COMPANY PROFILE

公司简介

安邦机械是以骨料生产、建筑用砂、城市建筑垃圾处理等综合配套设备加工为主的专业生产商。公司主要系列产品圆锥破碎机、制砂机、颚式破碎机、反击式破碎机的技术性能，均处于国内同类产品领先地位，并达到国际同类产品先进水平，广泛应用于矿山、水泥、公路、电力、冶金、煤炭等各个行业。公司多年来赢得了国内外客户的一致赞誉，是河南省的“名优企业”，公司现在云南、贵州、湖南、湖北、广东、四川等地设有办事处，产品远销美国、俄罗斯、哈萨克斯坦、塔吉克斯坦、巴西、阿根廷、越南、菲律宾、印度、巴基斯坦等多个国家。

安邦机械坚持以“务实创新，诚信为本，品质一流，服务一流”为企业的宗旨，以服务客户、满意客户、为客户设计最合适的生产方案为最终目标，秉承“精心设计，精良制作，精诚服务”的发展理念，与客户合作共赢，携手共进。“国富民安，济世经邦”，安邦人愿为实现中原崛起贡献我们的力量！

Vanguard Machinery is a professional manufacturer in the processing of aggregate materials production, construction sand and urban construction waste treatment. The technical performance of main products of cone crusher, sand making machine, jaw crusher and impact crusher are in the domestic leading position of similar products, and reached the international advanced level of similar products, widely used in mining, cement, roads, electricity, metallurgy, coal and other industries. Over the years, we have won unanimous praise from domestic and foreign customers. Now we have offices in Yunnan, Guizhou, Hunan, Hubei, Guangdong, Sichuan and other province. Our products are exported to the United States, Russia, Kazakhstan, Tajikistan, Brazil, Argentina, Vietnam, the Philippines, India, Pakistan and many other countries.

Vanguard Machinery adheres to the principle of "pragmatic innovation, honesty orientation, superior quality and excellent service", regards "serving customers, satisfying customers and designing the most suitable production plan for customers" as the ultimate goal, and sticks to the development philosophy of "exquisite design, meticulous manufacturing and sincere service" to get win-win cooperation and be hand in hand with customers. The nation is prosperous and the people will be strong. May we contribute to the prosperity of china economy development.

INNOVATIVE AND INTELLIGENT MANUFACTURING

创新智造

卓越的品质，是走向世界的桥梁。安邦机械对品质提升孜孜以求，以持续满足客户需求作为精益制造的源动力。从点到面、从细节到全局，从产品到管理，安邦机械始终坚持对完美的不懈追求，勇于超越自我，稳步提升品牌价值。

Excellent quality is a bridge to the world. VANGUARD Machinery strives for quality improvement and continues to meet customer needs as the source of lean manufacturing. From point to surface, from detail to overall situation, from product to management, VANGUARD Machinery has always adhered to the unremitting pursuit of perfection, has the courage to surpass itself, and steadily enhances brand value.

安邦机械拥有达5万多平方米的现代标准化厂房及业内顶尖的设备加工制造能力，公司拥有完善的配件铸造加工工厂。拥有现代化加工设备50多台，重点设备：6.3米立车、5米立车、数控立车，深孔钻、刨床等均为国内最好设备。

we have a modern standardized workshop of more than 50,000 square meters and top equipment processing and manufacturing capabilities in this field. We have a complete casting and processing factory for most of the spare parts. We possess more than 50 sets of modern processing equipment. Key equipment: 6.3 m vertical lathe, 5 m vertical lathe, CNC vertical lathe, deep hole drill, planer and so on, which are the best domestic processing equipment.

可靠的品质保障，强大的售后团队

Reliable quality assurance, strong after-sales team.

安邦机械始终以“合作共享共赢”为经营理念，严格遵循“质量第一、用户至上”的方针，我们关心客户的全方位需求，按照ISO9001标准实施全过程质量控制，保证所供设备是全新的、先进的、成熟的、完整的、安全可靠的，我们对每一道工序负责，对每一台产品负责、对每一位用户负责。

VANGUARD always adheres to the business philosophy of "cooperation, sharing and win-win", and strictly follows the policy of "quality first, customer first". We care about the all-round needs of customers, and implement full-process quality control in accordance with ISO9001 standards to ensure that the equipment supplied Brand new, advanced, mature, complete, safe and reliable. We are responsible for every process, every product, and every user.

INTERCONNECTING THE WORLD

联动全球

审图号：GS（2016）1667号

安邦机械是一家集破碎、制砂、移动式破碎站、EPC项目总包等多位一体的专业高端装备制造企业。

Vanguard Machinery is a professional high-end equipment manufacturing enterprise, which is professional for integrating crushing, sand making, mobile crushing plant, and EPC project general contracting.

75+ Global Cooperation Countries
全球合作国家

1000+ Worldwide Sales Of Equipment
全球合作客户

30000+ Worldwide Sales Of Equipment
全球销售设备

安邦机械目前的销售网络已覆盖全球75余个国家和地区，在“一带一路”沿线均有市场布局，产品远销东南亚、非洲、中东、南美、俄罗斯等高端市场。公司在东亚、东南亚、中亚等多个地区设有区域代理和分公司，安邦机械在扎实稳健的全球市场建设中，逐步构建形成了辐射1000多个国家和地区的销售网络，不断为全球客户提供售前、售中、售后等一站式、一体化的高效便捷服务。

The current sales network of Vanguard Machinery has covered more than 75 countries and regions around the world, and has a market layout along the "Belt and Road". Its products are exported to high-end markets such as Southeast Asia, Africa, the Middle East, South America, and Russia. Our company has regional agents and branches in East Asia, Southeast Asia, Central Asia and other regions. In the construction of a solid and stable global market, Vanguard Machinery has gradually formed a sales network radiating more than 1000 countries and regions. Customers provide one-stop, integrated, efficient and convenient pre-sale, on sale, and after sales service.

QUALITY SERVICE

品质服务

始终如一的卓越品质：为客户提供量身定制的产品解决方案，卓越的品质是走向世界的桥梁。

安邦机械“7×24小时全天候服务承诺”从服务效率、服务速度、维护成本、质量标准建立涵盖设备全生命周期的闭合矩阵，将客户购机前到设备购置中及设备运营后各服务行为整合成一条以客户需求为导向的价值链条，让您全程无忧，享受最大的附加值；无论您在哪里，我们将以实力和专注为您的选择保驾护航。

Consistent excellent quality: To provide customers with tailor-made product solutions, excellent quality is the bridge to the world.

VANGUARD Machinery's "7×24 hours service commitment" establishes a closed matrix covering the entire life cycle of equipment from service efficiency, service speed, maintenance cost, and quality standards, and takes customers from before purchase to equipment purchase and after equipment operation. Integrate into a customer demand-oriented value chain, allowing the customers to worry-free and enjoy the greatest added value; no matter where you are, we will escort your choice with strength and focus.

6CX系列欧版颚式破碎机

6CX SERIES EUROPEAN TYPE JAW CRUSHER

产品简介

INTRODUCTION

6CX系列颚式破碎机是采用国际上最先进的破碎技术和研究成果，在几十年的颚式破碎机设计制造经验的基础上，采用有限元分析方法成功开发的新一代产品该系列产品具有世界先进水平。

与传统的颚式破碎机相比，6CX系列颚式破碎机在设计和制造方面对细节更为重视，采用高强度材料及先进的制造工艺具有结构强度更高、设备可靠性更高、破碎比更大、产量更高综合加工成本更低等优势。

6CX series Jaw Crusher has adopted world' s most advanced crushing technology and research achievement. It is the new crushers with the world' s advanced level, which are successfully developed by using finite element analysis method based on years' experience on jaw crusher design and manufacture.

