FOCUS ON MINING CRUSHER EQUIPMENT FOR 20 YEARS

佰辰重工是一家成立于2003年的重型矿山机械企业，现已成长为破碎矿山领域的龙头企业。

公司主要生产破碎设备、制砂设备、选矿设备、磨粉设备、建材设备五大系列产品，集设计研发、加工制造、采购管理、销售及售后服务为一体；主营产品：颚式破碎机、反击式破碎机、圆锥式破碎机、制砂机、洗砂机、移动式破碎站、高压磨粉机、球磨机、浮选机、回转烘干机、回转窑等设备，广泛应用于矿山、建材、化工、冶金、交通、水利等行业。

Baichy Machinery is a heavy mining machinery manufacturer which is founded in 2003, and grow into a leading enterprise of crushing and mining field.

We mainly produce five series of products: crushing equipment, sand making equipment, mineral processing equipment, grinding equipment and building materials equipment. It integrates design and R&D, processing and manufacturing, procurement management, sales and after-sales service.

矿山设备出口基地 Mining Equipment Export Base

价值化、标准化、专业化、差异化

EPC总包服务 EPC Project Service

EPC总包服务有效克服设计、安装、施工等环节相互制约和相互脱节的矛盾，从而保障工程质量，给客户提供一个一站式的服务。

EPC contracting services effectively overcome the mutual restriction and disconnection of design, installation, construction and other links, so as to guarantee the quality of the project and provide customers with one-stop service.

项目规划 Project Planning

负责整个项目的统筹规划和具体实施，客户只负责整体的、原则的、目标的管理和控制。

Responsible for the overall planning and specific implementation of the entire project, the customer is only responsible for the overall, principle, target management and control.

定制化解决方案 Customized Solutions

提供全套专业的解决方案，集中客户的设备选择范围，减少精力、财力等成本消耗。

Provide a full set of professional solutions to focus on the customer's equipment selection range and reduce energy, financial resources, and other cost consumption.

重要环节严格把控 Strictly Control Important Links

设计、生产、安装、试运行等环节由我司全方位解决，工程实时监控，保证质量，缩短工期。

Our company comprehensively handles the design, production, installation, trial operation, and other links, and monitors the project in real-time to ensure quality and shorten the construction period.

CRAWLER MOBILE CRUSHING PLANT

履带式移动破碎站

履带式移动破碎站是一种全液压驱动履带式车用底盘行走的移动破碎筛分设备，将给料机、破碎机、振动筛、皮带机、动力机组及控制箱合为一体，配置一键启动、无线遥控器等附加产品，可实现原地转向。履带式移动破碎站破碎比大，其优化设计使得破碎机生产率高，成品料粒度均匀一致，被广泛适用于路桥建设、城市建筑、冶金、能源等部门，进行破碎、筛分等作业。

Crawler mobile crushing plant is a stone crushing & screening equipment with crawler chassis walking driven by full hydraulic system. It integrates feeder, crusher, vibrating screen, belt conveyor, power unit and control cabinet into one plant. And it is equipped with additional device such as one-button start, wireless remote control etc. Crawler mobile crushing plant has features of large crushing ratio, and optimal design make stone crusher have high productivity and uniform granularity of finished materials. It is widely used in road, bridge construction, urban construction, metallurgy, energy industry.

高效稳定 | 无需安装调试 | 30分钟内即可进行生产

High efficiency and stability | Less installation and commissioning | Start to produce within 30 minutes

- 油电两用，更稳定，更高产，更安全
- 一键启动，配合无线遥控器，减少辅助操作人员
- 超重型转子设计，产能提升15%
- Dual use of oil and electricity, more stable, more productive, more safe
- One-click start, with wireless remote control, can reduce the auxiliary operator
- Super heavy rotor design, production capacity increased by 15%

TYRE MOBILE CRUSHING PLANT

轮胎式移动破碎站

轮胎式移动破碎站，是集给料、输送、破碎、制砂、筛分等功能于一身的整套破碎生产线。根据要破碎的物料的不同和客户的需求搭配不同的破碎设备（如：颚式破碎机、反击式破碎机、圆锥破碎机、制砂机）。可直接开进工作现场快速投入生产，真正为客户提供便捷、高效、低成本的项目运营硬件设施。

Tyre mobile crushing plant is a complete set of crushing production line integrating feeding, conveying, crushing, sand making, screening and other functions. Different crushing equipment (such as jaw crusher, impact crusher, cone crusher, sand making machine, etc.) are matched according to different materials to be crushed and customer needs.

