Annual capacity

山东奔驰重工有限公司成立于2005年，是一家集研发、制造、销售与售后服务于一体的现代化重型专用车制造企业。公司生产基地位于山东省济宁市梁山工业园区，贸易总部坐落于山东省会济南。

公司拥有21年专用车研发制造经验，厂区占地6.9万平方米，生产车间5万平方米，年产能6000台，旗下拥有山东畅达、奔驰、卡迈斯三大品牌，与陕汽、重汽、BPW、SAF、Hyva、WABCO、JOST、FUWA 等知名企业建立长期战略合作。

公司主营集装箱及百货物流运输车、砂石料及矿煤运输车、工程设备与桥梁构件运输车、汽柴油罐车、粉粒物料运输车、拖挂车、乘用车运输车等全系列产品。

凭借稳定可靠的品质，产品远销中亚、中东、非洲、南美洲等地区。于哈萨克斯坦、秘鲁、津巴布韦、坦桑尼亚、阿联酋设立销售与售后服务中心，为全球客户提供充足备件与高效售后支持。

公司秉承专注高端产品、质量第一、客户至上理念，诚邀全球伙伴携手合作，共创共赢未来。

Shandong Benchong Heavy Industry Co., Ltd. was established in 2005. It is a modern enterprise specializing in heavy-duty special-purpose vehicles, integrating R&D, manufacturing, sales, and after-sales service. Our production base is located in Liangshan Industrial Park, Jining, Shandong, and our sales & trade headquarter is in Jinan, the capital of Shandong Province.

With 21 years of experience in special vehicle development and manufacturing, the company covers a factory area of 69,000m² and a workshop area of 50,000m², with an annual capacity of 6,000 units. We own three brands: Shandong Changda Special Vehicles, BENCHI and CARMAX, and have strategic cooperation with SHACMAN Auto, Sinotruk, BPW, SAF, Hyva, WABCO, JOST, FUWA and other renowned enterprises.

Main products cover seven categories: Container & General Cargo Logistics Transport Vehicles, Sand, Gravel, Ore & Coal Transport Vehicles, Engineering Equipment & Bridge Component Transport Vehicles, Gasoline & Diesel Fuel Tankers, Powder Tanker Trailer, Full Trailer, Car transport semi-trailer.

With stable and reliable quality, our products are exported to Central Asia, the Middle East, Africa, South America and other regions. We have set up sales and after-sales service centers in Kazakhstan, Peru, Zimbabwe, Tanzania and the UAE, providing customers worldwide with sufficient spare parts and efficient after-sales support.

Adhering to the company philosophy of commitment to high-end products, quality first and customer foremost, we sincerely invite global partners to cooperate for a win-win future.

PRODUCT PROFILE

产品简介

Container & General Cargo Logistics Transport Vehicles

Panel semi-trailer

- Used for transporting general bulk cargo, boxed goods, building materials and other conventional goods.
- Dimensions can be customized.

Van transport semi-trailer

- Sealing, rainproof and dustproof, suitable for standard cargo transportation.
- Dimensions can be customized.

Side curtain semi-trailer

- Rainproof and dustproof, with quick-opening side curtains for easy loading and unloading; suitable for medium and long-distance transportation of palletized and standard goods.
- Dimensions can be customized.

Side curtain semi-trailer

- 127m³ Large Capacity; rainproof and dust-proof, with quick-opening side curtains for easy loading and unloading; suitable for medium and long-distance transportation of palletized and standard goods.
- Dimensions can be customized.

Fence semi-trailer

- Used for transporting agricultural products, livestock, building materials and LCL goods, with good ventilation, flexible loading and large capacity.

Skeleton semi-trailer

- Capable of transporting 20ft / 40ft / 45ft containers.
- Dimensions can be customized.

4-axle flatbed semi-trailer

- Used for transporting general bulk cargo, boxed goods, building materials, containers and other conventional cargo.
- Dimensions can be customized.

Side-tipping grain transport semi-trailer

- Double-compartment design enables loading different types of grain, facilitating efficient and clean transportation and unloading of bulk grain.

Grain side-tipping semi-trailer

- The dual semi-trailer design doubles transport efficiency, while the 72m³ high-capacity cargo body ensures stable and efficient cargo transport during the harvest season.

Rear-tipping semi-trailer

- Used for transporting and unloading materials such as sand and gravel, ore, and coal.