Compared with traditional jaw crusher, 6CX series Jaw Crushers pay more attention to the details of design and manufacture. Adopt high-strength material first-class manufacturing process, and the 6CX series Jaw Crushers provide the advantages of excellent strength structure reliable equipment, higher crushing ratio, larger capacity and lower cost.

产品优势

PRODUCT ADVANTAGES

破碎机采用“V形”破碎腔设计，破碎腔结构和动颚运动轨迹参数优化配置，超大的行程，使得进料粒度、产量和破碎比实现了最大化。

The crusher possesses V structure chamber, optimum configuration crushing chamber and trajectory parameters of moving jaw. The super-large crushing stroke maximizes the feeding size, capacity and crushing ratio.

采用弹性限位块和橡胶减震装置替代原刚性地脚联接，有效的吸收震动峰值载荷，从而降低破碎机与基础之间的相互冲击，提高设备使用寿命。

Replacing the original rigid foot connection with elastic limit block and rubber damping device which effectively absorbs peak load of vibration, so as to reduce the impact force between crusher and foundation and prolong the equipment service life .

采用楔块调整取代传统的垫板式排料口调整，使排料口调整实现无极调节操作更简单。

Replacing traditional plates with wedges, the discharge opening can be adjusted more simply.

一体化的电机座设计，减小了设备安装空间的同时，让动力输出更稳定。超大型号的圆锥滚子轴承，内外轴承型号统一，减小了备品备件的数量。

Integrative motor cabinet reduces mounting space and makes the power output more stable. Oversized tapered roller bearing with uniform internal and external bearing models reduces the number of spare parts.

PE/PEX颞式破碎机

PE/PEX JAW CRUSHER

产品简介

INTRODUCTION

该系列产品采用铸钢机架和动颞，强度高，寿命长。具有破碎比大、产品粒度均匀、结构简单、工作可靠、维修简便、运营费用低等特点。

广范应用于矿山、冶炼、建材、公路、铁路、水利和化学工业等众多部门，破碎抗压强度不超过320兆帕的各种物料PE系列用于粗破，PEX系列用于中细破。

This series product adopts cast steel rack and swing jaw which has high strength and long life. Medium and large scale jaw crusher designed by VANGUARD has world-class capacity with many characters like big crushing ratio, uniform particle size, simple structure, reliable working performance easy maintenance, low operation cost and so on. This jaw crusher could be widely used in mining, smelting building material, highway, railway water conservancy and chemical industries, which can crush varieties of materials with a compressive strength no more than 320MPa. The PE series is used for coarse crushing while PEX series for medium and fine crushing.

6FX欧版液压反击式破碎机

6FX SERIES HYDRAULIC IMPACT CRUSHER

产品简介

INTRODUCTION

为了满足用户对高收益、低成本、节能降耗的需求，针对传统破碎设备操作繁琐、效率低等问题，我公司根据多年来实地工程经验和用户反馈，结合研发成果开发出新一代高效粗、中细碎破碎机——6FX欧版液压反击式破碎机。

该系列产品广泛应用于水电、高速公路人工砂石骨料的破碎作业，能够在粗破、中破和废物循环利用等应用中提供满意的服务。

In order to meet the users’ needs for high income, low cost, energy saving and consumption reduction and solve the problems of cumbersome operation and low efficiency of traditional crushing equipment, Vanguard Machinery has developed a new generation of high efficiency crusher—6FX European type hydraulic impact crusher, which is based on the years of field engineering experience and users’ feedback combined with the latest research and development results.

This series of products are widely used in the crushing operation of artificial sand aggregate for hydropower and expressway, which can provide satisfactory service in coarse and medium crushing and waste recycling applications.

CI6X系列反击式破碎机

CI6X SERIES IMPACT CRUSHER

CI6X系列反击式破碎机，为满足客户对高获利、低成本、节能降耗的需求而全新设计，是大处理量破碎生产线中粗碎和中碎的理想选择。大转动惯量高精度转子、多功能全液压操作系统、渐开线型高效破碎腔等科研成果的整合应用以及关键部件耐磨材料的选择，赋予了该设备更高的破碎效率、更简单的维护操作、更可靠的性能。

The CI6X series impact crusher is newly designed to meet customer needs for high profitability, low cost, energy saving and consumption reduction. It is ideal for coarse and medium crushing in large-capacity crushing production lines. The integrated application of scientific research results such as the large moment of inertia and high-precision rotor, the multi-functional fully hydraulic operating system, the involute-type high-efficiency crushing cavity, and the selection of wear-resistant materials for key components give the equipment higher crushing efficiency, simpler maintenance operation and more reliable performance.

- 渐开线型腔型设计使物料垂直击打到反击板上，物料在板锤作用区内向入料口方向返料，增加击打次数，破碎效率得到显著提升，出料粒型更好。
- 重型转子采用整体焊接工艺，精度高，抗冲击能力强，减少运行过程中的电流波动。转子下机架与轴承座的贴合面采用整体加工工艺，确保加工精度。
- 多功能全液压操作系统，实现了全液压调整排料粒度、全液压开顶调换易损件。衬板采用高强度螺栓固定，可从外部直接更换，减少更换衬板的人力与时间成本。

The involute cavity design allows the material to hit the impact plate vertically, and the material returns to the material inlet in the plate hammer action area, increasing the number of hits, significantly improving the crushing efficiency, and providing a better discharge particle shape.

The heavy-duty rotor adopts an integral welding process, which has high precision and strong impact resistance, reducing current fluctuations during operation. The joint surface between the rotor lower frame and the bearing seat adopts an integral processing technology to ensure processing accuracy.

The multi-functional fully hydraulic operating system realizes fully hydraulic adjustment of discharge granularity and fully hydraulic opening of the top to replace wearing parts. The liner is fixed with high-strength bolts and can be directly replaced from the outside, reducing the labor and time costs of replacing the liner.

LF系列反击式破碎机

LF SERIES IMPACT CRUSHER

LF系列反击式破碎机可实现粗碎和中细碎转换，一机两用。适用于对抗强度不超过350兆帕的各种物料（花岗岩、石灰石、混凝土等），进行粗碎，中碎，细碎等作业，广泛用于矿山、建筑、化工、电力、冶金等行业。

The LF series impact crusher can realize the conversion of coarse crushing and medium fine crushing. It is suitable for all kinds of materials (granite, limestone, concrete, etc.) with strength not more than 350 MPa. And it can realize coarse crushing, medium crushing and fine crushing, widely used in mining, construction, chemical industry, electric power, metallurgy and other industries.

