We reserve the rights to change specifications and appearance without further notice.

Shanghai Jiezhou Engineering & Mechanism Co., Ltd. was founded in 1983. Over the years, the company has been focusing on the research and development, production and sales of concrete equipment and asphalt viscous compaction equipment. The products strictly implement the ISO9001, 5S, CE standards, advanced technology and reliable quality. We are committed to pursuing all-round excellent performance and becoming a world-class construction equipment supplier. Based on China and facing the world, Jiezhou company will, as always, provide high-quality light construction equipment and related technical solutions to users around the world.

COMPANY PROFILE

COMPANY VISION>>>

Core Value: Assistance to customer's achievement Honesty & Integrity loyalty Devote to innovation Social responsibility

Core Mission: Help in lifting construction standard, building better life

Objectives: Pursue super excellence, to be the first-class supplier of construction machinery in the world

CONTENTS

CONCRETE FINISHING

1	LASER SCREED	P1
2	VIBRATORY SCREED / TRUSS SCREED	P3
3	POWER TROWEL	P4
4	CONCRETE VIBRATOR / POKERS	P7
5	BULL FLOAT / BUMP CUTTER / LIGHT TOWER	P8
6	CURING AGENT MACHINE / ROAD PLANER / POLISHING MACHINE	P9
7	FLOOR GRINDER / DRY AND WET VACUUM CLEANER / INDUSTRIAL VACCUM CLEANER	P10
8	CONCRETE CUTTER	P11

ASPHALT&CLAY COMPACTION

9	ROAD ROLLER	P12
10	TAMPING RAMMER	P13
11	PLATE COMPACTOR	P14

LASER SCREED

LS-600

LS-500

Topping Spreader DTS-2.0

DYNAMIC Laser Screed series could greatly improve the concrete smoothness and compaction, as well as prolong the service life of concrete floor. Widely used in modern industrial workshop, large shopping malls, warehouse and other construction of large area concrete ground preferred.

LASER SCREED

LS-400

DYNAMIC Laser Screed machine, equip imported servo drive system, walking stability, accurate speed regulation, and strong overload capacity. Equip Dynamic brand or Topcon laser system, which has extremely high working accuracy and reliability. Hybrid driving system, has the advantages of low fuel consumption per square meter and more economical operating costs.

LS-325/350

VIBRATORY SCREED / TRUSS SCREED

VS-25B

Operation: Dual power configuration/Electric models

DYNAMIC Vibratory Screed replaces the processes of roller and scraper in the traditional construction process, reduce the cost and improve the efficiency. With the durable aluminum alloy material, keep the light weight, easy to operate and safe to use, make the high flatness. The aluminum alloy scraper is durable and can be customized 1-5 meters.

VTS-600

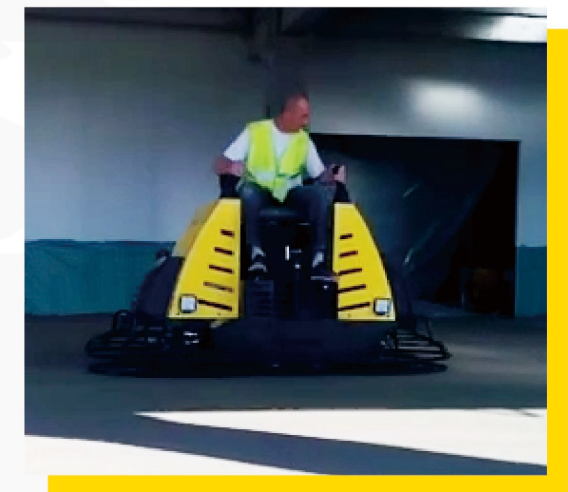

DYNAMIC Truss Screed use high-strength aluminum alloy material, while forming a stable frame structure, it effectively reduces the weight of the fuselage and greatly reduces labor intensity. Easy to install, no need special tools, one person can complete dis-assembly and assembly independently, the working length of 4M-18M can be freely combined.

HYDRAULIC RIDE-ON TROWEL

DYNAMIC Ride-on Trowel series could greatly increase work efficiency for surface of concrete raised paste and trowel, smooth out. Widely used in building large area ground like factory, warehouse, square and so on.

