Company Profile

Anhui Ningguo Shunchang Machinery Co., Ltd

The company is committed to the specialized production of slewing rings, with professional manufacturing equipment and design and processing capabilities. It has successively introduced advanced CNC production lines, such as CNC raceway lathes, CNC raceway grinders, CNC high-speed gear milling machines, CNC polar coordinate drilling machines and other equipment.

1996

Enterprise restructuring

13 million yuan

Registered capital

110,000 m²

Floor area

32,000 sets

Annual output

4 m

Maximum diameter

Anhui Qiankun Heavy Industry Machinery Co., Ltd

The slewing bearing products we produce are suitable for all kinds of machinery that need to bear axial force, radial force and overturning moment, and at the same time need to transmit the slewing torque, and have been widely used in construction cranes, excavators, metallurgical machinery, stacker and reclaimer, liquid filling machinery, robots, wind turbines, radars, manned lifts, rail vehicles, sewage treatment devices, military facilities and park amusement machines.

2007

Founded

60 million yuan

Investment amount

53,000 m²

Floor area

36,000 sets

Annual output

4 m

Maximum diameter

History

2010

Qiankun started research on wind power slewing ring with RMB 20million investment.

Nowadays

Shunchang built new plant for electric parts products.

2004

Overseas business covers 36 countries across seven states.

2007

Wind power slewing ring got highly approval in market.

2002

Slewing ring spread to overseas,shunchang enlarge plant.

2000

Shunchang started research and invest for Slewing ring.

1988

Anhui Ningguo Shunchang Machinery Found,producing train wheels.

Product Category

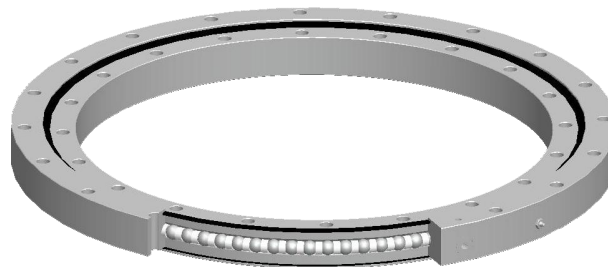

Internal teeth

External teeth

Flange

Toothless

Cross roller

Fields of application

Construction machinery

Wind power

Entertainment equipment

Harbour machinery

Metallurgical machinery

Robot equipment

Medical equipment

Military equipment

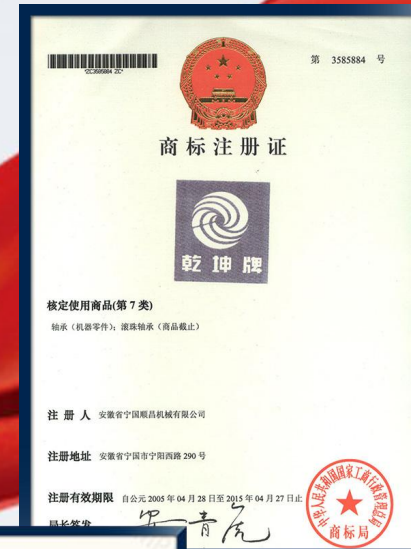

Aerial work platform

Marine equipment

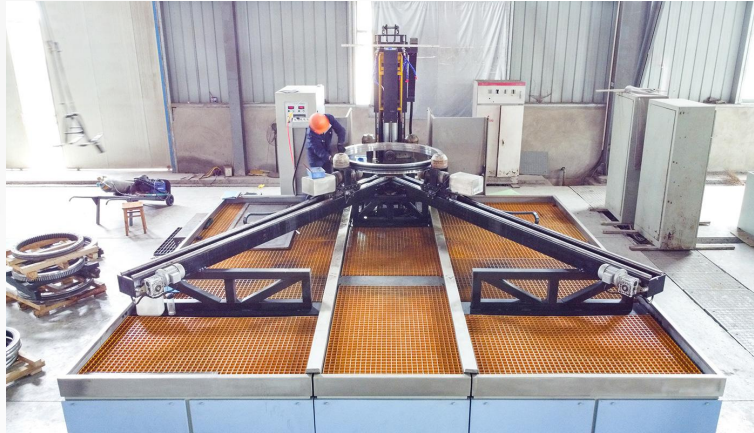

Qualifications and honors

Workshop environment

Production equipment

Large - scale slewing bearing quenching

Induction heat treatment machine

Raceway quenching

Raceway quenching

CNC machining center

High - Speed gear milling machine

Production equipment

Vertical lathe

CNC vertical lathe (4meter)

Vertical lathe

Vertical grinder

Plano boring & milling machine center

Vertical lathe

Testing equipment

Fluorescent magnetic particle automatic crack detector

CROMA high - precision coordinate measuring machine

Ultrasonic flaw detector model SH - 67

Microscope

Pavement material strength tester

Digital display vickers hardness tester

Cooperative customers