快速投产 | 无基础安装 | 性能可靠

Fast production | No foundation installation | Reliable performance

- 所有部件完全车载，从而省去了现场安装的步骤，使得生产能够迅速启动。
- 合理调节固定支腿结构，切实实现了无基础安装
- All components are completely onboard, eliminating the need for on-site installation and allowing production to start quickly.
- Reasonable adjustment of the fixed leg structure, no foundation installation is achieved.

PE JAW CRUSHER

PE颚式破碎机

产品简介 | Product Introduction

PE颚式破碎机是一种广泛用于抗压强度320兆帕以下的各种物料的粗碎、中碎作业。工作原理主要是通过动颚板和定颚板之间的周期性往复运动对材料进行挤压和破碎。根据破碎的粒度又可分为PE颚式破碎机和PEX细颚式破碎机。

Jaw crusher is widely used for coarse and medium crushing of various materials with compressive strength below 320 MPa. The working principle is mainly to squeeze and crush the materials through the periodic reciprocating motion between the movable jaw plate and the fixed jaw plate. According to the crushed particle size, it can be divided into PE jaw crusher and PEX fine jaw crusher.

C SERIES JAW CRUSHER

C系列颚式破碎机

产品简介 | Product Introduction

C系列颚式破碎机是我公司引进欧版颚式破碎机的设计理念并结合国内的情况进行设计和优化，具有结构新颖、造型美观、腔型独特、运行性能优越、处理量大、破碎比大、高效节能等特点。

C series jaw crusher is designed and optimized by our company based on the design concept of European version jaw crusher and combined with the domestic situation. It has the characteristics of novel structure, beautiful appearance, unique cavity shape, superior operating performance, large processing capacity, large crushing ratio, high efficiency and energy saving.

PFW EUROPEAN IMPACT CRUSHER

PFW欧版反击破

产品简介 | Product Introduction

PFW欧版反击破以结构简单、操作方便和成品粒形好而受到广大客户的青睐，特别适用于中低抗压强度的物料破碎，是高级公路路面及水电建设所需的高质量骨料理想的破碎设备。在高速公路建设、水利工程、建筑碎石、机制砂加工等领域广泛应用。

PFW european impact crusher is popular by simple structure, easy operation and good finished granularity. It is mainly used to crush medium hard and soft material. It is also the ideal crushing equipment on high standard aggregate requirement for highway or hydropower construction. It is widely used in high-speed highway construction, water engineering, construction industry, mechanism sand processing and other fields.

VSI SAND MAKING MACHINE

VSI立轴冲击式破碎机

产品简介 | Product Introduction

VSI冲击式制砂机集多种破碎模式于一体，成为机制砂行业的核心设备。可广泛应用于金属矿石和非金属矿石、建筑材料、人工制砂以及各种冶金矿渣的破碎与整形。

VSI impact sand making machine integrates multiple crushing modes and has become the core equipment in the mechanism sand industry. It can be widely used in the crushing and shaping of metal ores and non-metallic ores, building materials, artificial sand making and various metallurgical slags.

SPRING CONE CRUSHER

弹簧圆锥破碎机

产品简介 | Product Introduction

PY系列弹簧圆锥破碎机适用于破碎硬度为中等或者更硬,比如铁矿石等类的各种矿石。从结构上主要分为六大部分:定锥总成、动锥总成、传动总成、弹簧机构、碗型轴架部、机架总成。其辅助部分,由电气系统、稀油润滑系统组成。

PY series spring cone crusher is mainly used for crushing medium hardness or more hardness various ore, like iron ore, etc. The structure is mainly divided into six parts: fixed cone assembly, movable cone assembly, transmission assembly, spring mechanism, bowl-shaped shaft frame, and frame assembly. Its auxiliary part is composed of electrical system and thin oil lubrication system.