QUM-96H

QUM-78HA

RIDE-ON TROWEL

QUM-80

QUM-96

QUM-78

QUM-65

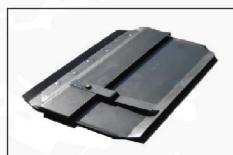

Blade / Float blade / Pan

Finishing blade STYLE 10B

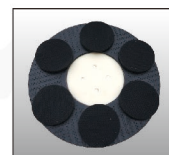

Combination blade STYLE 36

Rough sharpening float blade
STYLE 14C

Pulping pan Plate 02A

Adaptor Disc

WALK-BEHIND POWER TROWEL

QJM-1200

QJM-800/600

DYNAMIC Walk-behind Power Trowel, use the heavy-duty gearbox, which has excellent performance and durability. The safety switch can automatically cut off the engine power to ensure safety. The adjustable handle can adapt to operators of different heights. The balanced blade makes the operation more stable. Bicycle handle for operation.

QJM-1000

Optional sprinkler system

Finishing blade STYLE 16

Resin blade

CONCRETE VIBRATOR / POKERS

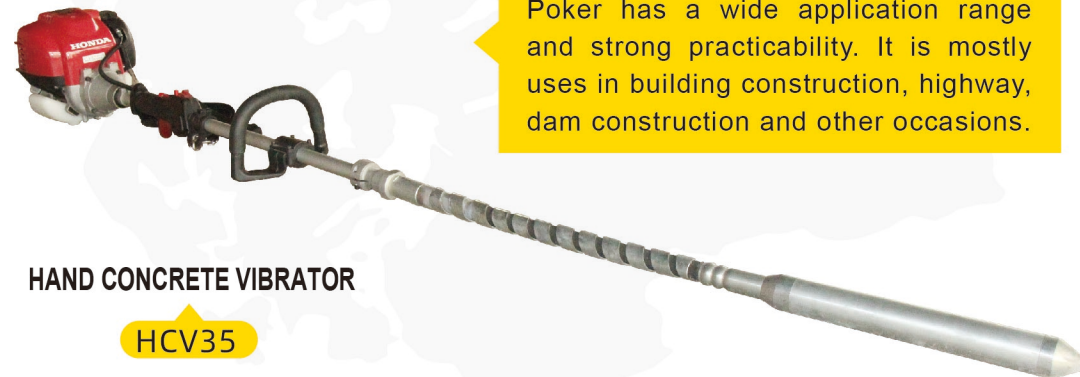

CONCRETE VIBRATOR

NZQ-50

DV23

DYNAMIC Concrete Vibrator/Vibrator Poker has a wide application range and strong practicability. It is mostly uses in building construction, highway, dam construction and other occasions.

HAND CONCRETE VIBRATOR

HCV35

ZN/ZNW Series POKER

ZN/ZNW28
ZN/ZNW32
ZN/ZNW38
ZN/ZNW45
ZN/ZNW50
ZN/ZNW60
ZN70

CV SERIES DRIVING MOTOR

CV-50/50A/70/70A

Powerful motor CV-50 with two output types 1.1kw and 1.5 kw can drive every size of shafts

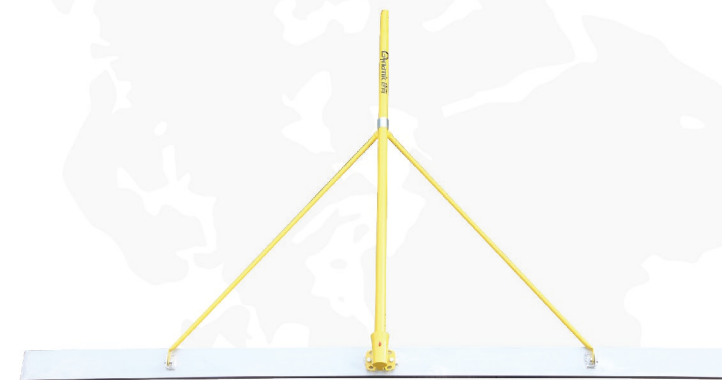

BULL FLOAT / BUMP CUTTER / LIGHT TOWER

DYNAMIC Bull Float is made of magnesium alloy, light weight and longer lasting. It completes with 4 holes, uses with worm gear bracket and threaded bracket. Float blade curved and balance to prevent digging.

