Premium components for multi-brand crushers

More information on crusher parts at:
www.tjluckcome.com

Quality spare parts by know-how

With many years of crushing experience, we understand how parts fit and function within a crusher for maximum performance. Luckcome has taken the OEM approach to the design and fabrication of quality parts for multi-brand crushers. Now our capabilities have been extended to also offer premium components, including service, maintenance and rebuild crushers. You can find the part from Luckcome when you need it and at the lower total cost.

Improved safety and quality

To succeed in today's competitive environment, end users often seek to optimize their crusher maintenance. Using parts that last longer and make crusher maintenance easier and safer can make the big difference for a producer's bottom line. Luckcome premium parts are developed with quality suppliers and materials, ensuring that the higher standards and the stricter tolerances are met. By understanding all the various factors that impact your crushers' operating performance, we are always looking to make improvements. For select parts, additional enhancements have been made such as adding extra lifting points for safer change outs or using improved materials and alloys for longer parts life.

Benefits

- High quality premium parts design using our know-how.
- Enhanced parts offer improved safety, easier maintenance for reduced downtime and longer life.
- Base on mass-storage, fast delivery from stock for the most common and needed spares for best performance.

A complete range of critical quality parts

Full stock in plenty and variety

Plenty and variety inventory supported by skilled personnel for fast delivery in accuracy.

Bronze bushings

Bushings should be inspected for excess wear or burn each time the shaft is removed for a mantle change to avoid unplanned downtime. Eccentric bushings and bottom shell bushings are made to OEM standards and tolerances for long functional life.

Head nut with ring

The often replaced mantle head nut and torch ring are delivered as a kit. The torch ring is available as a separate part and can be ordered for each mantle exchange.

Eccentric wear ring

An important bearing part that keeps the gear adjustment in place. If worn down, it can cause issues to the gearing, pinion and eccentric gear. Inspecting its condition and changing it when needed ensures the integrity of your gearing components.

Mainshaft sleeves

This important protective component is made to OEM standards with correct clearances and materials for optimal fit, form and function. When changing the mainshaft sleeve, be sure to also check on the condition of your spider bushings and replace them as needed.

Step bearings

This vertical bearing component supports the mainshaft movement and forces so it is important to inspect for issues when your crusher's shaft is removed. Luckcome offers the parts as separate loose parts or as a lapped kit.

Enhanced spider bushings

The spider bushing is a vital support component to avoid excess wear and collateral damages to the bottom bearings and bushings of your crusher. Enhanced spider bushings in manganese-bronze alloy instead of standard iron have been tested to last at least twice as long compared to a standard spider bushing.

Spider bushings and grease seal rings

Luckcome also offers standard material spider bushings and grease seal rings. They are of the highest quality for long functional life. When changing your mantle, replacing the seals at the same time helps ensure proper performance and reduces unplanned stoppages.

Lube oil pumps

Many needed components like lube oil pumps, seals, filters and valves are available. These parts have a long history of quality performance, having been used for some classic crushers lube and hydraulic units. Luckcome used the same brand also as the original.

Pinion shaft housing parts

Luckcome offers quality service parts such as the pinion shafts, bearing covers, bearings and seals needed to keep your crusher operating smoothly. Complete housing assemblies without pinions are also offered for quick service work to minimize downtime.

Enhanced dust seal rings

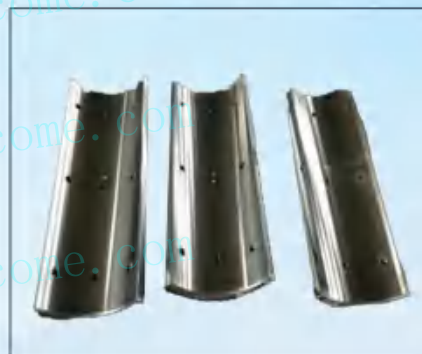

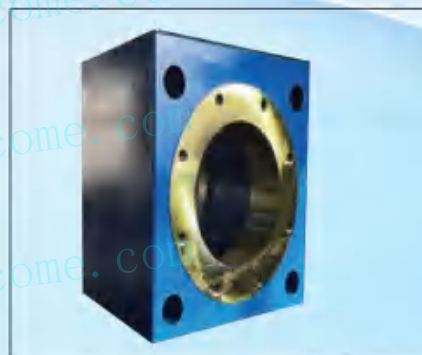

Our enhanced material has proven to outlast the OEM rings. Self-lubricating and solid rings in a strong exclusive wood material for best possible life-time and function.

