Product Introduction

Main Products

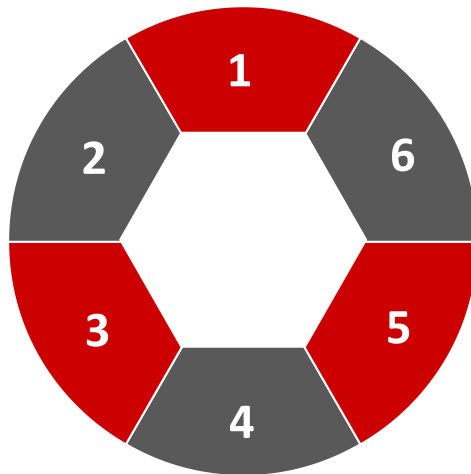

Plastic raw material

Nylon hose

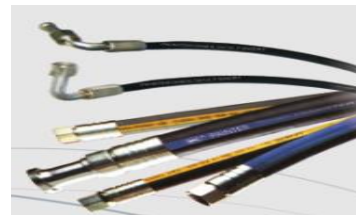

High pressure thermoplastic hose

Test hose

Airless paint spray hose

Hydraulic hose assembly

Product Introduction - New polymer material characteristics and applications

Modified Polymer Material

Appliance application

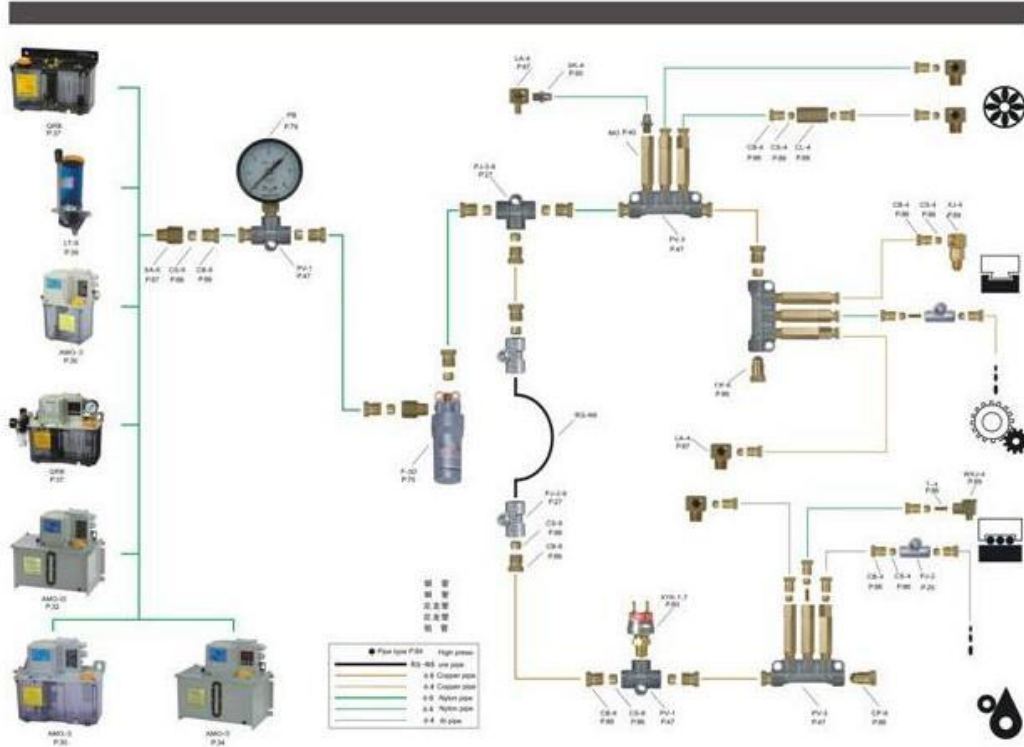

Excellent: 5VA flame resistance

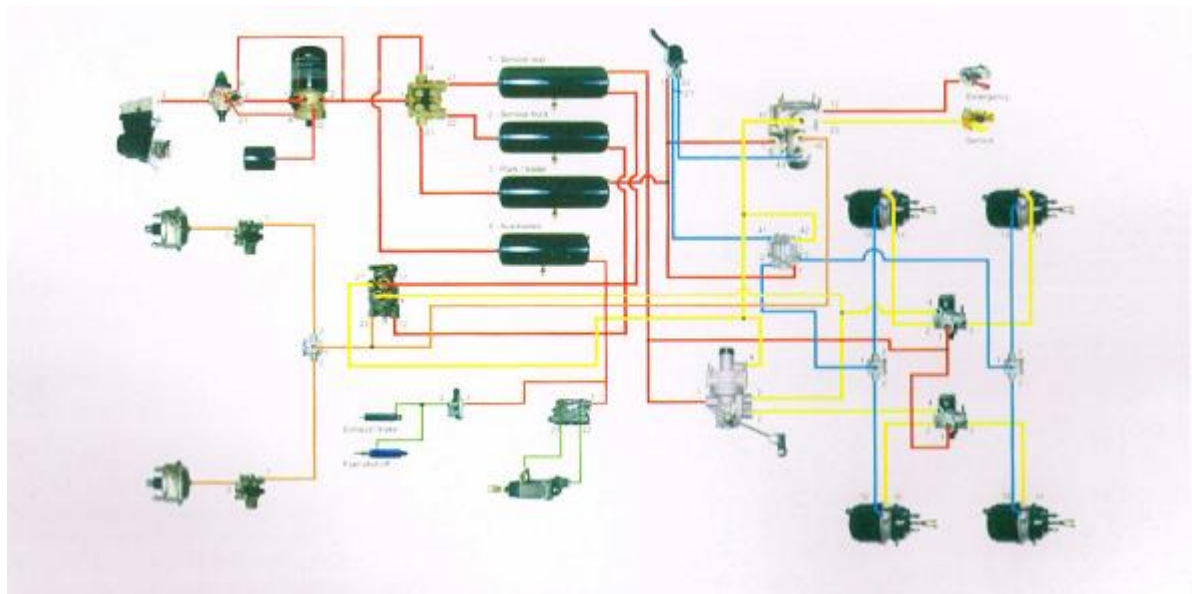

Excellent: Good weather resistance

Excellent: Good processing performance

Excellent: impact performance

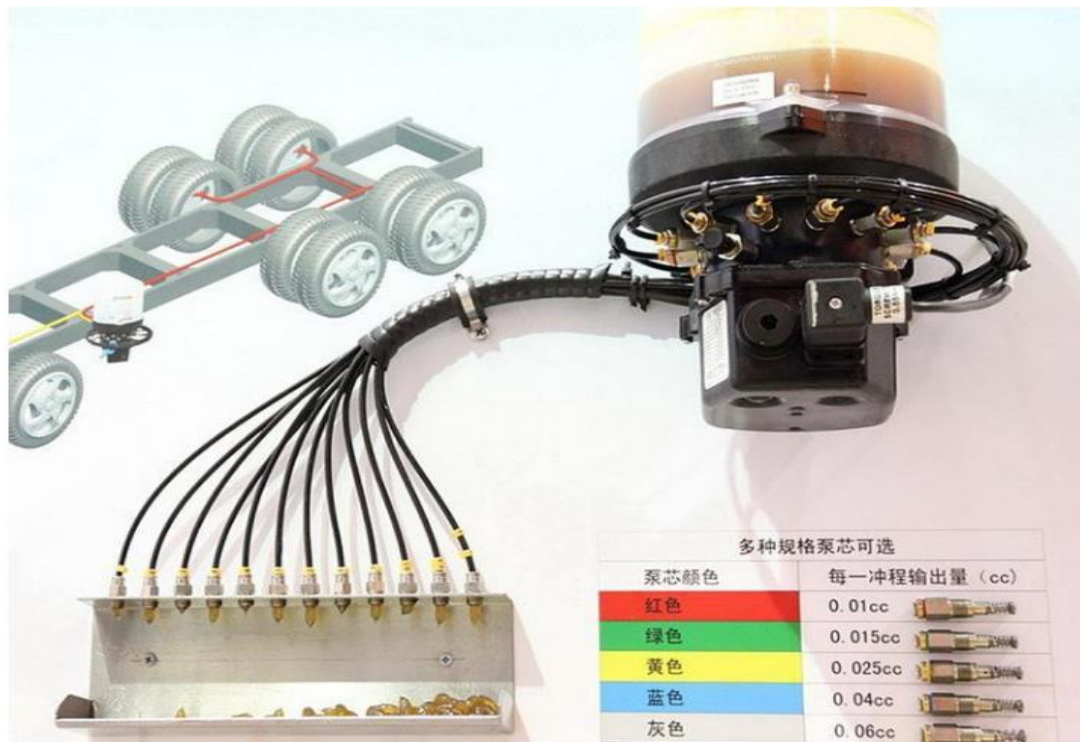

Nylon hose application - Industrial machine (Injection machine)

