POWER FROM
HERITAGE PASSION
FOR THE FUTURE

BEGINNING

FROM WORKSHOP TO INDUSTRIAL POWER

It all began in 1960, in a 9 m² workshop located beneath the family home in Simav, Kütahya. From that humble beginning, our company has grown into a thriving industrial enterprise and an inspiring story of success.

TODAY

Strengthening its corporate identity under the brand Kazcioğlu Industrial Solutions, our company combines deep rooted experience, engineering excellence, and a wide product range to successfully serve both domestic and international markets. Today, operating across three locations with a total of 24,000 m² of enclosed production area and 400 qualified employees, Kazcioğlu Industrial Solutions provides end to end solutions for the core industrial needs of multiple sectors through a production approach built on high quality standards.

OUR VALUES

At Kazcioğlu Industrial Solutions, we demonstrate a strong corporate stance not only through the parts we produce, but also through the way we conduct business, our respect for our people, and our responsibility to society. The values that define who we are form the foundation of our growth.

01

RELIABILITY

Trust forms the basis of our relationships. We fulfill every promise with quality, on time, and without compromise.

02

QUALITY AND CONTINUITY

We operate with technical excellence and smart solutions at every stage of production. Beyond the product itself, we stand among the industry's best through our commitment to process quality.

03

SUSTAINABILITY

We place sustainability at the core of both our production processes and our social responsibility approach creating lasting value while considering environmental and social impacts.

04

CONTRIBUTION TO EDUCATION AND SOCIAL RESPONSIBILITY

With a vision of investing in the future, we develop vocational training programs integrated with the industry, support women's employment, and take pioneering steps that create social value.

OUR VISION

To be an industrial solution partner recognized on a global scale distinguished by high technology production and driving transformation across industries.

With our innovative approach, talented workforce, and sustainable growth strategy, we aim to contribute to the industry of the future, today.

Our goal is to lead the sector with products that make a difference in global competition and to leave a lasting mark on the industrial world of tomorrow.

WE TRANSFORM AN IDEA INTO A
PART, A PART INTO SUCCESS AND
WITH THAT SUCCESS, WE GO
BEYOND LIMITS.

OUR MISSION

At Kazcioğlu Industrial Solutions, our mission is to provide engineering based, high quality, and sustainable solutions for strategic industries such as automotive, defense, agriculture, construction machinery, and rail systems.

We enhance our customers' competitiveness by offering flexibility, speed, and technical excellence throughout our production processes, while keeping social benefit at the heart of our operations.

Through our industry integrated training investments and employment models developed especially for youth and women, we produce not only parts but also the future.

Each of our products represents a contribution to long term partnerships, technological advancement, and social development, enabling us to play a multifaceted role in shaping the future of industry.

With its engineering oriented production approach, Kazcioğlu Industrial Solutions provides solutions for the core industrial needs of critical sectors such as automotive, defense, agriculture, construction machinery, and rail systems.

Through our specialized production departments, we offer a wide range of products from steering and to pipe and hose assemblies, from precision machining to cold forging.

Thanks to our flexible production capabilities and high quality standards, we are positioned as a reliable supplier for both mass production and customized solutions, serving trusted partners in national and international markets.

FIELDS OF ACTIVITY

AUTOMOTIVE

DEFENSE

Kazcioğlu Industrial Solutions is a trusted solution partner in the production of high strength, precision tolerance components for the defense industry. With advanced engineering infrastructure, we ensure accuracy and quality at every stage of production.

We manufacture steering and linkage components with high precision critical for road safety and performance.

With solutions integrated into OEM production, we stand at the heart of motion.

CONSTRUCTION
MACHINERY

We ensure the reliable operation of construction machinery with high performance components built to withstand heavy duty conditions.

Our manufacturing philosophy where strength, durability, and precision unite keeps us confidently in the field.

FIELDS OF ACTIVITY

We manufacture precisely machined, durable, and long lasting components for trains and rail systems that require the highest levels of safety. We sustain the continuity of motion through the power of engineering.

RAIL SYSTEMS

We produce durable and long lasting components for agricultural machinery, becoming a trusted solution partner for manufacturers. With engineering solutions designed for demanding field conditions, we make a difference in performance and reliability.

