## Yantai Desman Sealing Technology Co., Ltd.

Yantai Desman Sealing Technology Co., Ltd. is a high-tech innovative enterprise integrating scientific research, design, and production. The company is committed to the research, development, and application of new material products, focusing on the development of polyurethane high-performance products and special rubber products; many of the products developed by the company use imported raw materials.

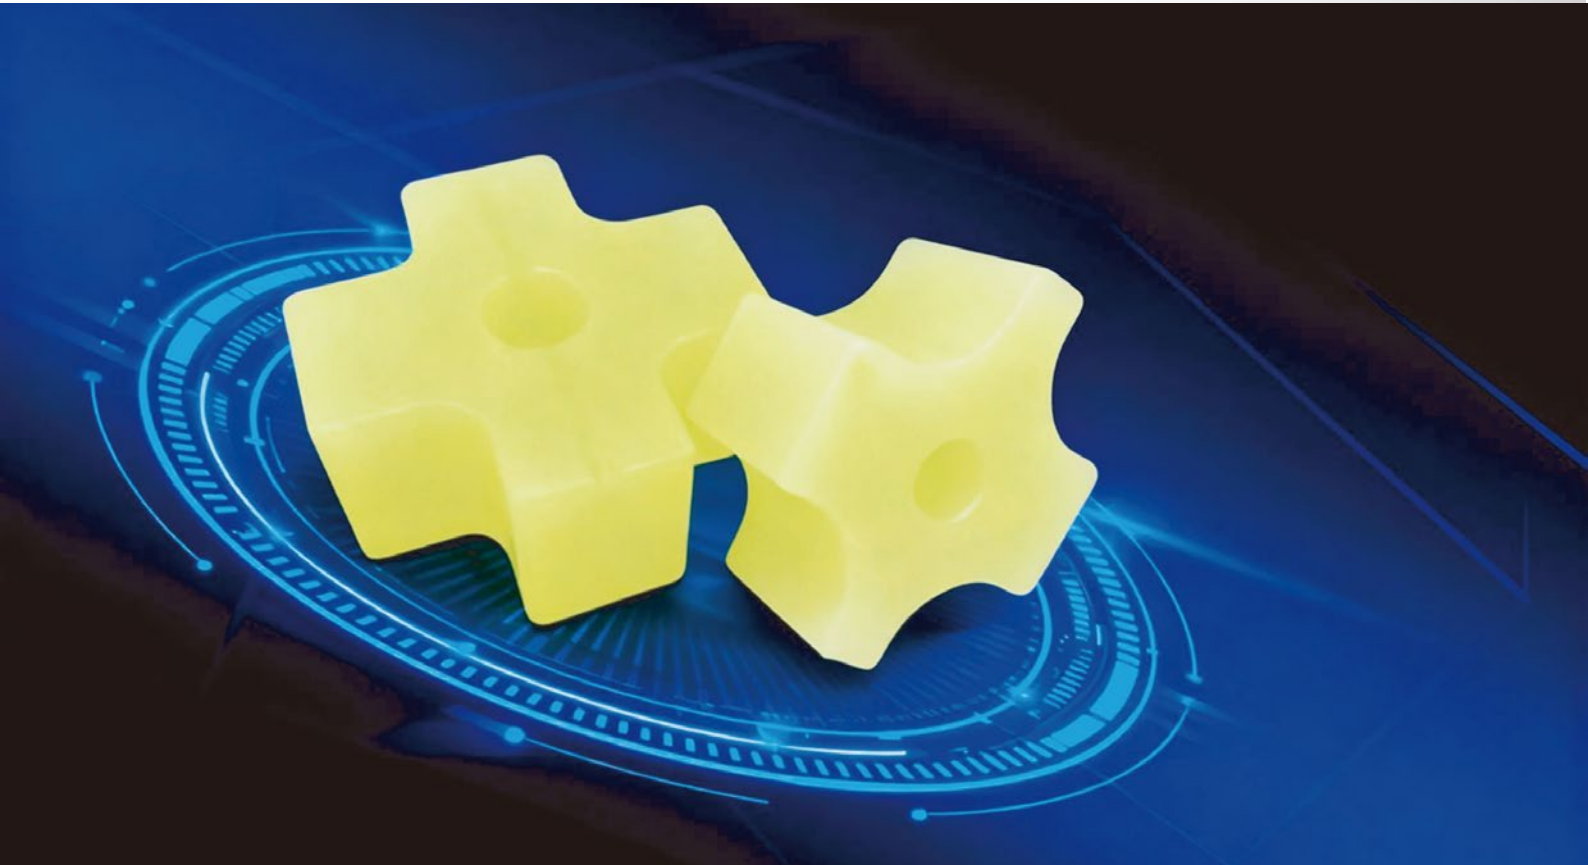

Demonstrates outstanding technical strength and rigorous attitude in product research and production. Taking polyurethane breaker hammer shock absorber blocks as an example, the company spares no cost in selecting imported polyurethane materials, combined with advanced production equipment to ensure every process is precise and accurate. During production, it strictly follows international advanced quality standards, controlling product quality at every stage. This dedication to quality results in shock absorber blocks with high load-bearing capacity, able to withstand high-intensity impacts, and excellent resilience to effectively buffer vibrations during operation, greatly enhancing the breaker hammer's performance and service life. According to authoritative testing agencies, the performance of these shock absorber blocks fully meets the standards of imported counterparts, even surpassing them in some key indicators.

The company's R&D team consists of experienced materials science experts and engineers who continuously monitor international cutting-edge technology trends, exploring new materials and innovative processes to provide customers with higher quality and more competitive products. With strong R&D capabilities, Desman can produce standard polyurethane breaker hammer shock absorber blocks and offer customized services of any shape and size according to customer needs. From product design and mold development to mass production, the company has a complete customized service system to ensure every custom product precisely fits the customer's actual usage scenarios and technical requirements.

With excellent product quality and a good market reputation, Desman has established long-term stable cooperative relationships with many well-known breaker hammer manufacturers domestically and internationally. Throughout cooperation, the company always focuses on customer needs, providing comprehensive technical support and after-sales service. Whether product training, technical consultation, after-sales maintenance, or product upgrades, Desman responds quickly to solve customer concerns. Its product quality has been highly recognized and praised by customers, with many partners reporting significantly reduced product failure rates and greatly enhanced market competitiveness after using Desman's polyurethane breaker hammer shock absorber blocks.

Yantai Desman Sealing Technology Co., Ltd. will continue to uphold the innovation-driven development philosophy, increase investment in scientific research and technological innovation, continuously expand product application fields, improve product quality and service levels, and strive to become a global leader in new material products, contributing more "Desman Wisdom" and "Desman Solutions" to industry development.
