

石料生产线 | Stone Production Line

该生产线使用反击式破碎机为二级破碎，具有流程简单，成品粒型好（立方体），投资经济等优点。该生产线特别适合于石灰石、灰岩、页岩、花岗岩等中等硬度以下岩石的破碎生产。

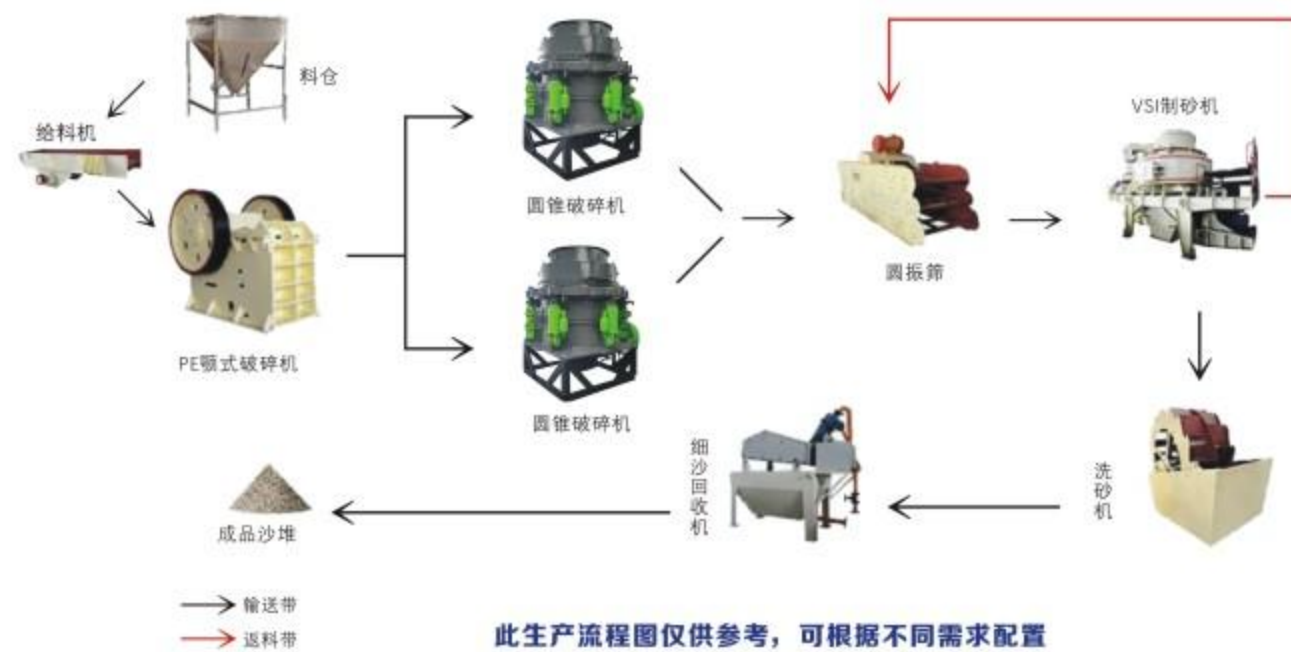

The production line using the impact crusher is two-level-breaking, and has the advantages of simple process, good finished product (cube), investment economy and so on. The production line is especially suitable for the crushing of limestone, limestone, shale, granite, etc..

制砂生产线 | Sand Making Line

我公司开发的5X及VSI系列冲击破碎机（制砂机）和配套设备，专门用于人工砂的生产，具有成品粒型好，成砂率高，细度目数可调，生产成本低等优点，该生产线特别适合于河卵石、石灰岩、花岗岩、石屑、各种岩石和矿石尾矿的人工制砂。

Our company developed 5X and VSI series impact crusher (sand making machine) and supporting equipment, specifically for the production of artificial sand, with a good product type, sand rate is high, The fineness modulus, low production cost advantages, the production line is especially suitable for the river gravel, limestone, granite, stone chips, all kinds of rocks and ore tailings of artificial sand.
