

With Two Decades Of Metrology Expertise

3D Infotech is a global leader in metrology software solutions. We specialize in 3D software solutions for quality control automation and adaptive manufacturing across various industries. Our customizable plug-and-play solutions reduce inspection time and costs.

Industries

Aerospace

Automotive

Consumer Products

Healthcare

Energy

Castings & Forgings

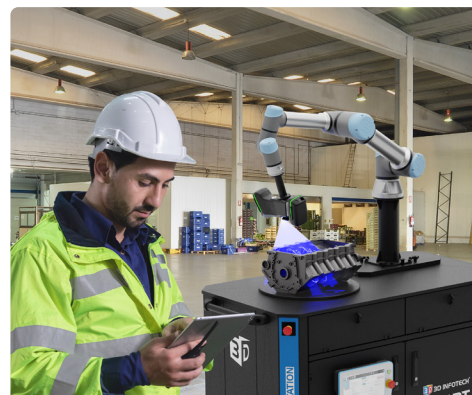

Our Universal Solutions

Metrología Portable

Automatización Robótica

Soluciones Empresariales

Realidad Aumentada

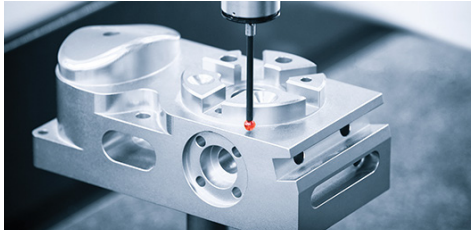

On Demand Services

Redefining quality process inspection

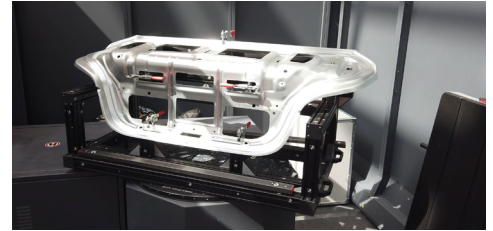

Integrate our solutions seamlessly into your workflow. Streamline quality inspection for real-time defect detection and data analytics. Enhance product quality, reduce errors, and boost efficiency.

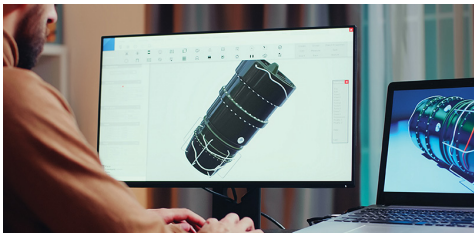

Dimensional Inspection

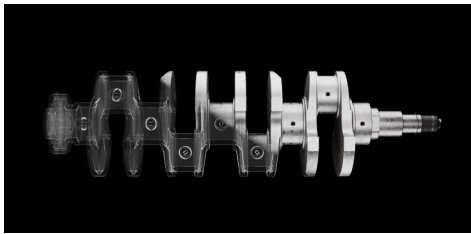

CMM Inspection

Jigs and Fixtures

Reverse Engineering

Computed Tomography

Facilities Modeling

Classroom

Focused on applications using both portable contact and non-contact devices. Register for PolyWorks | Inspector™ & PolyWorks | Modeler™

PolyWorks | Inspector™ covers: Data to CAD comparisons, GD&T, Deviation and Profile inspection points, sectional views, multiple device/part setups, and more.

PolyWorks | Modeler™ covers: Acquiring data, cleaning and optimizing data, reverse engineering with 2D sketches & NURBS.

8:30 AM to 4:30 PM

With one hour break for lunch
Refreshments are provided

Computer and class materials are provided.

On-Site

Tailored for customers using contact devices (CMMs, portable arms without laser scanners) or non-contact devices (structured light scanners, hand-held scanners, spherical/long-range scanners).

Participants must provide their computers for training if onsite. Training materials will be provided.

Founded in 2005 based in Irvine, California, **3D Infotech** is a **3D software solution provider** for **quality control automation** and adaptive manufacturing applications in a wide variety of industry verticals.
