Bucket Bush 斗轴套

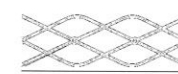

Distinct property: high strength, low wear and tear, shock-proof
卓越特性：高强度、低损耗、耐冲击

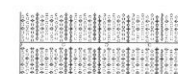

- The inner surface of the bucket shaft sleeve is processed with various patterns of oil grooves, which, after heat treatment, enhances its surface hardness and wear resistance. It is suitable for use in heavy-duty joint parts of construction machinery such as excavators, rotary drilling rigs, large loaders, and continuous wall grab buckets.

Physics And Chemistry Detecting 产品理化检测

The chain goes through thermal refining first, and then its chain rail surface undertakes medium frequency induction. All the heat treatment ensure chain strength and wear-resisting property greatly.

链轨经调质后,轨面经中频硬化处理,保证了最大强度及耐磨性。

High-degree inductive harden surface