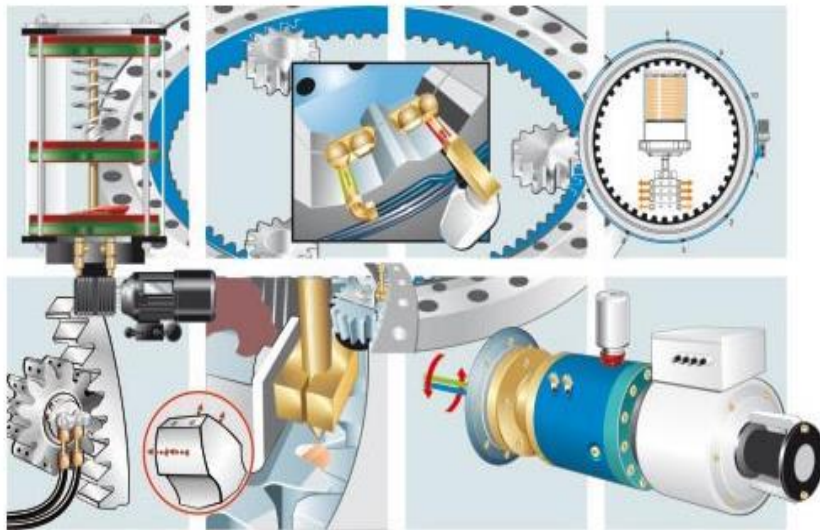

尼龙气制动管路

风力发电设备润滑系统

集中润滑系统在风力发电设备的应用

风力发电机承受高强度的机械负载，因此风机的运行必须毫无差错。自动润滑系统能避免风机由润滑不够，而导致的机械故障。自动润滑系统，使得风机运行更加可靠。

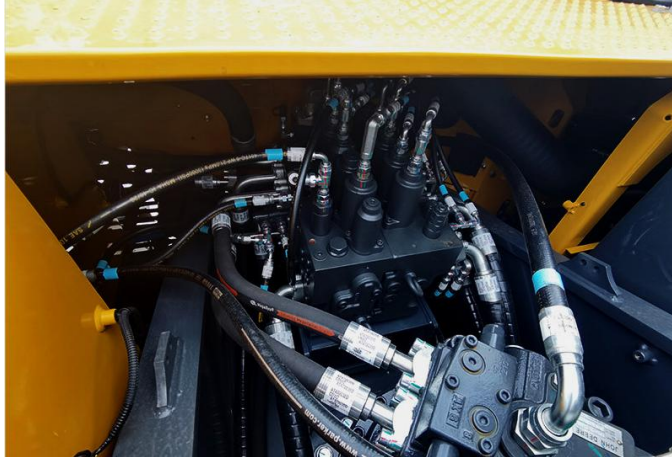

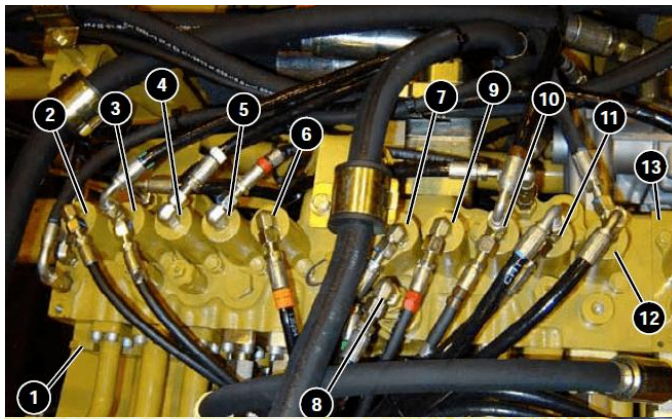

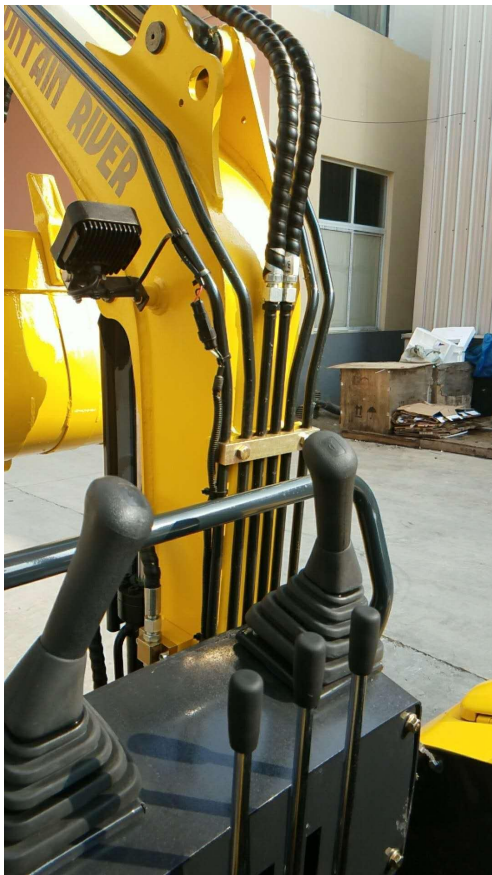

应用:

为风力发电机的所有润滑点供应润滑剂。如：变桨轴承、发电机轴承、偏航轴承、驱动齿面等。

XCMG Heavy truck hydraulic
turnover mechanism

04

Equipment & Capacity

6 plastic pellet production lines with a capacity of about 1000 tons/month.

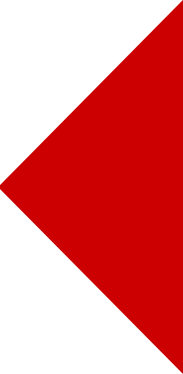

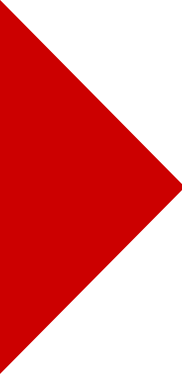

**10 extruding/coating machines, production capacity of nylon hose: 2 million meters/month,
resin hose 1.2 million meters/month**

More than 150 sets fibre and wire braiding machines
