企业简介

邢台滤豪过滤材料科技有限公司成立于2010年，是一家专业生产滤清器的厂家，是集研发、生产、销售、技术推广为一体的滤清器制造商。经过十余年的不断探索与实践，形成了一支年轻化、高素质、团结创新的队伍同时拥有先进的生产工艺与设备，多年来秉承做事先做人的原则，用苛刻的眼光审视每一道生产工序，产品从选材料、生产、售后服务均按高起点高标准、高要求的理念，以求制造高标准的滤清器，让滤豪的每一位用户用的放心，用的安心。

Xingtai filter Hao filter material technology Co.,Ltd.,established in 2010, is a professional manufacturer of filters.It is a filter manufacturer integrating R&D, production,sales and technical promotion.After more than ten years of continuous exploration and practice,a young,high-quality,United and innovative team has been formed.At the same time,it has advanced production technology and equipment.Over the years,it has adhered to the principle of being a man in advance and looked at each production process with a harsh eye.The product selection,production and after-sales service are based on the concept of high starting point,high standard and high requirements.In order to manufacture a high standard filter,let every user of filter house rest assured and use at ease.

A new production plant was built in 2017 and put into operation in October 2019,covering an area of 25000 square meters.The new plant is equipped with domestic leading modern production equipment and advanced testing instruments.At present,there are 3 PU filter production lines,8 large paper stackers,8 automatic capping equipment,8 automatic glue injection equipment and 8 testing equipment.From the processing of raw materials to the forming of products,the whole process has been first-class quality supervision and technical guarantee.

The company always insists on taking the market as the center,taking the market demand as the guide,improving quality management as the basis and strengthening high-quality service as the goal,so as to maximize the service life of your equipment in harsh environment.The same price is better than quality,and the same quality is better than service.Our company is willing to sincerely cooperate with you,continuous innovation,mutually beneficial development and create a better future hand in hand!

2017年新建生产工厂，并于2019年10月投产，占地25000平方，新工厂配备有国内领先的现代化生产设备和先进的检测仪器，现有PU滤清器生产线3条，大型叠纸机8台，自动扣盖设备、自动注胶设备8台，检测设备8台。从原材料的加工到产品的成型，整个过程都得到一流的质量监督和技术保障。

公司始终坚持以市场为中心，以市场需求为导向，提高质量管理为基础，强化优质服务为目标，以求最大限度的延长您的设备在恶劣环境下的使用寿命。相同价格比质量，相同质量比服务。我公司愿与您真诚合作，不断创新，互利发展，携手共创美好未来！

公司宗旨

为客户创造价值，为员工创造机会，
为企业创造效益，为社会创造财富。

经营理念

质量信任，品质信任，能力信任，前景信任。

质量方针

信任第一，顾客至上，提供一流的产品和服务。

经营目标

诚信服务在全国，勇争行业一流。

企业精神

诚 信 合 作 巩 固 创 新

COMPANY PURPOSE

Create value for customers and opportunities for employees,
Create benefits for enterprises and wealth for society.

MANAGEMENT IDEA

Quality trust,quality trust,ability trust,prospect trust.

QUALITY POLICY

Trust first,customer first,
and provide first-class products and services.

BUSINESS OBJECTIVES

Honest service in the country,
bravely strive for first-class in the industry.

ENTERPRISE SPIRIT

Honest cooperation,consolidation and innovation

公司简介>>

滤豪滤清器无论空气滤清器、机滤滤清器、柴油滤清器，均在出厂前全检率100%，目前滤豪滤清器主机配套龙工机械有限公司并在积极开发其他主机厂。

公司产品广泛用于各种工程机械、重型机械、工矿设备机械、特殊机械设备以及各种工业除尘等方面，空气、机油、柴油、除水滤清器。

我们始终坚持以质量为中心，以服务为导向，提高质量管理为基础，强化优质服务为目的。

邢台滤豪过滤材料科技有限公司愿与国内外客商真诚合作、互利发展，在新的机遇和挑战中携手并进，共赢未来！

The full inspection rate of air filter,engine filter and diesel filter before delivery is 100%.At present,Longgong Machinery Co.,Ltd.is supporting the main engine of filter and is actively developing other main engine plants.

The company's products are widely used in various engineering machinery,heavy machinery, industrial and mining equipment,special machinery and equipment,various industrial dust removal,air,oil,diesel and water storage filters.

We always adhere to quality as the center,service as the guide,improve quality management as the basis,and strengthen high-quality service as the purpose.

Xingtai filter Hao filter material technology Co.,Ltd.is willing to sincerely cooperate with domestic and foreign merchants for mutually beneficial development,go hand in hand in the new opportunities and challenges,and win-win the future!

空气滤清器>>

汽车空气滤清器位于发动机进气系统中，它是由一个或几个清洁空气的滤清器部件组成的总成，主要负责清除空气中的微粒杂质的装置。其主要作用是滤除将要进入汽缸的空气中的有害杂质，以减少汽缸、活塞、活塞环、气门及气门座的早期磨损和氧化。空气在进入汽缸之前，必须先经过空气滤清器的细密过滤，才能进入汽缸。

空气滤清器状态的好坏关系着发动机的寿命。如果汽车行驶中使用劣质的空气滤清器，会使发动机进气不足，使燃油燃烧不充分，导致发动机工作不稳定，动力下降、耗油量增加的现象发生。因此，汽车必须保持空气滤清器的清洁，当然也必须选择质量保证，口碑好的空气滤清器品牌。

The automotive air filter is located in the engine intake system ,it is an assembly which by one or more clean air filter components. That is a device which primarily responsible for cleaning particulate impurities in the air. Main functions are to filter out harmful impurities in the air before enter the cylinder to reduce early wear and oxidation of the cylinders, pistons, piston rings, valves and valve seats. The intake air must be filtered with good filtration by the air filter before entering the engine. The life of the engine is related to the air filter quality. If you use a bad quality air filter that will cause the engine intake insufficient, fuel not sufficiently burned, engine operation unstable, reduced power and increased fuel consumption. Therefore, the car must keep the air filter clean and need to choose quality warranty and good reputation air filter brand.

