

Company & Product

JSC Co., Ltd : A Global leader in Hydraulic Breakers

JSC Corporation is a leading South Korean company specializing in the export of breakers. Currently, all production is managed by our parent company, Jisung Heavy Industries.

Since our spin-off from Jisung Heavy Industries over 15 years ago, we have been exporting breakers to more than 30 countries, including the United States, Canada, Europe and Middle Eastern Countries. We have established a strong network of distributors and partners in each region to ensure comprehensive customer support.

In May 2022, we began preparations for a strategic partnership with Volvo Region Asia. This collaboration led to the launch of the V-series Breaker in January 2023, marking a significant milestone in our global expansion.

Following the successful launch, we continue to collaborate with volvo region Asia to strengthen the presence of our hydraulic breakers in the Asian markets.

Production Capacity & Delivery

Our current production capacity is approximately 300 units per month and 4,000 units per year. We maintain a standard delivery lead time of 5 weeks from order placement. To address urgent delivery needs, particularly for domestic customers, we keep inventory of key models, such as the 4ton and 14-ton breakers.

Product Features

- High impact energy (Operating System: Gas and Oil Hybrid)
- Simple and reliable design:
 - Maximum uptime and reliability
 - Reduced operating expenses
- ABF (Anti Blank Firing) System: Available for models JSB70-JSB151
- Automatic Lubricating System: Featured in models JSB45-ArES A1000
- Wide Product range: various types including Silence Box, Open Top, and Open Side, suitable for excavators ranging from 1 to 120-ton class.
- Flexibility: Ability to respond flexibly to customer requirements and Specifications.
