Vema TRACK®

UNDERCARRIAGE PARTS

GET THE JOB DONE

HIGH QUALITY
COMPETITIVE PRICES

With the partner that goes the extra mile for you

Every job is important, every part counts. VemaTrack always delivers.

VemaTrack delivers undercarriage parts that get the job done, whatever your needs. Tested under the most challenging conditions for optimum performance on any terrain. Users on building sites and the most demanding areas across the world trust our undercarriage parts, which is something we are proud of. That is why we only supply our products through a select network of dealers that believe as strongly in VemaTrack as we do.
Hand in hand we continue to build our brand and enjoy success together.
Essentially, it's about commitment - a partnership for life.

We are proud of our roots. The parent company of VemaTrack, the Verhoeven Group, was formed in 1957 as an overhaul company. The company now has various subsidiaries and has grown into a major player in the field of ground-excavation machines, undercarriage parts and accessories. VemaTrack was founded in 2007 to answer a world-wide demand of high-quality products, at competitive prices. The key values that apply to all of the companies in the Verhoeven family are: the client always comes first, service is paramount and we are the specialists for personalized advice.

In our opinion, the partnership with our dealers should be as strong as our parts. We believe in strengthening our dealers and continuing to build the VemaTrack brand together.

PRODUCTS THAT GET THE JOB DONE

VemaTrack offers a wide range of undercarriage parts for every popular brand. Our promise to end users is that every VemaTrack part has a comparable quality to the original. In fact, we are constantly improving our products with our in-house R&D department, using feedback from the field. We determine our own direction which gets noticed! We will be pleased to provide you with an overview of our product portfolio.

TRACK SHOES

ROLLERS

IDLERS

SPROCKETS AND SEGMENTS

TENSION DEVICES

TRACK GUARDS

BOLTS AND NUTS

RUBBER PADS

RUBBER TRACKS

FINAL DRIVES

GROUND ENGAGING TOOLS

We are constantly improving our products with our in-house R&D department, using feedback from the field.

VEMATRACK'S 10 PROMISES

1 UNRIVALLED KNOWLEDGE OF THE MARKET

We continue to build on the 60 years of experience of our parent company and develop new knowledge by specializing in the production of our own parts. We know what is important for clients and how they depend on good functioning undercarriages. We also know how technical knowledge and commercial skills make the difference together. We share this knowledge in an open partnership.

2 TAYLOR MADE SALES SUPPORT

As a partner we will look together with you, what you need to be successful in your market. Due to the collaboration of the worldwide VemaTrack dealer network you don't have to re-invent everything yourself. For example: when you need a new website or any promotional materials? We will help you. If you are taking part in a trade fair, you can always consult us. This is the commitment that you can expect form us as your partner.

3 MARKET-DRIVEN PRODUCT DEVELOPMENT

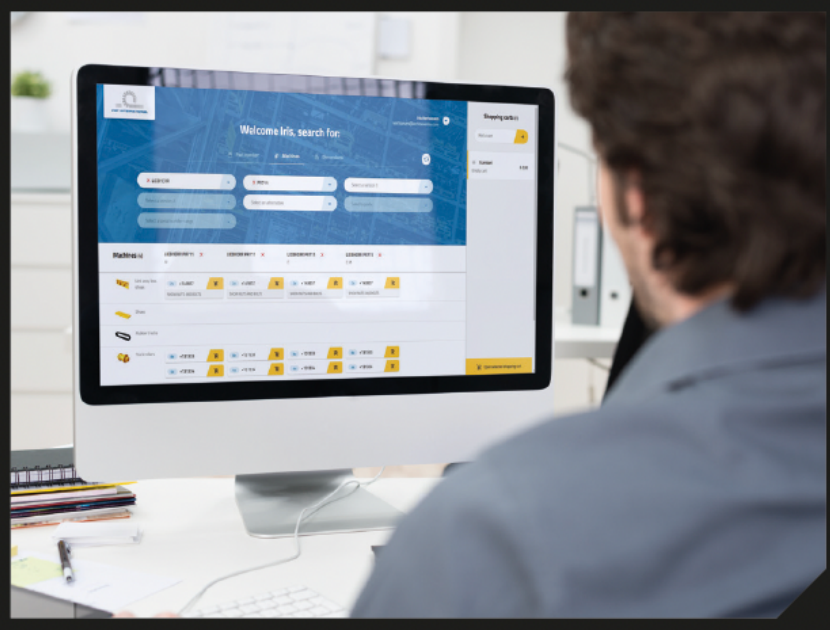

We keep a constant eye on all popular makes of bulldozers and excavators. When a new machine is launched, we are often the first company to bring the undercarriage parts onto the market. This is what we mean by market-driven rather than profit-driven product development.

4 ON-TIME DELIVERY

Downtime means a loss of money, so short delivery times are vital. We keep parts in stock in our warehouses in the Netherlands and Asia, so that we can deliver rapidly from two continents and we can meet agreed delivery times.

5 GUARANTEED QUALITY

Robust, reliable, durable. VemaTrack supplies products which offer excellent value for money. We are only able to live up to this because we fully control the quality of our products. Our in-house R&D department is constantly improving our quality.

6 ONLINE SUPPORT

Our dealer support portal gives you an overview of the full VemaTrack range, including price and stock level. You will always quickly find the parts that your client is looking for, including product information and dimensions.

7 FOCUS ON SUSTAINABILITY

For us, sustainability is primarily for long term relationships with our clients. It is about working together, even when it involves responsibility to society. At VemaTrack we think it is important to handle materials carefully. That is why we control the entire supply chain in the most efficient manner.

8 COMPLETE RANGE

VemaTrack parts are available for all popular makes and machines. Our complete range of products means that you can always meet your client's requests.

9 THE ADVANTAGE OF A GLOBAL PLAYER

We deliver VemaTrack products from two continents to dealers across the world. This international expertise in the technical, production, logistics and sales fields means we are capable of providing optimal support to our dealers in their region.

10 A MAN OF HIS WORD

Our final promise to our customers is perhaps the most important. At VemaTrack, we always keep our word. This means that we ensure that you can fulfill your promise to your clients. You can depend on our delivery times, our products are always reliable and you can trust on our quality. VemaTrack delivers.

HOW TO
GET THE JOB DONE?

The work must always carry on. We help you to meet the expectations of your client. VemaTrack provides you with a wide range of undercarriage parts that always have excellent availability and are able to cope with any job. You can rely on the best dealer support and a partner that meets its obligations. Whatever your ambition, we will get the job done together.
