The Company

Located in the heart of Italy's north-eastern industrial pole, **Jekko combines the top quality of the Italian manufacturing tradition with innovative ideas** that are exported all over the world. With **more than 50 years of experience in the lifting and handling sector** our products are engineered to meet our customers' specific requirements and are designed to **operate in narrow places where space is restricted**. Modest weight and slim dimensions come with no compromise to **lifting capacity** or **working range**.

VISION

Lifting with precision and simplicity beyond any imagination

MISSION

We develop innovative solutions for those seeking excellence in the world of lifting

INNOVATION

Jekko takes innovation to the limit through understanding of market needs.

WORK TEAM

We are a young and highly-qualified team with innovative mindset.

INTERNATIONAL NETWORK

Jekko is present in the five continents with more than 35 dealers.

PRODUCTS

Jekko minicranes are safe and technologically advanced; payback on a minicrane is achieved in a very short term.

AFTER-SALES SERVICE

Jekko's prompt and reliable after-sales operation offers an online service for spares and warranty management and a training department for technical courses.

MADE IN ITALY

From design to assembly, as well as components and suppliers, all our products are 100% Made in Italy.

Our Products

Minicranes

Four different telescopic mini crawler crane models, with outriggers designed for easy transport and ultimate versatility. These machines can work in all kinds of places – slopes, stairs, passageways and hard-to-reach places – and they are quick to set up.

Articulated Crawler Cranes

These models, combining an articulated truck-loader crane on a self-propelled crawler chassis, offer a glimpse of the future of crawler cranes.

Sectors of application

Glass pane handling

Installation of glazing and curtain walling on buildings and skyscrapers, handling glass panes and non-porous materials using hydraulic manipulators and vacuum lifters integrated with our cranes.

Industrial maintenance

Indoor and outdoor industrial maintenance: shopping malls, ships, museums, schools, hospitals, exhibition halls as well airports, sports grounds, roads, leisure parks, graveyards, houses, railways, etc...

Minipickers

Minipickers are our pick & carry self-propelled electric cranes powered by battery and radio-remote controlled. They are well suited to working in warehouses or where access is difficult for other cranes, especially where heavy loads need to be carried through doorways. Minipickers can also be used with Jekko vacuum manipulators for handling and positioning glazing or curtain walling.

Truck-mounted mini cranes

Truck-mounted mini cranes combine the mobility of a commercial vehicle with the lifting performance and versatility of a Jekko mini crane. Their compact design keeps the crane within the vehicle profile, allowing safe and efficient operation in confined spaces, areas with limited headroom and sensitive ground conditions. They are the ideal solution for fast lifting operations such as steel and timber construction, HVAC installation and many other challenging lifting applications.

Vacuum & Tools

Lifting and handling tools for glass panes and other materials. This family of products includes hydraulic or battery-powered manipulators, grabber manipulators for pipes and beams and other specific tools.

Constructions & Building

All kinds of building work, from housing to civil engineering.

Mining, oil, nuclear, chemical, drilling and military sectors

These specific fields demand the highest standards in terms of accuracy, light-weight tools and handiness: that's exactly what Jekko minicranes offer.

... and others

With its entrepreneurial flair, Jekko has introduced the mini crane concept to all kinds of niche applications, including cinema, advertising, product promotion, airspace, luxury, etc...

Why a Jekko mini crane?

A Jekko mini crane is a truly unique, highly technological and innovative product. Because of its characteristics, because it is much more competitive than other cranes and because it comes from the experience of a solid, young and state-of-the-art company.

It goes where others cannot go

It allows working in close proximity to the load

It has a very high lifting capacity compared to its stability surface

The weight is evenly distributed on the floor

Movements are extremely precise

It has better reach in presence of obstacles

It is radio-remote controlled: the operator is always safe and can control the load from distance

3 types of power supply for any environment: petrol/diesel, battery or electric

Conscious choices

For the **environment:**

Less paper, more digital
Solar energy
Zero plastic and reusable

For the **people:**

Training
Team building

For social **awareness:**

We support local associations

JEKKO BATTERY-POWERED "ECO" MINI CRANE

Jekko strongly advocates the concept of environmentally friendly, battery-powered cranes. For these reasons, we provide electric mini cranes in 'ECO' battery-powered versions that operate in the same way as their diesel or gasoline counterparts. We are also the only manufacturer of mini cranes that offers lithium battery-powered mini cranes, which deliver superior cost and performance benefits. Battery-powered mini cranes are ideal for working in enclosed spaces without causing pollution.

With a decade of expertise in crafting cranes fitted with lithium batteries, Jekko stands at the forefront of innovation. Today, our mini cranes feature state-of-the-art lithium battery systems, proudly Made in Italy.

These batteries are integrated with advanced internal Battery Monitoring System that meticulously safeguard performance and optimize available energy. This electronic system is a guardian against perilous situations, preventing issues like over-current or deep discharge.