Rear-tipping semi-trailer

- Used for transporting and unloading materials such as sand and gravel, ore, and coal.

Rear-tipping semi-trailer

- Used for transporting and unloading materials such as sand and gravel, ore, and coal.

Side-tipping semi-trailer

- Used for transporting and unloading materials such as sand and gravel, ore, and coal.

Rear-tipping semi-trailer

- Used for transporting and unloading materials such as sand and gravel, ore, and coal.

Three-way dump semi-trailer

- A multi-functional dump truck that allows unloading to the left, right or directly behind the cargo, all controlled from the driver's cabin.

Engineering Equipment & Bridge Component Transport Vehicles

Low-bed semi-trailer

- Used for transporting bulk cargo and mechanical equipment.

Folding gooseneck semi-trailer

- Hydraulic adjustable goose neck, quick folding/unfolding, for heavy equipment transportation.

Multi-axle low-bed semi-trailer

- Used for the transportation of oversized cargo that is overweight, overheight, overwidth, and overlength.

Detachable gooseneck semi-trailer

- The gooseneck is physically detachable and reattachable; used for transporting machinery and other cargo.

Multi-axle low-bed trailer

- Transport of extra-wide, extra-high, extra-long, and overweight non-dismountable large loads. Specialized for highway heavy haulage.

Nicolas hydraulic modular transporter

- Used for transporting ultra-large cargo over 1,000 tons with complex transportation routes.

Engineering Equipment & Bridge Component Transport Vehicles

Multi-axle low-bed semi-trailer

- Used for the transportation of oversized cargo that is overweight, overheight, overwidth, and overlength.

Low-bed semi-trailer

- Used for transporting bulk cargo and mechanical equipment.

Goldhofer

- Used for transporting ultra-large cargo over 1,000 tons with complex transportation routes.

Wind blade trailer

- Used for transporting ultra-long and heavy wind turbine blades, equipped with dedicated lifting, rotating and fixing systems.

SPMT

- Self-propelled modular transporter for heavy and oversized cargo handling.

Low-bed semi-trailer

- Used for transporting bulk cargo and mechanical equipment.

Gasoline & Diesel Fuel Tankers

Stainless steel tank truck

- Used for transporting high-purity media with corrosiveness (such as aviation kerosene, food-grade solvents, and chemicals).

Aluminum alloy tank truck

- Used for transporting petroleum fuels, food-grade liquids, alcohols/chemical solvents, industrial water and non-corrosive liquids.
- Paintable/non-paintable optional.

Carbon steel tank truck

- Transport of normal-temperature / heated, neutral or weakly corrosive non-food grade heavy oil and chemical liquids.

Carbon steel asphalt tank

- Used for transporting heated, insulated and high-temperature liquid asphalt products.

Powder Tanker Trailer

Carbon steel powder tanker

- Used for transporting dry, free-flowing, and non-corrosive powdery or granular materials.

Carbon steel powder tanker

- Mainly used for transporting bulk materials such as cement, fly ash, stone powder, talcum powder, cement additives, and slag powder.

Aluminum alloy powder tanker

- Mainly used for transporting bulk materials such as cement, fly ash, stone powder, talcum powder, cement additives, and slag powder.

Carbon steel powder tanker

- Mainly used for transporting bulk materials such as cement, fly ash, stone powder, talcum powder, cement additives, and slag powder.

Full trailer

Side curtain towing trailer

- Independent steering for higher flexibility; suitable for frequent cargo transshipment and short-distance transportation.
- Dimensions can be customized.

Fence full trailer

- Used for transporting agricultural products, livestock, building materials and general cargo, with good ventilation, flexible loading and large capacity.
- Dimensions can be customized.

Rear-tipping full trailer

- Used for transporting and unloading materials such as sand and gravel, ore, and coal.
- Dimensions can be customized.

Side-tipping full trailer

- Used for transporting and unloading materials such as sand and gravel, ore, and coal.
- Dimensions can be customized.

Car transport semi-trailer

7-vehicle Car Carrier

- Designed with lifting platforms for the high-volume, efficient transport of finished vehicles.

8-vehicle Car Carrier

- Designed with lifting platforms for the high-volume, efficient transport of finished vehicles.

8-vehicle Car Carrier

- Designed with lifting platforms for the high-volume, efficient transport of finished vehicles.
