COMPANY PROFILE

QUANZHOU QUANHAI MACHINERY MANUFACTURING CO., LTD. is located in Quanzhou, Fujian Province, a famous hometown of overseas Chinese in southern Fujian. It is adjacent to Quanzhou Jinjiang Airport and has convenient sea, land, and air transportation. After more than a decade of unremitting market development and improved after-sales service, the company has now developed into a modern manufacturer of chassis bolts for construction machinery such as excavators and bulldozers, integrating research and development, production, and marketing.

Our company specializes in producing a series of high-strength track plate bolts, gear block bolts, gear ring bolts, blade bolts, support wheel bolts, bucket shaft bolts and other products for imported and domestic excavators, bulldozers, drilling rigs and other construction machinery. We have complete production equipment and mature testing methods. All products must undergo strict inspection before leaving the factory to meet the requirements of the host manufacturer. Our products are sold well throughout the country and can also undertake processing and production based on drawings and samples. We also export to European and Southeast Asian countries and have received unanimous praise from our end users.

In the increasingly fierce international market competition, the company has always adhered to the business philosophy of "quality first, mutual benefit, and continuous improvement". We welcome new and old customers to visit and guide us, and work together to create a brilliant tomorrow!