- 1、维修吊臂 Maintenance Boom
- 2、液压起顶装置 Hydraulic Lifting Device
- 3、反击架 Impact Rack
- 4、边衬板 Side Liner
- 5、反击衬板 Impact Liner
- 6、重型转子 Heavy Rotor
- 7、板锤 lat Hammer
- 8、板锤固定装置 Flat Hammer Fixing Device
- 9、转子轴 Rotor shaft
- 10、机架 Frame
- 11、液压启闭 Hydraulic Opening and Closing
- 12、皮带轮 Pulley

粒度曲线图 Indicative Gradation Curves

- 1、通过对反击架安装位置调整，可以实现粗碎和中细碎转换，一机两用；

2、进料口更大，粗碎时可当初破使用，最大进料至1000mm；

3、破碎建筑垃圾时，能有效防止钢筋缠绕；
1. By adjusting the installation position of the reaction frame, the conversion of coarse crushing and medium and fine crushing can be realized;

2. The feeding inlet is larger. It can be used as primary crusher when coarse crushing is needed, and the maximum feeding size can be up to 1000mm;

3. When process construction waste, it can effectively prevent the steel bar from winding.

性能参数表 / Technical Specification

型号 Model	进料口尺寸 Feeding Size (mm)	最大进料边长 Product Particle Size (mm)	处理能力 Capacity (t/h)	功率 Power (kw)	重量 Weight (kg)

PF/PFV系列反击式破碎机

PF/PFV SERIES IMPACT CRUSHER

产品简介

INTRODUCTION

该系列反击破分为：二腔PF和三腔PFV两个系列，能处理边长不超过500mm、抗压强度不超过250MPa的各种粗、中、细物料（花岗岩、石灰石、混凝土等）。工作时，在电机带动下，转子高速旋转，物料进入后与转子上的钹锤撞击破碎，然后被反击到衬板上再次破碎，最后经出料口排出。

There are two types of impact crusher: two-chamber PF and three-chamber PFV crusher. Dealing with the material with the side length below 500mm not more than 250MPa anti-pressure strength, impact crusher can be widely used in crushing the coarse, medium and fine material (E.g. granite, limestone concrete). During the process of operating, the rotor at highspeed will be brought along by the electric motor. The material will be impacted by the flat hammer to be crushed, and then be countered to the liner for the second crushing, then be discharged through the discharge opening.

PCZ重型锤式破碎机

PCZ HEAVY-DUTY HAMMER CRUSHER

产品简介

INTRODUCTION

该型号重型锤式破碎机与PC锤式破碎机相比，破碎物料更有针对性，专注于石灰石破碎，成品料粒型优，级配合理；在产量上突破时产1200吨的局限，新型重型锤式破碎机时产量可达3000吨，是目前大产量的破碎机型号。

Compared with the PC hammer crusher, this type of heavy hammer crusher has more targeted crushing materials, which is focused on limestone crushing with excellent particle shape and reasonable gradation. The heavy-duty hammer crusher has an output of up to 3000 tons, breaks through the limitation of 1200 tons per hour in output, which is the current large-capacity crusher model.

重型锤式破碎机可破碎抗压强度不低于280Mpa和含钙量高于40%的石灰石等各种硬度和脆性物料，可以直接将粒度为600-1200mm的物料一次性破碎至25mm以下的粗料。

The heavy hammer crusher can crush various hardness and brittle materials such as limestone with a compressive strength of not less than 280Mpa and a calcium content of more than 40%. It can directly crush materials with a particle size of 600-1200mm into coarse materials below 25mm at one time.

CS/CH系列单缸液压圆锥破碎机

CS/CH SERIES SINGLE-CYLINDER CONE CRUSHER

可靠性更高

1.机架经过重型化设计，采用一流钢材；2.衬板采用优质高锰钢复合材料，更耐磨；3.采用超大直径主轴，更加坚固耐用。

生产成本更低

我公司根据（破碎腔型）设计经验及配合先进的冶金技术，使破碎设备的单位钢磨损耗降至更低选配自动化控制系统，使破碎机在运行过程中满腔给料、自动补偿齿板间隙，提高破碎设备的工作效率，从而保证单位生产成本降至更低。

适用性更广

该系列圆锥破碎机有更大的给料口，可以发挥出最大性能以适应各种破碎工艺，广泛应用于中碎到超细碎、以及固定式到移动式破碎站。优化设计的破碎速度、偏心距（冲程）和腔型设计完美结合能够提供更高的产量和更优的产品质量。

HIGHER RELIABILITY

- 1. Heavy duty designed main frame with first class steel;
- 2. High manganese composite material liner, more hard-wearing
- 3. Huge diameter main shaft, more sturdy and durable

LESS PRODUCTION COST

Vanguard has long time experience and advanced metallurgy technology in crusher cavity, that can reduce the crusher unit wearing. The optional automatic control system help to feed fully and to adjust the liner gap automatically during the crusher running, and improved the crusher working efficiency, then the unit production cost will be much less.

WIDER APPLICATION

This series cone crusher has bigger feeding port size, then it is suitable for various crushing plant for optimal performance, and widely used in medium and superfine crushing, stationary and mobile crushing plant. Improved crushing speed, eccentric arm (stroke) and cavity design can bring the higher capacity and better products.

CP系列多缸液压圆锥破碎机

CP SERIES MULTI-CYLINDER HYDRAULIC CONE CRUSHER

CP系列多缸圆锥破是我公司结合丰富的现场经验，以及对新技术、新材料的探索，开发成功的新一代多缸液压圆锥破碎机，一直以来，CP系列圆锥破碎机以其优秀的现场表现和高效的生产能力不断帮助客户实现需求，获得价值。

CP series multi-cylinder cone crusher is a new generation of multi-cylinder hydraulic cone crusher developed by our company combining rich field experience and exploration of new technologies and new materials. It has always been known for its excellent performance and efficient production capabilities and constantly helps customers meet their needs and get profit.

上述生产能力是破碎物料密度为1.6T/m³时闭路生产线总吨数。生产能力与破碎物料的物理性能,给料方式、进料粒度、及其组成等工况有关，实际产能因不同条件可能有误差

The above capacity is based on 1.6T/m³ material density under open circular crushing plant.The capacity is related to physical properties of the crushing material, feeding size and its composition, and the actual capacity may be different due to different condition

CSV系列复合圆锥破碎机

CSV SERIES COMPOUND CONE CRUSHER

1. 结构简单，运转平稳，性能稳定，产量同类领先；
2. 机架采用CO₂保护焊接，并经退火处理，坚固耐用；
3. 各易磨损部位均采用锰钢件保护，延长整机寿命；
4. 弹簧锁紧装置使破碎力稳定，并提供过铁释放保护；
5. 液压清腔油缸能快速移除破碎腔内集料和不易破碎物，使维护时间大大缩短；
6. 液压调整排料口，方便快捷，调整准确；
7. 迷宫式防尘圈密封，保证润滑油清洁；
8. 动定齿板安装面经过精加工，不用填料，更换简单迅速；
9. 润滑系统设有回油及温度保护装置，并与主电机连锁，保护主机不被损坏。

1. Simple structure, smooth operation, stable performance and leading output among similar products;
2. After adopting CO₂ protection welding treatment, a machine frame is tight and durable;
3. All easily worn parts adopt high manganese steel, to prolong the service life of mainframe;
4. A spring locking device can provide stable crushing force and excessive iron release protection;
5. A hydro-cylinder for chamber clean can quickly remove aggregates and not-easily crushed materials, to greatly shorten maintenance time.
6. A material-discharging port is hydraulically adjusted, so that the adjustment is convenient, quick and accurate;
7. A labyrinth type dust proof ring is used for sealing to ensure clean lubricating oil deam;
8. The mounting faces of moving and static gear plates both are subjected to inish achining, and fillers are not used, so their replacements are convenient and quick;
9. A lubricating system is provided with an oil return and temperature protection device, and interlocked with a main motor, so that the main motor is protected from damage.