Chevron packing

This seal ring keeps the hydraulic oil in place under the piston. Luckcome offers high quality chevron seals with the correct dimensions and materials needed for your crusher.

Premium components for pumps

Luckcome is a professional supplier of diaphragm pump, specialized in the pumping solutions. Our Parts are compatible with Geho®, Feluwa® and Wirth® pump, it is genuine alternative replacement, with optimized design and material. More uptime and easy maintenance is what we focus on, longer service life time is what we care about.

We hold huge stocks wear parts like impeller, volute liner, throat bushing, cover plate liner, frame plate liner, frame plate liner insert, shaft sleeve, expeller, expeller ring and bearing assembly etc.

All brand names, model names or marks are owned by their respective manufacturers. LUCKCOME has no affiliation with the original equipment manufacturer. These terms are used for identification purposes only and are not intended to indicate affiliation with or approval by the OEM. All parts are manufactured by, for and warranted by LUCKCOME and are not manufactured by, purchased from or warranted by the original equipment manufacturer.

Premium components for pumps

WARMAN®

Luckcome is a professional supplier of slurry pump, specialized in the pumping solutions. Our Parts are compatible with Warman® pump, it is genuine alternative replacement, with optimized design and material. More uptime and easy maintenance is what we focus on, longer service life time is what we care about.

We hold huge stocks wear parts like impeller, volute liner, throat bushing, cover plate liner, frame plate liner, frame plate liner insert, shaft sleeve, expeller, expeller ring and bearing assembly etc.

The customized solutions and life cycle services

By virtue of rich experience, Luckcome provides professional service for improving the reliability as well as productivity of users' production. It adds values for users through offering customized solutions and life cycle services.

◆ Periodic inspection

Our experience indicates that, mechanical and electrical failures usually affect the utilization and productivity of crushing equipment directly. Therefore, Luckcome's periodic inspection is conducive to reducing the occurrence of mechanical and electrical failures, and achieving users' production target in quality, quantity and time.

◆ Worn parts replacement

The service of worn parts replacement includes the delivery as well as replacement of worn parts, and inspection of equipment. Except for replacing worn parts safely and effectively, our professional technicians also can accurately evaluate the operation and wear parts condition of crushing equipment.

◆ Maintenance

The skilful technicians and advanced technology in our repair workshop will provide extensive maintenance service ranging from replacing bearings to renovating complete equipment.

◆ Training

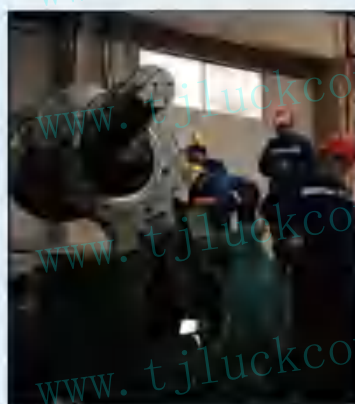

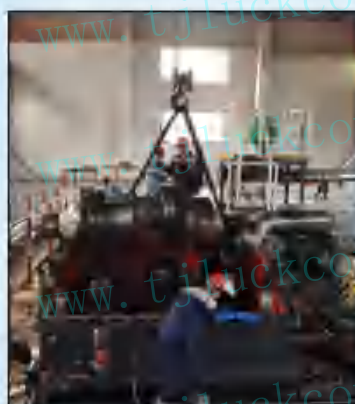

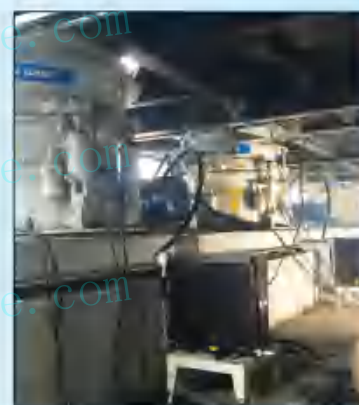

Luckcome's training service emphasizes on operation process, maintenance procedure and repair method of equipment so as to enable staffs of operation, maintenance and repair to fully master technical key points and keep normal operation of equipment.

◆ Process optimization and performance improvement

We help users select the best method for equipment operation and maintenance. In addition, Luckcome's experts can provide users with optimized suggestions, such as cavity modification and existing equipment upgrading. The purpose of performance improvement service is to help users achieve expected performance value and business target.

◆ Equipment operation

Luckcome also can provide equipment operation service. Our engineers will assist users in completing plan compilation, equipment monitoring, operation support, repair and maintenance on users' site.