SYMONS CONE CRUSHER

西蒙斯圆锥破碎机

产品简介 | Product Introduction

西蒙斯圆锥破碎机是基于层压破碎原理及多破少磨的概念设计研发的一种集高摆频、优化腔型、合理冲程于一体的现代高性能破碎机。该设备过载保护措施齐全, 具有完整的润滑系统, 多种腔型满足不同破碎要求; 液压装置可在未破碎物料进入破碎腔时自动释放破碎腔。

Symons cone crusher is a modern high-performance stone crusher designed based on the principle of laminated crushing and concept of more crushing and less grinding, which integrates high swing frequency, optimized cavity type and reasonable stroke. The cone crusher has complete overload protection measures, a complete lubrication system, and a variety of cavity types to meet different crushing requirements; the hydraulic device can automatically release the crushing cavity when the uncrushed material enters crushing cavity.

MULTI-CYLINDER HYDRAULIC CONE CRUSHER

多缸液压圆锥破碎机

产品简介 | Product Introduction

HP系列多缸液压圆锥破碎机是在近三十年的破碎机研发经验基础上,结合国内外先进技术,经过几代产品的研发和应用,推出的新一代高效液压圆锥破碎机,适用于所有要求严格的采石、采矿和隧道施工应用。多年来,它们已成为世界上最受欢迎的现代圆锥破碎机。

HP series multi-cylinder hydraulic cone crushers are a new generation of high-efficiency hydraulic cone crushers launched on the basis of nearly three decades of crusher research and development experience, combined with advanced domestic and foreign technologies, and after several generations of product development and application. They are suitable for all demanding quarrying, mining and tunnel construction applications. Over the years, they have become the most popular modern cone crushers in the world.

产品优势 | Product Advantage

优势一 | PLC集成控制系统, 操作更简单

PLC integrated control system easier operation

液压圆锥破采用先进的PLC电气系统,可连续监测破碎机并提供报警,显示运行参数,操作人员可以实时了解破碎机运行情况,进而简化生产线操作,降低操作风险,提高破碎生产线安全性能。

The hydraulic cone crusher adopts advanced PLC intelligent electrical system, which can continuously monitor the crusher and provide alarms, display operating parameters, and the operator can understand the operation of the crusher in real time, thereby simplifying the production line operation, reducing operating risks, and improving the safety performance of the crushing production line.

优势二 | 层压破碎设计, 骨料粒形和质量更好

Laminated crushing design, better aggregate shape and quality

HP液压圆锥破碎机利用层压破碎原理对物料进行破碎,破碎效率高,易损件磨损低;破碎后成品呈立方体,细粒级含量高,可以很好的满足高品质骨料的使用需求。

HP hydraulic cone crusher uses the principle of laminated crushing to crush materials, with high crushing efficiency and low wear of vulnerable parts; the finished product after crushing is cubic and has a high fine particle content, which can well meet the use requirements of high-quality aggregates.

SINGLE CYLINDER HYDRAULIC CONE CRUSHER

单缸液压圆锥破碎机

产品简介 | Product Introduction

单缸液压圆锥式破碎机,属于圆锥破的一种,集机械、液压、电气、自动化、智能控制等技术于一体,可广泛应用于金属与非金属矿、水泥、砂石、冶金等行业的中碎、细碎和超细碎作业。具有破碎效率高,生产成本低,维护调整方便,破碎产品粒型优异等优点。

Single cylinder hydraulic cone crusher is a type of cone crusher, integrating mechanical, hydraulic, electrical, automation, intelligent control and other technologies, and can be widely used in medium, fine and ultra-fine crushing operations in metal and non-metallic minerals, cement, sand and gravel, metallurgy and other industries. It has the advantages of high crushing efficiency, low production cost, convenient maintenance and adjustment, and excellent particle shape of crushed products.

产品优势 | Product Advantage

优势一 | 生产效率高承载能力强

High production efficiency and carrying capacity

单缸液压圆锥破通过将破碎腔型、偏心距与运动参数相配合实现了更高的生产效率,更优的产品质量;结合优化的强度设计,高质量的部件,设备的承载能力更强、破碎比更大、通过能力更强。

The single cylinder hydraulic cone crusher achieves higher production efficiency and better product quality by combining the crushing chamber type, eccentricity and motion parameters. Combined with optimized strength design and high-quality components, The equipment has stronger load-bearing capacity, larger crushing ratio and higher passing power.