VSI系列立轴冲击式破碎机

VSI SERIES VERTICAL SHAFT IMPACT CRUSHER

产品简介

INTRODUCTION

VSI系列立轴式冲击破碎机将独特的转子设计与有效精确控制的旁路给料系统的完美结合，这种结合大大提高了生产能力和产品质量。而且降低了生产成本和磨损件的消耗。

转子的双重抛料组合最大程度的延长磨损时间和保护转子主体不会因过度磨损而损坏，二次溢料系统搭配不同的转速，能够完整的控制粒型和出料的粒度分布。

The VSI series vertical shaft impact crusher perfectly combines the special rotor design with the effectively and accurately controlled bypass feeding system together, which increase the capacity and quality, and reduces cost and wear parts consumption. As the optimized design for wearing parts, the VSI series vertical shaft impact crusher is very convenient to maintain and few time to replace the spare parts. The perfect combination of automatic control and manual control system reduces to minimum work load of equipment maintenance.

The rotor’ s double-layer throwing combination mostly furthest extend the wearing term, and protects the rotor body well. The different rotor speed in twice overflow system could control the aggregates shape and size distribution perfectly.

VSI系列立轴式冲击破碎机是精确制造跟优良设计的完美结合。辅助PLC控制系统，达到人机界面的简便操作，降低了使用中的操作难度和操作人员的培训时间.

VSI series vertical shaft impact crusher is the perfect match of accurate manufacturing and good design. It can achieve the man-machine interface’ s easy operation with the PLC control system assistant, then reduces the operation difficulty and training time of operators.

5X系列制砂机

5X SERIES VERTICAL SHAFT IMPACT CRUSHER

产品简介

INTRODUCTION

5X系列新型制砂机（离心冲击破碎机）广泛应用于各种金属和非金属矿、水泥、耐火材料、磨料、玻璃原料、建筑骨料，机制砂、冶金等行业。适用中细碎不同硬度的各种矿石和岩石，如铁矿石、有色金属矿石、金刚砂、铝矾土、石英砂、棕刚玉、珍珠岩、玄武岩等高硬度物料的中细碎作业。

5X series new sand making machine (centrifugal impact crusher) is widely used in various kinds of metal and non-metallic ores, cement, refractory matter, abrasives, glass raw materials, construction aggregate, machine-made sand, metallurgy and other industries. It is suitable for medium and fine crushing all kinds of ores and rocks with different hardness, such as iron ore, non-ferrous metal ore, corundum, bauxite, quartz sand, brown aluminum oxide, perlite, basalt and other high hardness materials.

6X系列制砂机

6X SERIES VERTICAL SHAFT IMPACT CRUSHER

产品简介

INTRODUCTION

6X系列立轴冲击式破碎机是吸收多年的研发经验和技術理念，采用全新四口叶轮设计结构和特殊密封结构防止轴承筒漏油等工艺，拥有多项国家专利技术的新型制砂破碎设备，具有节能、使用寿命长、应用广泛等特点，助力大砂场逐步向规模化、集中化生产迈进，以满足国家对环保及产能的要求。

6X series vertical shaft impact crusher is a new type of sand making and crushing equipment with many national patent technologies, absorbing many years of research and development experience and technical concept. It features new four-opening impeller design and special sealing structure to prevent oil leakage of bearing barrel, etc. And it has the characteristics of energy saving, long service life and wide application, and helps the large sand field gradually move towards large-scale and centralized production to meet the national requirements for environmental protection and production capacity.

产品优势

PRODUCT ADVANTAGES

关键部件性能提升 Performance improvement of key components

关键部件如叶轮、轴承筒、机体下部等全新设计：叶轮采用四口设计，提高物料通过量与物料间的撞击概率；轴承筒采用独特排风防尘装置和密封结构，防止粉尘进入造成下轴承盖漏油；机体下部由“井”字结构改为“十”字结构，防止物料堵塞排料通道。

Key components such as the impeller, bearing barrel, and the lower body are newly designed: the impeller adopts a four-port design to increase the probability of material throughput and the collision between materials; the bearing barrel uses a unique exhaust and dust-proof device and sealing structure to prevent dust from entering the lower bearing The cover leaks oil; the lower body is changed from a well structure to a cross structure to prevent materials from blocking the discharge channel.

破碎模式快速转换 Quick change of crushing mode

优化破碎腔结构，可以实现石打石与石打铁两种破碎模式的快速转换。“石打石”增加料层隔板，可形成密实稳定的石料层，即使是对抗中高硬度石料，仍可获得更多立方体成品料；“石打铁”优化反击块安装角度，减少能量损耗，获得更高破碎比。

Optimize the structure of the crushing cavity, which can realize the rapid conversion of the two crushing modes of crush between stones and crush between stone and impact plate. The crush between stones mode adds material layer partitions to form a dense and stable stone layer. Even if it is against medium and high-hardness stones, more cubic finished materials can still be obtained. The crush between stone and impact plate mode optimizes the installation angle of the impact block, reduces energy loss and obtains a higher crushing ratio.

智能控制的稀油润滑 Intelligently controlled thin oil lubrication

采用稀油润滑并配备风冷系统，由PLC和智能仪表控制，可实现全自动润滑控制，润滑温度可调控，为轴承工作提供更理想的工作条件。It adopts thin oil lubrication and is equipped with an air-cooled system. It is controlled by PLC and intelligent instruments, which can realize automatic lubrication control, and the lubrication temperature can be adjusted to provide more ideal working conditions for the bearing.

VP系列轮胎式移动破碎站

VP SERIES MOBILE CRUSHER

VP系列移动式破碎站主要用于冶金、化工、建材、水电等经常需要搬迁作业的物料加工，特别是用于高速公路、铁路、水电工程等流动性石料的作业，用户可根据加工原料的种类，规模和成品物料要求的不同采用多种配置形式。

本移动式破碎筛分成套设备包括初级破碎站和二级破碎筛分站、胶带输送机等组成，各级破碎站均是一个独立的工作单元，能各自完成其承担的不同职责，胶带输送机负责各破碎站间的物料传送及堆垛。移动式破碎筛分站品种齐全，规格系列化移动式破碎筛分站选择余地大，能满足广大用户的需要。

VP series mobile crusher plant is mainly used in metallurgy, chemistry, building materials, hydro power etc., often be moved material processing in particular used in freeway, railway, hydro power engineering etc. liquidity stone processing. The user can adopt various configuration forms according to be crushed raw material type, production capacity and finished material requirements.

The mobile crushing and screening complete equipment includes a primary crusher plant and secondary crushing screening plant, glue-belt conveyor. Every crushing plant is an independent working unit, can assume their own different functions The glue-belt conveyor is used for material conveying and stacking among the crushing plant. mobile crushing and screening plant has complete types and specifications serialization. So mobile crushing and screening plant is more options and can meet the different needs of users.

与固定生产线相比，轮胎式系列移动破碎站工程周期短、转场跟进快，不仅降低了投资者的投资风险、机会成本，还避免了项目结束后的拆建工作，更经济环保，可广泛应用于露天采矿、建筑垃圾破碎、城市道路建设、混凝土骨料再利用等方面。

Compared with the stationary production line, the tire type mobile crushing station has features of short engineering cycle and fast follow-up, which not only reduces the investment risk and opportunity costs of investors, but also avoids the demolition work after the project is completed, which is more economical and environmentally friendly. This series mobile crusher is widely used in open pit mining, construction waste, urban road construction, concrete aggregate recycling field .