AGRICULTURE

OUR PRODUCTION INFRASTRUCTURE

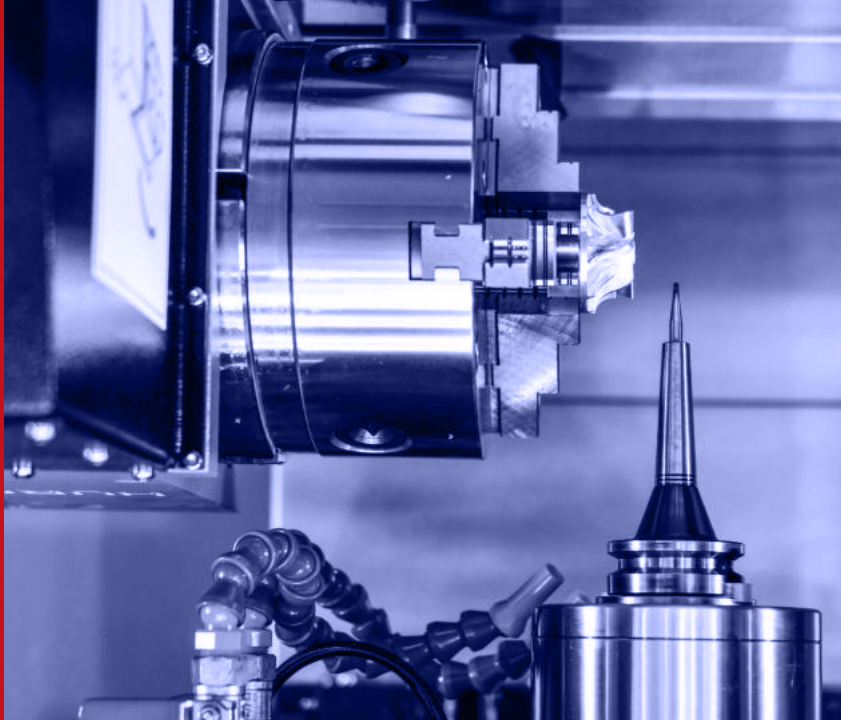

Kazcioğlu Industrial Solutions carries out end to end production across its three integrated factories, covering a total area of 24,000 m².

Within its facilities, the company operates departments for precision machining, pipe bending, assembly, welding, coating, quality control, mold production, steering system components, and R&D. Each unit is equipped with state of the art machinery and optimized to deliver both mass production flexibility and customer specific solutions.

VARIOUS AUXILIARY
MACHINES

Our pipe assembly line has the capability to bend various materials such as steel, aluminum, copper, brass, stainless steel, and Bundy tubes within a diameter range of 4 mm to 80 mm. Pipe ends ranging from Ø4 mm to Ø80 mm can undergo countersinking, doming, necking (diameter reduction), and expanding operations.

Dimensional measurements, surface roughness tests, and internal cleanliness analyses of the produced pipes are performed with state of the art laboratory equipment in accordance with the relevant standards.

MACHINING DEPARTMENT

VARIOUS AUXILIARY
MACHINES

Our Machining Department is equipped with CNC lathes, CNC machining centers, conventional lathes, and milling machines. With a machining capacity of 1300 × 600 mm and a turning capability of up to Ø240 mm, this department processes steel, stainless steel, aluminum, brass, copper, and special alloys with high precision and tight tolerances.

COLD FORGING DEPARTMENT

27
PRESS

24.000.000
UNITS / YEAR

Kazcioğlu Industrial Solutions operates one of the highest capacity cold forging facilities in Türkiye.

Equipped with 27 presses, this department serves leading industry brands with an annual production capacity of 24 million parts.

Within a range of 50 to 1,000 grams, critical components such as ball joints, Z-links, and tie rod housings are forged with high precision.

In addition to steel parts, aluminum cold forging production is also successfully carried out.

COMPLETE TIE ROD PRODUCTION

Kazcioğlu Industrial Solutions manufactures **tie rod ends, axial joints, and tie rod assembly** for the steering systems of tractors and construction machinery, in line with the highest engineering standards

These critical components are developed under our brand FABBRO, with durability, safety, and performance as top priorities, and are exported to global markets.

All processes carried out on our modern production lines are supported by tight tolerance control, quality assurance systems, and comprehensive testing procedures.

QUALITY APPROACH

Kazcioğlu Industrial Solutions views quality not merely as a result, but as an integral part of every production process. With this philosophy, our Laboratory and Quality Control Department meticulously conducts measurement, inspection, and analysis procedures at every stage of manufacturing.

- ISO 9001
- IATF 16949
- ISO 45001
- ISO 14001

The Kazcioğlu Industrial Solutions Quality Laboratory is equipped with the latest measurement and analysis technologies. It features advanced equipment such as contour profile scanning systems, 3D laser FARO arm, 2D digital height gauge, digital hardness tester, surface roughness tester, and profile projection system.

The laboratory's extensive infrastructure is further supported by mounting and polishing equipment and internal cleanliness analysis systems. With more than 400 gauges and control instruments, every product is tested within precise tolerances and in full compliance with international standards.

COMPLETED INVESTMENTS

Our realized investment figures represent the most concrete indicator of our strategic commitment to innovation and continuous development.

REVENUE GROWTH

In just three years, from 2020 to 2023, we achieved an exceptional 3697% increase in our annual revenue.