优势二 | 多腔型适应多种工艺需求

The multi-cavity type is suitable for various process requirements

液压圆锥破有多种标准破碎腔型可供选择,可以全面满足颚式破碎机粗碎后的二段破碎、三段破碎和四段破碎的生产需求。

Single cylinder hydraulic cone crusher has a variety of standard crushing chamber types to choose from, which can fully meet the production needs of two-stage crushing, three-stage crushing and four-stage crushing after coarse crushing of jaw crusher.

DOUBLE ROLLER CRUSHER

对辊破碎机

产品简介 | Product Introduction

对辊破碎机主要由滚轮、滚轮支撑轴承、压调装置、驱动装置等组成；其结构简单，我们公司生产的辊式破碎机主要有强力双辊式破碎机、四辊式破碎机和双齿辊式破碎机。

Roller crusher is mainly composed of rollers, roller supporting bearings, pressure regulating devices, driving devices, etc. The structure is simple and highly efficient. The roller crusher produced by our company includes the strong double roller crusher, four roller crusher, and double tooth roller crusher.

SINGLE PASS ROTARY DRYER

单筒烘干机

烘干机广泛应用于建筑材料、冶金、化工行业、水泥行业等。它能够烘干矿渣、煤粉、矿粉、粘土、砂石等。烘干机由机身、扬板、驱动装置、支撑装置等构成，拥有结构合理，高效、节能、运输方便等性能。(信辰可根据用户需求的的不同量身定制此设备)

The single pass rotary dryer is widely used in the field of building materials, metallurgy, chemical industry, cement and so on. It can dry slag, coal powder, mining powder, clay, sand, limestone and so on. It is made of rotary drum, lifting blade, driving device,supporting device etc. The dryer has advantages of reasonable structure, high efficiency, low energy consumption and convenient for transportation.

YGM HIGH PRESSURE GRINDING MILL

YGM高压悬辊磨粉机

产品简介 | Product Introduction

YGM系列磨粉机是佰辰机械在传统R系列雷蒙磨粉机的基础上自主研发创新的新型高效研磨设备。其各项技术指标较R型机均有较大提高，是传统雷蒙磨粉机的理想替代品。参数配置经过了市场长时间的检验、经实践验证，它是中小型非金属矿磨粉经济适用的选择。

YGM series grinding mill is a new type of high-efficiency grinding equipment independently developed and innovated by Baichy Machinery on the basis of traditional R-series Raymond mill. Its various technical indicators have been greatly improved compared with the R-type machine, and it is an ideal substitute for the traditional Raymond mill. The parameter configuration has been well tested by the market for a long time. It has been proven by practice that it is an economical and applicable choice for small and medium-scale non-metallic ore milling.

BAII MILL

球磨机

产品简介 | Product Introduction

球磨机主要用于矿山、水泥、耐火材料、化工等原料的研磨。根据磨矿方式的不同可分为干式和湿式两种；根据排矿方式不同，可分为格子型和溢流型两种。

Ball Mill is mainly used to grind materials in mineral, cement, refractory, chemical industry, etc. According to grinding ore method it can be divided into wet grinding and dry grinding method, and according to discharging type it can be divided grate discharge and overflow type ball mill.

FLOTATION MACHINE

浮选机

产品简介 | Product Introduction

浮选机适用于分离有色金属、黑金属、贵金属、非金属矿物和化学原料，可进行粗选、扫选、精选或反浮选作业，且有易损件寿命长、自吸矿浆无需泡沫泵、粒度范围广，回收率高、叶轮采用双面后倾式叶片，可实现槽内矿浆的双重循环等特点。

Flotation cell machine is applicable for separating non-ferrous metal, black metal, noble metal, non-metal mineral and materials of chemical industry, it can be used in roughing, scavenging, selection or reverse flotation. Long life of wearing parts; Self-priming slurry and no foam pump is required; Wide range of particle size and high recovery rate; The impeller with double-sided tilt-back blades, which can realize double circulation of slurry in the tank.

WET PAN MILL

湿式碾金机

产品简介 | Product Introduction

湿碾机主要用于金、银、铅、锌、铁、钨、锡矿作业等。因其设备投资小、回收快、高效率成为中小企业主的最佳选择。

The wet pan mill is mainly used for gold, silver, lead, zinc, iron, molybdenum, antimony ore process and so on. Because of small invest, quick return and high effectiveness, wet pan mill has become the ideal equipment for small and medium enterprises.