VP系列移动轮胎式破碎站的卓越性能

THE EXCELLENT PERFORMANCE OF VP SERIES MOBILE CRUSHER

自载式皮带输送机

Self-loading Belt Conveyor

可伸缩型自载皮带输送机，加长机组更能直接将破碎的物料送入特定的转运皮带输送机。

The retractable self-loading belt conveyor and the extended unit can directly deliver the material to a specific transfer belt conveyor.

优质加厚钢架结构

High Quality Thick Steel Frame Structure

采用优质加厚型钢架结构，保护移动破碎站平稳运转，延长设备使用寿命！

It Adopted high-quality thick steel frame structure to protect the mobile crushing plant running smoothly and prolong the service life of the equipment.

配备高性能除铁器

Equipped with High Performance Iron Remover

采用高性能悬挂式除铁器，能够有效去除物料中的杂质，提高处理能力。

It adopted the high-performance suspended iron remover to effectively remove impurities from materials and improve processing capacity.

机组空间布局紧凑合理

Compact and Reasonable Unit Layout

与破碎机一体化的给料机、皮带机、振动筛，最大限度的优化了设施配置在场地驻扎的空间，拓展了物料堆垛、转运的空间。

The feeder, belt conveyor and vibrating screen integrated with the crusher optimize the space where the facilities are arranged in the site, and expand the space for material stacking and transportation.

可伸缩调控支腿

The Retractable Leg

车体支腿可根据地面高低随意伸缩，保证机器运作时，稳固车体，延长设备使用寿命！

The vehicle legs can be freely retractable according to the height of the ground to ensure the stability of the body and extend the life of the machine when the machine is in operation.

定制整体车载底盘

Customized Overall Vehicle Chassis

车载地盘高，转弯半径小，便于普通公路行驶，更便于在破碎场区崎岖恶劣的道路环境中行驶。

The high vehicle chassis and the small turning radius which is not only convenient for ordinary roads but also for driving in the rugged road environment of the crushing field.

VP系列移动破碎站配置的6CX系列、6FX系列、CP系列等系列破碎机，具有高破碎效率，多功能性、轻巧合理的结构设计、卓越的破碎性能等优势。最大范围的满足粗、中、细物料破碎筛分要求，不仅技术成熟，操作维修简便易行，而且对运输量、物料粒度和磨蚀性均具有良好的适应性和安全可靠，为广广大中外新老客户树立了良好的质量信誉。

The 6CX, 6FX and CP series crushers of the VP series mobile crushing plant have the advantages of high crushing efficiency, versatility, light and reasonable structural design and excellent crushing performance. The largest range meets the requirements of crushing and screening of coarse, medium and fine materials. It is not only mature in technology, easy to operate and maintain, but also has good adaptability, safety and reliability to transportation volume, material size and abrasion which established a good quality reputation to new and regular customers.

智能一体化控制系统

Intelligent Integrated Control System

用户友好型控制面板，配备一键按序启动便于操作。

User-friendly control panel with one-click start-up for easy operation.

初级破碎筛分站

PRIMARY MOBILE CRUSHING PLANT

VPE移动式破碎站车体采用先进的船型设计，整体结构更坚固，运行更稳定。主破碎设备采用6CX颚式破碎机，与传统鄂破相比，可以在粗碎细碎间灵活切换，破碎比大幅提高，是目前破碎设备领域先进、性价比高的破碎设备。

VPE mobile crushing station adopts advanced ship design, the overall structure is stronger, and the operation is more stable. The main crushing equipment adopts the 6CX jaw crusher. Compared with the traditional jaw crusher, it can be flexibly switched between coarse and fine crushing, and the crushing ratio is greatly improved. It is currently the most advanced and cost-effective crushing equipment in the field of crushing equipment.

二级破碎筛分站

SECONDARY MOBILE CRUSHING PLANT

振动筛具有液压升降功能，操作简便，也可根据用户需要灵活配备2到4层筛。
The vibrating screen has a hydraulic lifting function, which is easy to operate and can be flexibly equipped with 2 to 4 layers of screen according to user needs.

高效、中细强力破碎，专业针对高硬度物料。
High efficiency, medium and fine crushing, professional for high hardness material.

专配的支腿液压升降，有效降低工作量。
Specially equipped hydraulic lifting legs can effectively reducing the workload.

一体化移动站

COMBINED MOBILE CRUSHING PLANT

破碎机转子线速度可调，可实现精准的成品细化。
The crusher rotor linear speed is adjustable for precise product refinement.

大处理量，细碎整形、高效、经济，适应性强，破碎筛分处理。
High capacity, fine crushing and shape adjusting, high performance, flexible, integral crushing&screening.

移动式制砂生产线

履带式移动破碎站系列产品

CRAWLER TYPE MOBILE CRUSHING PLANT

安邦机械履带式移动破碎站是一种高效率的破碎设备，采用自行驱动方式，技术先进，功能齐全。在任何地形条件下，此设备均可达到工作场地的任意位置。这样可以减少对物料的处理操作，并且方便全部辅助机械设备的协调。履带式移动破碎站破碎比大，其优化设计可满足破碎机最需要的技术特点，生产率高，成品粒度均匀一致。

Vanguard Machinery Crawler Mobile Crushing Plant is a high-efficiency crushing device, which adopts self-driving method, advanced technology and complete functions. This equipment can reach any position on the work site under any terrain conditions. This reduces the handling of the material and facilitates the coordination of all auxiliary machinery. The crawler type mobile crushing plant has a large crushing ratio, high productivity and uniform particle size, and its optimized design can meet the most needed technical characteristics by the crusher, which has higher production efficiency and evenly same size final products .

THE TECHNICAL ADVANTAGES OF CRAWLER TYPE MOBILE CRUSHING PLANT:

履带式移动破碎站技术亮点：

01 ■ 适合狭窄作业
More suitable for narrow zone conditions.

履带式移动破碎站产品具有适应性强，体积小、特别适合狭窄场地工作；可以单机组独立作业，可以爬坡作业，上山进城不在话下，满足矿山、水电站、煤矿等工程破碎要求。使用起来灵活方便。

Crawler type mobile crushing plant has strong adaptability and small size, suitable for working in narrow areas.It can be operated independently by a single unit, can be operated on the slope, no matter in urban areas or mountainous areas, can ensure excellent working condition.It can be flexible and convenient to meet the requirements of hydropower stations, mines, coal mines and other different kinds of crushing project.

02 ■ 一体化组合设计
Integrated combination design

采用智能化、集成化、模块化配置，现场通过性极强。通过工艺流程的优化使其具有优秀的岩石破碎、骨料生产、露天采矿的破碎作业性能。可通过不同机型的联合，组成一条强大的破碎作业流水线，完成多需求的加工作业。

The intellectualization, modularization and integration of Crawler type mobile crushing plant ensure that it has a strong passability in the construction site. After special optimization treatment, now it has more excellent rock crushing, aggregate production, open-pit mining crushing performance. According to different requirements, different models can be combined with each other to form a strong crushing line.

