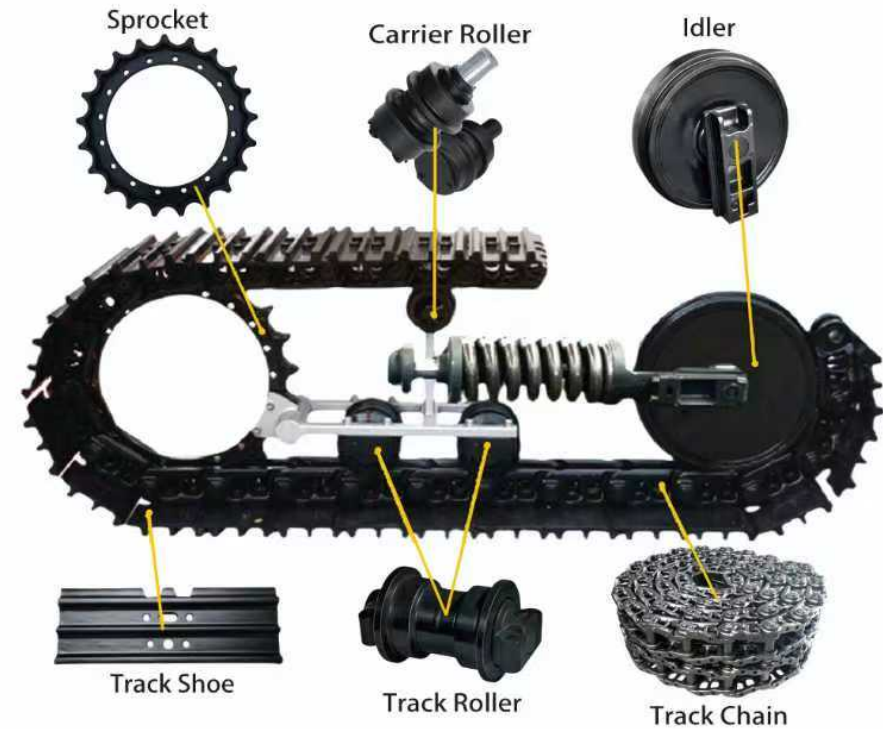

YANTAI ORIENT specializes in the production of UNDERCARRIAGE PARTS for drilling rig, mining excavator, mining bulldozer, crawler crane.

Our main products are TRACK SHOE, TRACK CHAIN, TRACK ROLLER, CARRIER ROLLER, SPROCKET, IDLER, etc., which are cost-effective and suitable for Bauer, Liebherr, Soilmecc, Atlas Copco, Casagrande, IMT, CMV, Mait, Sandvik, Delmag, Sany, XCMG, Zoomlion, Sunward, etc.

"YANTAI ORIENT always be customer-oriented." With the advanced equipment, skilled technology, and high-quality raw material to provide a high-quality product for the customer, our products are sold to global 30+ countries, and have received the satisfaction of 1000 + customers. We always sincerely look forward to establishing long-term cooperation with each customer.

OUR PRODUCTS

Track Adjuster

Track Guard

SPROCKET

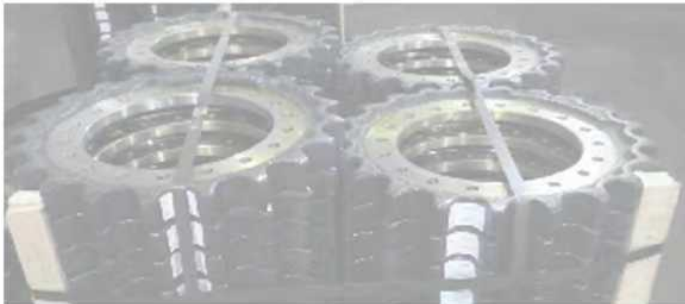

Precision processing technology and advanced heat treatment process are adopted to achieve the best wear resistance and extend the service life.

Great performance, high quality, and high accuracy.

Strict quality control and inspection, ensure that the size of the sprocket is very accurate.

OEM parts and customized parts available.

IDLER

- The excellent heat treatment technology ensures good wear resistance and prevents cracks.
- Advanced casting technology, using high-quality molding sand.
- High quality raw materials to ensure the overall hardness and stability of the idler.
- Suitable for various models and customized idlers available.
- Manufacturing Technique: casting and welding.

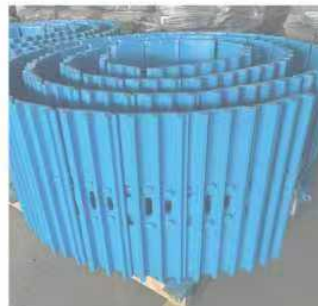

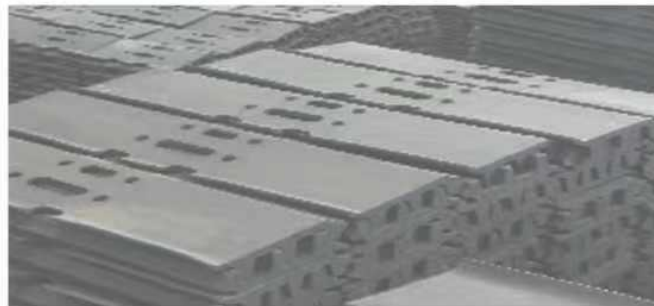

TRACK SHOE

Heat Treatment: Quenching and Tempering, Surface Hardening.

Advanced production technology makes the surface of our track shoes smoother.

Suitable for various models, OEM parts and customized products available.

TRACK CHAIN ASSY

The depth and hardness of quenching are strictly in line with the standard.

Automatic tempering equipment, the internal organization of the track chain is uniform, and the production quality is stable.

Track chain is subject to strict quality control and inspection before delivery.

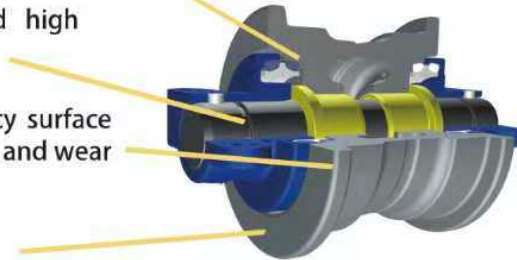

Suitable for various models and customized products available.

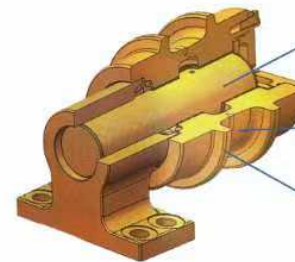

TRACK ROLLER

- Floating Seal: Forged by high chrome molybdenum alloy & good wear resistance.
- O-ring: Good oil resistance and high temperature resistance.
- Tempering and medium frequency surface quenching, to ensure the strength and wear resistance.
- Quality shaft and brass bushing.

CARRIER ROLLER

- Good internal lubricating oil circulation system.
- High quality raw materials, the carrier roller hardness is high and wear-resistant.
- Our production will ensure the quality and dimensional accuracy of products from all aspects, including measurement and customization, precision machining and multiple inspections before delivery.
