AUTO GLASS 

Stock Code | 833675

河南环宇玻璃科技股份有限公司
Henan Huanyu Glass Tech Corp.

Company Profile

Henan Huanyu Glass Tech Corp. (i.e. Huanyu-Tech, Stock Code: 833675), located in ancient capital of Cao-wei Dynasty--Xuchang, Henan province, China, founded in 2004, is a latest national high-tech enterprise for producing all kinds of safety glass for both automotive vehicles and building curtain wall with 80,000 square meter modern production base, high level management and professional R&D team, advanced production lines and complete inspection devices, annual production capacity over four million square meters for all kinds of laminated glass, tempered glass, insulating glass and auto window assembly.

We have established complete IATF16949 quality management system and all products passed the major relative international certification like China CCC, U.S. DOT, ECE and etc. With strong R&D strength, first-rate quality, most varieties of products structure and good reputation, we have become major

professional OEM safety glass supplier for home and abroad famous enterprise group for manufacturing buses, automobiles, construction machinery and agricultural tractors such as YUTONG group, YTO Group, LOVOL, JAC, XCMG, SDLG, LG, Shifeng Group, AGCO, Newholland, Hyundai Heavy Industry and etc., and awarded the title of "Excellent Safety Glass Supplier". Meantime, our products serve all over the multifarious demand of domestic after market, and are exported to Europe, America, Middle East, Africa, Southeast Asia etc. over 30 countries and regions.

With the faith of "The quality first and the credit supreme", we regards the quality as our only way to live and prosper. Providing first rate products and service at the most competitive price to meet the customers' requirement is our constant pursuit.

Products-Full set of OEM bus safety glass

Bus laminated front windshield-Sound proof,heat-proof and energy-saving

Max. Width: 3300MM
Max. Height: 2000MM
Max.Sagitta: 650MM
Precision Tolerance: 0-2MM
Sphere:0-180MM
Radius of Curvature: over 120MM
Thickness: from 6.76MM to 10.76MM
Color: Clear,Green,Bronze,CG,CB,GG,GB

Two-piece type bus front windshield--Sound proof,heat-proof and energy-saving

High precision bending process
The left and the right highly symmetric
Intermediate surface transition smooth and looking nice
Large deep corners curved arc

Bus Defrosted Tempered Rear Windshield

Max.(L x W):2200MM X 1350MM

Bus Low-e energy-saving,sound-proof and heat-proof insulating Side Window Glass

Max.Spec.:2315MM X 1900MM
Min.(L*W):215*300MM.
Min.Symmetrical curved: R650
Min.unsymmetrical curved: R900
Thickness: 16MM; 20MM

Bus insulating Built-in Window Assembly

Max.Spec.:2315MM X 1900MM
Min.Symmetrical curved: R650
Min.unsymmetrical curved: R900
Thickness: 16MM,20MM

Mini-bus built-in window assembly

Flush Window Assembly

Insulating built-in window assembly:integrated and lightweight design,looking nice, performance stable, easy to install and being popularly applied for the the new-energy bus and minivan.

Optional Color : Clear,Green,Bronze,Light Grey,Dark Grey, Dark/Black

Products—Major OEM safety glass manufacturer for home and abroad agricultural tractors and engineering machineries

AGCO G7 Tempered Driver Door Glass

Area: over 1.7M2
The center sphere is 30MM
Highly sealing demand after installation
This glass itself reflects our precise tooling technology, equipment capability and processing stability

YTO LA2004 Door Glass

Area: 1.8M2
Area: over 1.8M2
Central sphere: only 45MM; With the hard work and research, we successfully innovate new toolings in the drilling, ensuring the keyhole and glass installation holes precise and processing stability, which completely surpass the traditional processing way

Deep Curved Tractors' side window glass

Using the vertical tempered furnace to form its deep curvature and the spring controlled from 150MM to 300MM

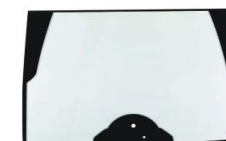

Four-pillar tractor body super-big door glass design

Driver door glass and side glass integrated design; the width is 1377MM and the centre sphere only 50MM; Glass total area is 2.15M2. Successful production of this glass reflects our high level of new tooling processes and equipment production capacity and process control standards

AGCO G7 tempered front windshield

Integrated design for front windshield and roof glass
And curvature radius where the skylight at the bending radius is only 260MM
The optical performance of the visual field is high
Sphere is only 10mm, requiring precise processing control