03 ■ 个性化定制
Personal custom service

可针对客户对流程中的物料类型、产品要求，配置的颚破系列、圆锥破系列、反击破系列、制砂机系列破碎机，提供更加灵活的工艺方案配置，满足用户移动破碎、移动筛分等各种要求。

According to the customer's requirements on the material type and product characteristics, it can be combined with different equipment such as jaw crusher, cone crusher, impact crusher, , vertical shaft impact crusher etc.The design of the process scheme is more flexible, which can better meet customers' different requirements.

履带式颚破移动破碎站

CRAWLER TYPE MOBILE JAW CRUSHING PLANT

安邦机械履带式颚破移动站，适用于所有天然石料的粗碎处理。设备采用履带式车用底盘，全液压驱动，配备大破碎比颚破和给料机，皮带机等辅助设备，形成一体化成组作业方式。一站式解决物料的粗碎问题。

Vanguard Machinery crawler-type mobile jaw crusher plant is suitable for all-natural stones coarse crushing. It adopts crawler-type vehicle chassis, fully hydraulic drive, equipped with large reduction ratio jaw crusher, feeder, belt conveyor, and other auxiliary equipment, forming an integrated group operation mode, a one-stop solution to the problem of materials coarse crushing.

专业砂石骨料、建筑垃圾处理、EPC项目总包全套设备及解决方案专家

履带式圆锥破移动破碎站

CRAWLER TYPE MOBILE CONE CRUSHING PLANT

安邦机械履带多缸圆锥式破碎设备，适用于中高硬度、高磨蚀性天然石料及矿料的破碎加工等。该设备集机械、液压、电气、自动化等技术一体，具有破碎效率高，生产成本低，维护调整方便，破碎产品粒型优异等多项优点。主要用于金属矿山、建筑砂石加工中的二段破碎和三段破碎环节，设备不惧狭窄地形及恶劣环境，是当今矿山建筑行业 and 金属矿山行业最新一代产品。

Vanguard Machinery crawler type multi-cylinder cone crushing plant is suitable for medium to high hardness and high abrasive natural stones and mineral materials crushing and processing. It integrates mechanical, hydraulic, electrical, automation, and other technologies, and it has many advantages such as high crushing efficiency, low production cost, convenient maintenance and adjustment, and excellent crushing product size. It is mainly used in secondary and tertiary crushing in metal mines and construction sand and stone processing. It is not afraid of narrow terrain and harsh environments, and it is the latest generation of products in the mining construction industry and metal mining industry.

特点和优势

破碎主机高效耐磨

配备有性能卓越的适宜中细碎的圆锥破碎机，特殊的破碎壁和轧臼壁设计，辅以曲线腔型和液压清腔系统，提升破碎效率、有效降低易操作损耗。

自动破碎控制系统

采用全自动破碎控制系统，快速响应过铁（过载）自动释放复位保护，无线遥控操作，可减少设备操作人员，确保生产连续、稳定、高效。

智能给料控制系统

配置PLC控制系统，保持满腔持续给料，配置合理，工艺流畅，生产效率高，产品粒形好，最终产品呈优质立方体。

可快速转场作业

采用智能化、模块化配置，现场通过性强，紧凑型设计方便转场和运输，可快速适应山地等狭窄复杂施工环境。

Features and advantages

Crushing host is efficient and wear-resistant

Equipped with a cone crusher with excellent performance suitable for medium and fine crushing, special crushing wall and concave design, supplemented by curved cavity and hydraulic cavity clearing system, improve the crushing efficiency and effectively reduce the easy operation loss.

Automatic crushing control system

It adopts a fully automatic crushing control system, which quickly responds to iron (overload) and automatically releases reset protection to ensure continuous, stable, and efficient production.

Intelligent feeding control system

It is equipped with a PLC control system to keep full cavity continuous feeding, reasonable configuration, a smooth process, high production efficiency, good product shape, and the final product is a high-quality cube.

Can quickly transfer operation

It adopts an intelligent and modular configuration with a strong on-site passability and compact design for convenient transfer and transportation. It can quickly adapt to narrow and complex construction environments such as mountains.

1

大偏心距、高摆频及层压缩破碎，使设备产量高，破碎比大，粒型好。

Large eccentricity, high swing frequency, and layer compression crushing make the equipment has a high capacity, large reduction ratio, and a good grain shape.

2

定轴式设计，主轴强度大，可承载更大的破碎力。

Fixed-shaft design, the strong main shaft can bear greater crushing force.

3

先进的液压保护装置，可对设备进行有效的保护和监控。

Advanced hydraulic protection devices can effectively protect and monitor the equipment.

4

偏心衬套具有多种配置，可适用于不同的应用。

The eccentric bushing has a variety of configurations and can be applied to different applications.

履带式反击破移动破碎站

CRAWLER TYPE MOBILE IMPACT CRUSHING PLANT

安邦机械履带反击式破碎设备，适用于中软硬度的天然石料以及建筑垃圾的再加工等。该设备配备液压反击式破碎机，不仅具有破碎产量高，成本低，通用性高，成品粒度可调的优势；还可以保证成品优异的粒型及成品清洁度，满足建筑骨料的高标准要求。该设备加配振动筛，可一站式实现物料的破碎、筛分工作。也可以与其他设备结合，机动高效的完成物料的破碎、筛分工作。

Vanguard Machinery crawler-type mobile impact crusher is suitable for the re-processing of medium-soft and hard natural stones and construction waste. It is equipped with a hydraulic impact crusher, which not only has the advantages of high crushing capacity, low cost, high versatility, and adjustable particle size of the finished product. It can also ensure the excellent particle size and cleanliness of the finished product and meet the high standards of construction aggregates. It is equipped with a vibrating screen, which can realize the crushing and screening of materials in one stop. It can also be combined with other equipment to complete the crushing and screening of materials in a mobile and efficient manner.

履带式筛分移动破碎站

CRAWLER TYPE MOBILE CRUSHING AND SCREENING PLANT

安邦机械履带移动式筛分设备，采用目前国际最为先进的设计理念，以科学考究的生产工艺精心打造而成，筛分效率高，产量大，适用于重型、中型和精细筛分等各种筛分作业。

Vanguard Machinery crawler mobile screening equipment adopts the most advanced design concept in the world and is meticulously built with scientific production technology. It has high screening efficiency and large output. It is suitable for heavy, medium and fine screening. Screening operations.

履带式重型筛分移动破碎站

CRAWLER-TYPE HEAVY-DUTY MOBILE CRUSHING AND SCREENING PLANT

安邦机械履带式移动重型筛分站拥有丰富的各类工况应用经验。该设备主要应用于采石场的砂土分离、矿山建设初期的表土处理、工程废渣及尾矿的筛分处理、建筑废弃物的回收利用、以及鹅卵石、煤炭和骨料的筛分作业。

Vanguard Machinery Crawler Type Mobile Heavy-Duty Screening Plant has extensive experience in various application conditions. It is mainly used for sand and soil separation in quarries, surface soil treatment in the initial stage of mine construction, screening treatment of engineering waste residue and tailings, recycling of construction waste, river stone screening, coal mine screening, and aggregate screening.

履带式重锤破移动破碎站

CRAWLER TYPE MOBILE HEAVY-DUTY HAMMER CRUSHING PLANT

移动式锤破，也叫移动式重锤破，主要是将重锤式锤式破碎机与移动式履带车架进行巧妙结合，遥控操作即可上路，具有“一次破碎成型”的优势。

Mobile hammer crusher, also called mobile hammer crusher, is mainly to combine the hammer crusher and the mobile crawler frame ingeniously. It can be operated by remote control and has the advantage of "one-time crushing and forming".