BF-150/300

BC-300/350

DYNAMIC Bump Cutter is made of magnesium alloy, light weight and durable. It has extra wide working area to save time and labor, widely used to level out the concrete surface.

DYNAMIC Light tower is equipped with Honda generator set, stable operation and compact structure. It uses LED lighting with high brightness and long life. It is widely used in the lighting of municipal construction, engineering construction, field emergency repair and disaster relief scene.

LT-500/1000

CURING AGENT MACHINE / ROAD PLANER / POLISHING MACHINE

LSM-1000

DYNAMIC Curing Agent Spreader, can spray curing agent evenly, saving materials, high spraying efficiency and fast speed, and large working area coverage.

DY-300/250

Operation: Gasoline engine

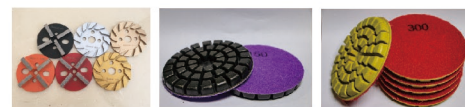

DYNAMIC pavement milling planer fine adjustment hand-wheel device is used to adjust the mechanical milling planer depth, easy construction, used for road, bridge deck milling planer, remove tar, remove the old cement floor.

DY-686

DYNAMIC high-speed polishing machine adopts the Siemens motor, ensure that power is durable for a long time. Large working area, the polishing effect is good, uniform polishing, no marks, light fast and lasting sheen not faded. It is suitable for all kinds of surface polishing treatment, curing floor can achieve mirror polishing effect.

Diamond Disc/Resin Disc

FLOOR GRINDER / DRY AND WET VACUUM CLEANER / INDUSTRIAL VACUUM CLEANER

DYNAMIC Floor Grinding Machine are widely used in floor grinding, cement rough floor polishing, old epoxy floor renovation, sealed curing floor polishing, and marble floor maintenance.

DY-720/680/630

VC-200

DYNAMIC dry and wet vacuum cleaner can not only absorb iron filings, sandstone, glass fragments and other solid materials, but also absorb liquids such as water and oil, which can meet the various needs of users. It can effectively collect superfine powders like ceramic powder, plastic spray powder, toner cartridge powder, metal powder, etc., and can quickly clean up iron filings, sand, wood chips and a large amount of dust. It can also be used as a general business environment, such as general offices, guest rooms, etc.

DYNAMIC industrial vacuum cleaner can inhale dust particles to the greatest extent, creating a dust-free construction environment. It can be easily removed and washed, and the machine is durable. It can be used with grinder or alone.

VC-100

CONCRETE CUTTER

DFS-500

DFS-400

DFS-300

DYNAMIC Floor Saw series could be easily operated for cutting concrete and asphalt floor in road, bridge, parking lot, square, factories and other large area projects. Compared with the domestic market other similar products, Dynamic floor saw series is more practicable and reliable.

ROAD ROLLER

DDR-60

DRL-70/60

DYNAMIC Road Roller have extraordinary compaction efficiency, equip with automatic vibration system and unique water spray system. It has the advantages of compact structure, easy to transport, large working force and high efficiency. The working weight is between 0.3-3 tons. It is suitable for all kinds of roads and other foundation compaction projects, and can complete compaction work flexibly and efficiently.

RRL-200/100

TAMPING RAMMER / PLATE COMPACTOR

DYNAMIC Tamping Rammer series is used for compacting the sand, gravel, crushed, sand of soil and the asphalt macadam, concrete and clay. Widely used in road, railway station, bridge, reservoir dyke, the wall and the land of narrow ditch construction.

TRE-85/82/75

DUR-1000

HUR-300/250

PLATE COMPACTOR

DUR-500/400

HZR-120/90/80/70/60

Optional accessories

sprinkler system

Wheel

Rubber mat

DYNAMIC Plate Compactor, is used for the construction of narrow areas such as wall corners, roadsides, ditches, etc. It can also be used for special processes of compacting asphalt and permeable concrete. DYNAMIC Plate Compactor focus on practicability and reliability, high cost-effective, economical and practical.