势不可挡，大牌高品质滤芯 一全面呵护您的汽车！

Unstoppable, big brand high-quality filter element

优质滤清器的标准

Standard for high quality filters

1. 过滤精度高：滤出所有较大的颗粒 ($>1-2\mu\text{m}$)；
2. 过滤效率高：减少通过滤清器的颗粒数量；
3. 防止发动机出现早期磨损，防止空气流量计损坏；
4. 压差低，确保发动机有最佳的空燃比，降低过滤损失；
5. 过滤面积大，容灰量高，使用寿命长，降低运营费用；
6. 湿挺度高，防止滤芯出现吸瘪现象，造成滤芯被击穿；
7. 密封性能可靠。

- 1.High filtration precision:filter out all large particles($>1-2\mu\text{m}$);
- 2.High filtration efficiency:reduce the number of particles passing through the filter;
- 3.Prevent early wear of engine and damage of air flow meter;
- 4.Low differential pressure ensures that the engine has the best air-fuel ratio and reduces filtration loss;
- 5.Large filtering area,high ash capacity,long service life and reduced operating costs;
- 6.High wet stiffness to prevent the filter element from collapsing and causing the filter element to be broken down;
- 7.Reliable sealing performance

您的空滤有了新选择

了解空气滤清器.....

Understanding Air Filter.....

汽车发动机是非常精密的机件，极小的杂质都会使其受损，而滤清器则是为了满足和保证其正常运转的“安全卫士”。

是空气进入发动机的第一道“关卡”，它的主要功能是过滤掉将要进入发动机的空气中的有害杂质和沙粒等，以减少对发动机各个循环系统的早期磨损。在发动机燃烧系统正常运行的过程中，每消耗一升燃油，将需要1万升以上的空气。为了保证车辆正常的动力性，空气滤清器在过滤的同时还必须保证足够的空气流量。洁净和足量的进气，是实现理想动力，低油耗、低污染排放的重要条件，是延长发动机寿命的有力保障。

高级长效滤清器

LEADING TECHNOLOGY

And advanced equipment

工艺先进技术领先

选择滤豪滤清器的理由

超高效的过滤性能

过滤效率可达99.99%，
远超一般过滤产品，更
好的保护发动机

01

超长的使用寿命

平均可达6万公里以上，
是一般过滤器的2倍多。
大幅延长了车辆的维保
周期，从而减少了维保
费用提高了设备的使用
率。

02

F8滤纸技术/纤维结构

我们的空滤均使用全球
领先的 F8 滤纸技术，对
细小灰尘的过滤性能更
高，更好的保护了发动
机。

03

密封材料

密封材料非常柔软且抗
压性好，在强大外力作
用下，依然可以恢复原
状。空滤不易变形，密
封面与空滤总成贴合的
更紧密。

04

更高效

F8级的过滤能力，彻底解决杂质对发动机的异常磨损。

More efficient

The F8 grade filtration ability, completely solves the engine abnormal wear and tear by impurities

更强劲

新一代的滤材技术优化效率与阻力之间的矛盾，过气量充足，发动机始终强劲有力。

More powerful

The new generation of filter media technology optimizes the contradiction between efficiency and resistance with sufficient air volume and engine powerful

源于国际先进的制造技术 滤豪滤清器与众不同

更经济

卓越的表面过滤技术，使滤芯的复原性超过90%，使用寿命极大延长。

More economical

Excellent surface filtration technology makes the filter's recovery more than 90% and the service life be greatly extended.

更适用

采用先进的过滤技术，拥有超强的防水防潮技术，使发动机在潮湿严重的雨季及雾霾环境，仍可以发挥澎湃动力

More suitable

Be used advanced filtration technology, with super waterproof and moisture-proof technology, the engine can still exert its power in the humid rainy season and smog environment.

工作原理》》

WORKING PRINCIPLE

空气滤清器用于过滤进入发动机的空气，只有清洁的空气才能促进燃油充分燃烧，确保发动机性能的稳定。

The air filter is used to filter the air entering the engine. Only clean air can promote the full combustion of fuel and ensure the stability of engine performance.

LVHAO HELPS YOU SUCCEED

优质滤材 先进工艺 配套品质

空滤芯的生产过程是繁杂的工作，从滤材选取、加工到成品检测都要制定严格的标准，并制定统一规范的操作流程，通过先进设备进行生产和检测，才能确保每一套到用户手中的产品是合格且高效的。

我们为了生产高质量的滤清器，在选材上按照主机厂要求的技术指标进行操作，并结合先进的技术制定符合自身特点的优质滤材，这样将更加符合发动机的进气需要。优质的滤材主要是通过先进的设备和制做工艺进行生产后才能达到高质高效的。

The production process of air filter element is a complicated work. Strict standards should be formulated from filter material selection, processing to finished product detection, and unified and standardized operation processes should be formulated. Only through advanced equipment for production and detection can we ensure that each set of products in the hands of users is qualified and efficient.
