山西鑫瑞达冶金机械制造有限公司

Shanxi Xinruida Metallurgical Machinery Manufacturing Co., Ltd.

COMPANY INTRODUCTION

ShanxixinruidaMetallurgicalMachineryManufacturing Co.LTD. was established in 2003, located in Jiaocheng, the hometown of casting in Shanxi Province, with an annual production capacity of 50,000 tons, and the largest single product weight of 50 tons.

Capacity of equipment:

1. A set of ceramic sand production line (including sand regeneration system).
2. one each of two 15-ton 10-ton/8-ton medium frequency furnaces;
3. 1000 tons / 500 tons of vertical straightening machine, 1500 tons of horizontal straightening machine each one;
4. Six sets of 2.5 meters vertical lathe, 2 sets of 2 meters vertical lathe, 3 meters, 1.6 meters, 1.5 meters vertical lathe each;.
5. Three sets of automatic temperature control electric heat treatment equipment;

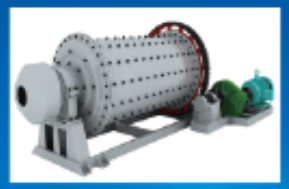

Annual production capacity
50000 T
Large casting capacity —
Up to 50 tons per piece

The main product range: mining and construction machinery parts products. The main products are: imported cone crusher wear parts, imported jaw crusher wear parts, metal crusher wear parts, bucket teeth, shovel teeth, ingot molds, chain plate, etc. We have served mining companies, equipment manufacturers, and EPC contractors from China, Central Asia, Russia, and more.

Products & Service

Crush liner is a key component of the cone crusher, which is subjected to huge impact and compression loads from the recycled materials.

Therefore, the crushing wall must have high strength and stability to ensure the stable operation of the equipment. In order to meet the market demand, we have developed and manufactured replacement components specially designed for different models of crushing equipment. These components have a high degree of compatibility and excellent operating characteristics, effectively