MBP系列移动式破碎站

MBP SERIES MOBILE CRUSHING PLANT

MBP系列模块式移动破碎站是集一个或若干个破碎和筛分单元模块组成的多元一体化框架结构解决方案。该系列移动站特别适用于需要定期在不同位置之间移动设备的多点采石场，具有结构设计紧凑、节省空间、免基础安装，可根据施工需要快速搬迁和再组合等显著优势。

MBP series modular mobile crushing plant is a multi-integrated frame structure solution consisting of one or some crushing and screening unit modules. This series of mobile plants are especially suitable for multi-point quarries that need to regularly move equipment between different locations. They have significant advantages such as compact structure design, space-saving, foundation-free installation, and can be quickly relocated and recombined according to construction needs.

产品优势：Product advantages

坚固的结构
Rugged construction

机架分为焊接式和组装式两种：中小型规格一般采用焊接式，大型规格一般采用组装式。具有耐冲击性、受力均匀、低故障率等特点。

The frame is divided into welding type and assembled type, which has the characteristics of impact resistance, uniform force and low failure rate.

减振安装设计
Anti-vibration installation design

破碎机采用专用的橡胶减震装置固定，有效吸收了设备振动峰值同时允许破碎机垂直和纵向方向的位移，从而降低了对基础的冲击。

The crusher is fixed by a special rubber shock absorption device, which effectively absorbs the peak vibration of the equipment and allows the vertical and longitudinal displacement of the crusher, thereby reducing the impact on the foundation.

自动化程度高
High degree of automation

稀油润滑系统采用双油泵、双过滤器冗余设计，在设备启动前就可进行润滑，适应性强，易于控制，延长了零件使用寿命。

The thin oil lubrication system adopts the redundant design of double oil pumps and double filters, which can be lubricated before the equipment is started, with strong adaptability, easy control, and prolongs the service life of parts.

MBP系列颚式破碎站

MBP SERIES JAW CRUSHING PLANT

MBP系列颚式破碎站使用最优化的框架结构和动颚设计，主要用于矿物和岩石的粗碎作业加工，可根据产能的不同，设计配套不同规格的给料机、颚式破碎机、皮带机等模块结构件。

MBP series jaw crushing plant uses the optimized frame structure and movable jaw design, mainly used for the coarse crushing of minerals and rocks. According to the different production capacity, it can be designed and matched with different specifications of the feeder, jaw crusher, belt conveyor and other modular structural parts.

MBP系列圆锥式破碎站

MBP SERIES MOBILE CONE CRUSHING PLANT

MBP系列圆锥式破碎站配备有性能卓越的适宜中细碎的圆锥破碎机，特殊的破碎壁和轧臼壁设计，辅以曲线腔型和液压清腔系统，能有效提升破碎效率、有效降低易操作损耗。

MBP series cone crusher is equipped with a cone crusher suitable for medium and fine crushing with excellent performance, special crushing wall and concave design, supplemented by curved cavity and hydraulic cavity cleaning system, which can effectively improve the crushing efficiency and reduce the ease of operation.

产品优势

Product advantages

■ 成品粒型优异

利用层压破碎原理对物料进行破碎，破碎效率高，易损件磨损低。破碎后成品呈立方体，细粒级含量高，可满足一些高品质骨料的使用需求。

■ 适用性更广

该系列圆锥破碎机有更大的给料口，可以发挥出最大性能以适应各种破碎工艺，广泛应用于中碎到超细碎、以及固定式到移动式破碎站。优化设计的破碎速度、偏心距（冲程）和腔型设计完美结合，能够提供更高的产量和更优的产品质量。

■ 自动化程度高

稀油润滑系统采用双油泵、双过滤器冗余设计，在设备启动前就可进行润滑，适应性强，易于控制，延长了零件使用寿命。

■ Excellent grain shape

The material is crushed by the principle of lamination crushing, with high crushing efficiency and low wear of wearing parts. After crushing, the finished product is cubic with high fine-grained content, which can well meet the needs of some high-quality aggregates at this stage.

■ Wider applicability

This series of cone crushers has a larger feeding port, which can exert maximum performance to adapt to various crushing processes. It is widely used in medium crushing, ultra-fine crushing, stationary and mobile crushing plants. The optimized design of crushing speed, eccentricity (stroke) and cavity design are perfectly combined to provide higher capacity and better product quality.

■ High degree of automation

The thin oil lubrication system adopts the redundant design of double oil pumps and double filters, which can be lubricated before the equipment is started, with strong adaptability, easy control, and prolongs the service life of parts.

高效转子式选粉机

SUPERFINE ROTOR CLASSIFIER

高效转子式选粉机是我公司经多年研究开发出的外部循环式带转子的改进型选粉机。它是在转子式选粉机的基础上，将平面涡流理论运用于旋风式选粉机设计而成。经实践使用证明，选粉效率达85%以上，细度调节灵活方便，性能可靠。

Superfine Rotor Classifier, designed by our experts after many years’ effort, is an improved classifier. It is the new design on basis of the rotor classifier, integrates the Dimensional Vortex Theory with the cyclone collector. It is proved that the rate of the powder classifying can reach to 85%. With the reliable operation, the fineness degree can be easily adjusted.

④4/6 pump flow rate 300-360 tons / hour

③3/4水泵流量80-100吨/小时

LSX系列洗砂机

LSX SERIES SAND WASHER

性能特点

STRUCTURE CHARACTERISTICS

- 1.本系列产品可清洗分离砂石中的泥土和杂物，其新颖的密封结构，可调试溢流堰板，可靠的传动装置，确保清洗脱水的效果适用于公路、水利、建筑等用砂单位。

2.清洗：除去砂石中的泥土和杂质。

3.脱水：除去砂石中的水份。

4.分级：未达标的细颗粒溢出
- 1.This series of product can clean and separate mud and impurities from gravel, which is applied in sand using units such as roads, watercon servancy,construction, etc. Cleaning and dehydration are completed well by novel sealing structure, adjustable weir plate, and reliable transmission device.

2.Cleaning: removing mud and impurities from sands;

3.DE-watering: removing water from sands;

4.Grading: overflowing ungraded fine aggergates.

XSD轮式洗砂机

XSD SERIES SAND WASHER

整个传动装置（包括轴承）都与水和受水物料隔离，避免了轴承因浸水、砂和污染物导致损坏。

The complete transmission device including bearings are all separated from water, which avoid the damage of bearings caused by water, sand and any other pollutants.

叶轮设计合理，具有洗净度高，结构合理，处理量大，功耗小的特点。

Reasonable impeller design, with high degree of cleanliness, reasonable structure, large amount of processing and low power consumption.

采用耐磨材料制成的筛网，有效的延长了使用寿命；并且除了筛网以为，基本无其他易损件。

Screening cloth is made of high abrasive material, which prolongs the service life. (Polyurethane material also can be used). Except the screen cloth, there are not any other wear parts in the sand washer.

