Production And Processing Services

泉州和森机械创立于1990年，专注于工程机械核心零部件的研发、精密锻造、生产销售及进出口贸易。公司布局福建泉州、三明两大生产基地，并设有广州运营分公司，总占地面积超过65000平方米，现有研发、管理及生产人员500余人，具备规模化、标准化生产与批量交付能力。公司主要产品涵盖工程机械“四轮一带”、高强度结构螺栓、精密耐磨销轴、锻造斗齿等核心零部件，产品广泛应用于国内主流工程机械机型及海外工程机械配件市场，并可提供来图、来样定制及非标产品开发服务，根据不同机型、安装尺寸及实际工况，为客户提供相应的产品配套方案。

公司持续完善精密制造与质量管理体系，已荣获国家高新技术企业、科技型中小企业、创新型中小企业，并通过IATF 16949:2016国际质量管理体系认证。通过引入CAXA PLM产品全生命周期管理系统与ERP数字化生产管理系统，将研发设计、原材料加工、锻造生产、机加工、质量检测、仓储及出货等环节纳入数字化管理，实现产品全过程的标准化管控与追溯，为客户提供尺寸稳定、批次一致、适用于批量配套的工程机械零部件。

历经三十余年的行业深耕，和森机械已建立研发、生产、定制、销售、售后及出口的完整服务体系，国内形成覆盖各省市的经销商及代理商网络，海外已布局十余个国家代理网点，产品远销全球三十多个国家和地区。公司面向工程机械主机厂、配件经销商、海外采购商及专业配件企业，提供标准产品供应、非标产品开发及批量定制服务，以稳定制造为基础，以质量体系为保障，持续为客户提供可靠的工程机械零部件配套。

Quanzhou Hesun Machinery was founded in 1990, specializing in the R&D, precision forging, production, sales and import-export trade of core construction machinery components. The company runs two major production bases in Quanzhou and Sanming, Fujian Province, together with an operational branch in Guangzhou. Boasting a total area of over 65,000 square meters and more than 500 employees engaged in R&D, management and production, it is capable of large-scale, standardized production and mass delivery. Its main products include construction machinery undercarriage parts ("four wheels and one track"), high-strength structural bolts, precision wear-resistant pin shafts, forged bucket teeth and other core components. Widely used for mainstream domestic construction machinery models and sold to overseas spare-parts markets, these products support custom and non-standard development based on customer drawings or samples, with tailored matching solutions provided in accordance with different machine models, installation dimensions and actual working conditions.

The company continuously improves its precision manufacturing and quality management systems. It has been certified as a National High-Tech Enterprise, Science-based Small-and-Medium-sized Enterprise and Innovative Small-and-Medium-sized Enterprise, and has passed the IATF 16949:2016 International Quality Management System Certification. With the introduction of the CAXA PLM Product Lifecycle Management System and ERP digital production management system, links covering R&D design, raw material processing, forging production, machining, quality inspection, warehousing and shipment are under digital management. Full-process standardized control and traceability are realized to supply construction machinery components featuring stable dimensions, consistent batch quality and great adaptability for mass supporting applications.

With more than 30 years of profound industry experience, Hesun Machinery has built a complete service system covering R&D, production, customization, sales, after-sales service and export. It has developed a nationwide network of distributors and agents across Chinese provinces and municipalities, set up agency outlets in over ten countries overseas, and its products are exported to more than 30 countries and regions around the world. Serving construction machinery OEMs, spare-parts distributors, overseas purchasers and professional component enterprises, the company offers standard product supply, non-standard product development and mass customization services. Based on stable manufacturing capacity and guaranteed quality management systems, Hesun Machinery keeps delivering reliable supporting components for construction machinery customers.

和森机械目前进入渠道精耕与网络营销升级阶段,通过互联网大数据和线下多元化销售渠道,以提高经营效率和实现新的跨越。
和森机械品牌代理及经销商网络覆盖全国各地及世界各区域拥有大批专业资深经销商。

At present, Hesen Machinery has entered the stage of channel intensive cultivation and network marketing upgrading. Through Internet big data and offline diversified sales channels, it can improve operating efficiency and achieve new leaps. Hesen Machinery has a network of agents and distributors covering various parts of the country and regions around the world, with a large number of professional and experienced dealers.