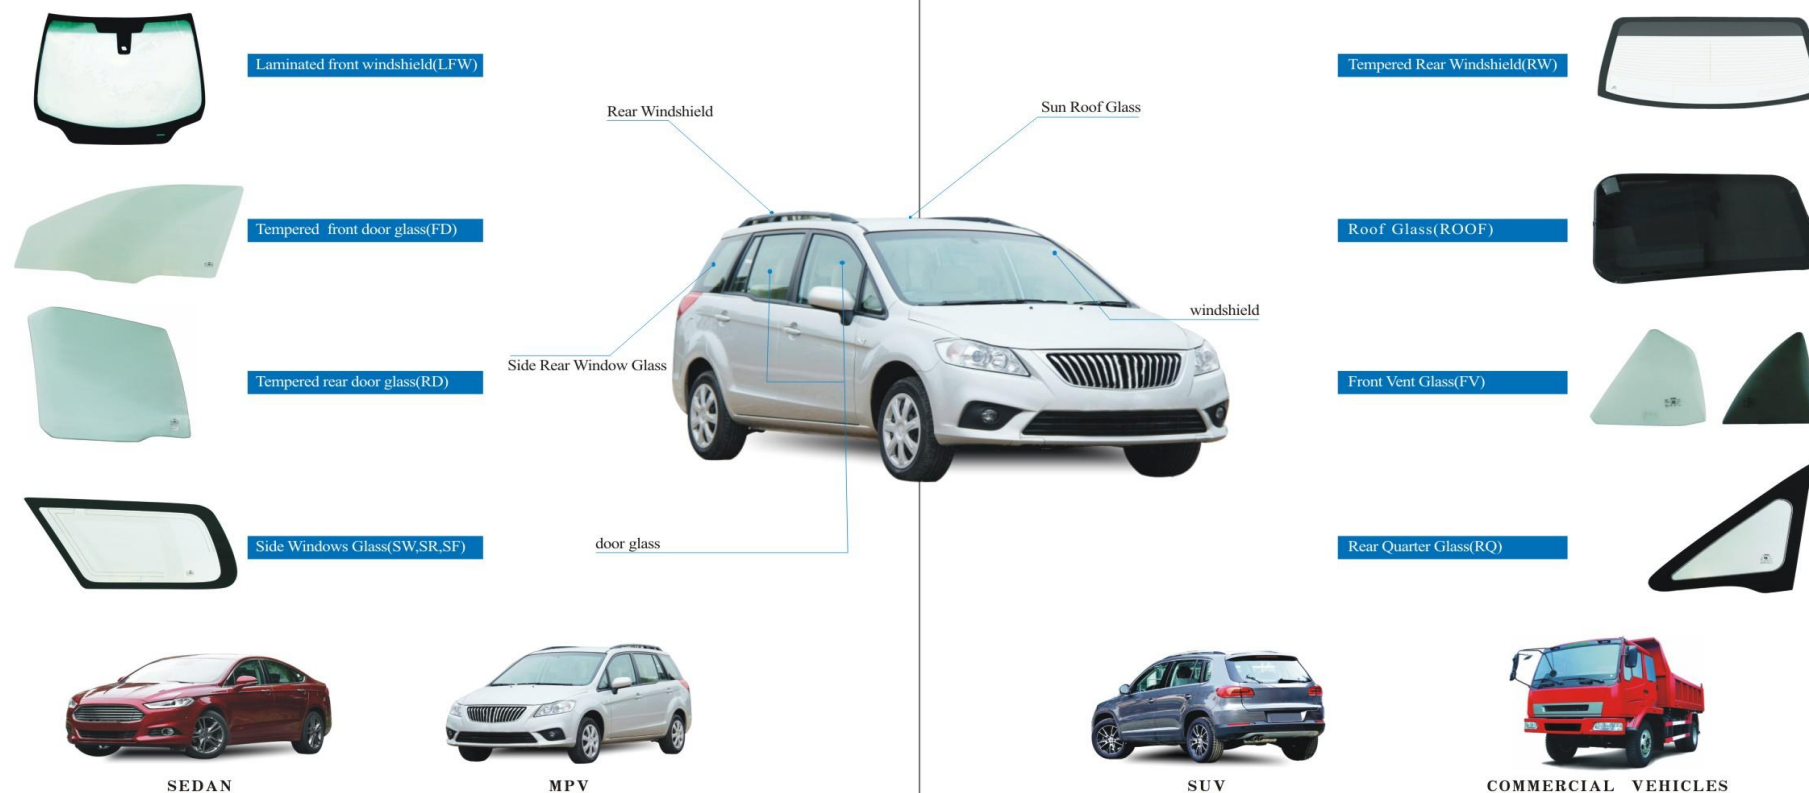

SDLG953F tempered front windshield

Hyperbolic curved, and the bottom spring depth is up to 180MM
Meantime ensuring superior optical performance

Products—Full set of auto Glass for the aftersales of automobiles and commercial vehicles home and abroad

Enterprise Honor Qualification and Certification

Awarded the AAA Enterprise title

In 2014 Awarded Safety Glass Gold Medal by Ministry of Agriculture

Awarded the title of famous trademark

Identified as provincial high-tech enterprise in 2013

Awarded "Excellent Safety Glass Supplier" Title

Awarded the title of famous trademark

CHINA 3C
CERTIFICATION

IATF16949 Certification
of Management System

USA DOT
Certification

ECE R43

Others' Certification: Nigeria SON, Saudi
Arabia SASO, Brazil INMETRO...

IATF16949 DOT ECE CCC SON SASO

Quality Guarantee System

Huanyu Safety Glass follows close to the line of IATF16949, China CCC, ECE R43 of European Community and DOT of USA and firmly be committed to implement effective quality control and efficient production management system to meet customers' demand with better quality products and service at the much more competitive price.