ZSW系列振动给料机

ZSW SERIES VIBRATING FEEDER

性能特点

- 1.ZSW振动给料机在生产流程中，可把块状、颗粒状物料从贮料仓中均匀、定时、连续地给到受料装置中去，在砂石生产线中可为破碎机械连续均匀地喂料，并对物料进行粗筛分，广泛用于冶金、煤矿选矿、建材、化工、磨料等行业的破碎、筛分联合设备中。
- 2.振动平稳、工作可靠、寿命长；可以调节激振力可随时改变和控制流量，调节方便稳定；噪声低耗电小，调节性能好，无冲料现象。结构简单，运行可靠，调节安装方便，重量轻，体积小维护保养方便。

STRUCTURE CHARACTERISTICS

1. During production flow, the ZSW Vibrating Feeder can delivery the granule, block of raw material from hopper to various equipment evenly, timely and continuously. In a sand-stone production line, the machine can continuously convey the materials to crushers and coarsely screen the materials. It is widely applied to the crushing-screening combination equipment in industries of metallurgy, coal mine, beneficiation building materials, chemical engineering, grinding materials etc.
2. Performance Characteristics: stable vibration, reliable operation and long service life; adjustable exciting force ever-present controllable and changeable flow rate convenient and steady adjustment; low noise, small power consumption, good adjusting performance, no flushing phenomenon, simple structure, reliable operation, convenient installment and adjustment, light weight, small volume easy, maintenance.

TS系列三轴水平筛

TS SERIES TRIPLE SHAFT HORIZONTAL SCREENS

产品简介

INTRODUCTION

三轴水平筛是在汲取国内外同类振动筛技术的基础上研发而成的。凭借其水平安装方式及占地空间小的优势，该设备被广泛应用于冶金、建材、交通运输等行业。它适用于天然骨料及破碎骨料的粗筛与精筛作业，具有透筛性好、处理能力大、安装高度低等特点，是各类矿山、采石场及移动式筛分站的理想设备。

The Triple Shaft Horizontal Screens are developed by absorbing the same type of vibrating screen technology at home and abroad. Due to its horizontal installation and small site space, it is widely used in metallurgy, building materials, transportation and other industries. It is suitable for coarse-grained screening, fine screening of natural aggregate and crushed aggregate. It has the characteristics of good screening permeability, large processing capacity and small installation height. It is ideal equipment for all kinds of mines, quarries and mobile screening plants.

重型高强度筛箱，筛分效率更高

我们使用高强度容器钢侧壁，延长了筛分机的使用寿命。使用多层侧臂箱体，以独特的鱼形架进行支撑，加大了应力最大区域，从而让结构更坚固耐用

Heavy-duty High-strength Screen Box for Higher Screening Efficiency

We adopt high-strength vessel steel for the side walls, extending the service life of the screener. The multi-layer side-arm box structure is supported by a unique fish-shaped frame, which strengthens the areas under maximum stress, making the whole structure more robust and durable.

傻瓜式润滑方式

采用先进的驱动端免维护润滑系统，减少轴承润滑阻碍，降低轴承温度，延长轴承使用寿命。可加装温控系统进行实时监测。

User-friendly lubrication system

Adopting an advanced maintenance-free Lubrication system for the drive end, it reduces resistance in bearing lubrication, lowers bearing temperature,and extends the service life of bearings. A temperature control system can be added for real-time monitoring.

助力企业实现“碳中和”

相比同产量圆振筛功耗节能58%以上，椭圆运动特性使筛网的使用寿命延长35%以上，高透筛率保证了物料一次性通过率，减少前段过度破碎、降低废料比。

Help Enterprises Achieve “Carbon Neutrality”.

Power consumption is more than 58% lower than that of traditional circular vibrating screens with the same capacity The elliptical motion design extends the service life of the screen mesh by more than 35%. High screening efficiency ensures one-time material passing rate, reduces over-crushing in the previous stage and lowers the waste ratio.

强制同步的三轴结构

使用军工级合金齿轮打造筛箱中心的三轴激振结构，该齿轮驱动振动装置经改善更加坚固耐用，强了筛机可负载超强激振力的特性。

Forced Synchronization Triple Shaft Structure

Adopting a triple shaft excitation structure at the center of the screen box, manufactured with military-grade alloy gears. The improved gear-driven vibration unit is sturdier and more durable, enhancing the screen's ability to withstand ultra-strong excitation force.

ZY系列自调心阻尼振动筛

ZY SERIES SELF-ALIGNING DAMPING VIBRATING SCREEN

产品简介

INTRODUCTION

▲ 激振器、调心装置、箱体采用分体模块化设计，维修变得简单，更换更加便捷，最大限度减少停机时间。

▲ 振动支承装置采用转轴型式，振动筛10-20度自由调整，满足客户不同物料筛分需求。

▲ 增加传动器装置，提高电机传动效率、延长三角带使用寿命；保证了设备运转同心度，大大延长了轴承的使用寿命。

▲ 横向阻尼器，有效控制设备横向摆动幅度，增加了机体、复合弹簧的使用寿命。

▲ The module design of vibration exciter, aligning devices and cabient can simplify maintanance, convenient replacement and maximing reduce downtime.

▲ Vibrating support device adopts spindle which can be adjusted between 10 to 20 degrees to meet customers' different requiremnets.

▲ Drivers are added to improve motor transmission efficiency and prolong service life of V-belt, which can ensure the concentricity when operating, thus prolongs the service life of bearing.

▲ Lateral damper, controlling the transverse oscillation amplitude, prolongs service life of engine body and complex-spring.

YA系列圆振动筛

YA SERIES OF CIRCULAR VIBRATING SCREEN

产品简介

INTRODUCTION

YA系列圆振动筛为多层数、沿圆弧线振动的一种筛选设备，该机型物料筛淌线长，筛分规格多，成品粒度筛选清晰，在结构上采用可调节的筒体式激振器、偏心轴及配重轮。具有结构可靠、激振力强、筛分效率高、振动噪音小、坚固耐用、维修方便、使用安全等特点，广泛应用于采石场筛分料石，也可供矿山建材、交通、能源、化工等部门作产品分级使用。

YA Series Vibrating Screen is multiple layers and vibrating circularly. It has long screen line, which can correctly screen all kinds of specification products. Our Vibrating Screen adopts the the adjustable cylinder exciter, eccentric shaft and counterweight wheel. It is also of reliable structure, strong exciting force, high screening efficiency, low vibrating noise, long durability, convenient maintenance, safe operation, etc. Our Vibrating Screen is widely used for screening in mines, building material, transportation, energy sources, chemical industry, etc.

皮带输送机

BELT CONVEYOR

本公司生产的胶带输送机系列具有输送量大、结构简单、维修方便、部件标准化等优点，根据输送工艺要求，它可以单台输送，也可多台组成或与其他输送设备组成。

The belt conveyor produced by our company has the advantages of large conveying capacity, simple structure, convenient maintenance and standardization of components. According to the technological requirements on conveying, the materials can be conveyed by single set or by integrated equipment with several sets or with other conveying equipment.

性能参数表 / Technical Specification

配件支持

SPARE PARTS

我公司拥有完善的铸造厂和专门的零配件销售部门，我们采用先进的管理技术，为广大用户储备了大量的常用件、易损件等，我们运用各种物流方式快速实现各种零配件的及时供应，为客户提供优质和超值的服务，以支持我们完善的售后服务体系。

We contain a team for casting and selling the spare parts and accessories of all related machine and adopt advanced management system to increase stock of commonly used parts and easy-wear parts. Furthermore, with all kinds of delivery methods, we provide perfect supply chain all over the world.

生产和保障系统相匹配，实现用户最低生产成本

Matching of production and support system allows customers to get best service at lowest cost.
