

TRACK LINK

1. Track Links

GETT track link which has consistent quality through steady research and automated production line, is the masterpiece of Track Link which has strong durability with surface hardness – Rockwell C55 & Depth hardness – Rockwell C 45.

2. Pin&Bushing

The first purpose of GETT pin & bushing is to extend the lifetime of product by reducing the mutual friction. For Bushing, surface hardness is over than Rockwell C 50, depth hardness 40. And also, for Pin, surface hardness is over than Rockwell C60, depth hardness 50. With these specifications, the durability of GETT Pin & Bushing has been increased.

3. Assembly

GETT track link is produced in fully automated assembling line. And as for lubricated type, it is also produced by automated oil control device.
