SHANGHAI YINFU SUPPLY CHAIN CO.,LTD

SHENZHEN COLORADO TRADE LIMITED

# ONE-STOP LOGISTICS SOLUTION EXPERT BY YOUR SIDE

## BUSINESS SCOPE

- ▶ Non vessel operating carrier business;
- ▶ Provide one-stop supply chain services for mining, beneficiation, and smelting plant procurement, technology, and transportation solutions for mining enterprises;
- ▶ Provide bulk cargo, FCL, special container, and equipment ship services;
- ▶ General cargo sea freight, air freight, and railway business;
- ▶ Dangerous goods sea and air transportation business.

## A LISTED COMPANY SPECIALIZING IN MINING MACHINE MANUFACTURING AND SERVICES

Dahongli takes the strivers as the foundation and the customer as the center, offering complete sets of sand and stone equipment, Model 300 Sand Crushing Plant, and EPC environmental protection intelligent factories. We provide investment opportunities in green material technology parks and have launched innovative "Sand Crushing Plant" and "Semi-Underground Garden-Style Sand and Stone Crushing Factories."

Dahongli has built a sales and service network across all provinces in the country and many countries along the "Belt and Road" route. In 2024, PT. DAHONGLI MACHINE INDONESIA was established, our wholly-owned subsidiary, to offer comprehensive mining crushing system services, fostering mutual benefits and high-quality industry development.

# FINTYUN

## 青岛方特远矿机

### Qingdao FINTYUN Mining Machinery Co., Ltd.

Main Products: Single-cylinder hydraulic cone crushers, multi-cylinder hydraulic cone crushers, vertical shaft impact crushers. The products comprehensively cover the stages of coarse crushing, medium crushing, fine crushing, sand making, sand washing, feeding, screening, and conveying required in the sand and gravel aggregate industry. They are widely applicable in mining, building materials, highways, bridges, coal, chemicals, metallurgy, refractory materials, tailings treatment, construction waste treatment, environmental dust removal, and many other fields.

#### TCC Series Single Cylinder Hydraulic Cone Crusher

The CC single-cylinder hydraulic cone crusher employs material lamination crushing. When the crushing chamber is filled with material, the material is subjected to comprehensive extrusion, shearing, and kneading within the chamber, achieving both crushing and self-crushing effects. This design effectively prevents liner wear and avoids contamination of the material by metal pollutants, thus reducing the wear on consumable parts and significantly extending the lifespan of wear-resistant components. Additionally, the crushing ratio surpasses that of other similar equipment.

## TFTP Series Multi-Cylinder Cone Crusher

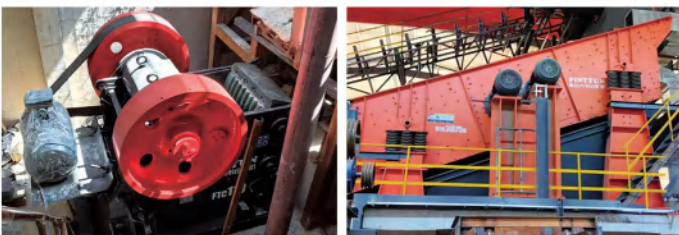

The FTP series multi-cylinder cone crusher is a new type of crusher developed by our company, optimized and improved by absorbing and digesting foreign technology and combining it with actual production site conditions. This equipment boasts higher production capacity, superior product shape, and increased output.

## FJC Series Jaw Crusher

The FJC series jaw crusher is a new type of jaw crusher re-developed by our company based on the advanced technology of domestic and foreign jaw crushers. It features a unique structure and superior performance, making it the preferred equipment for crushing various hard and highly corrosive rock minerals.

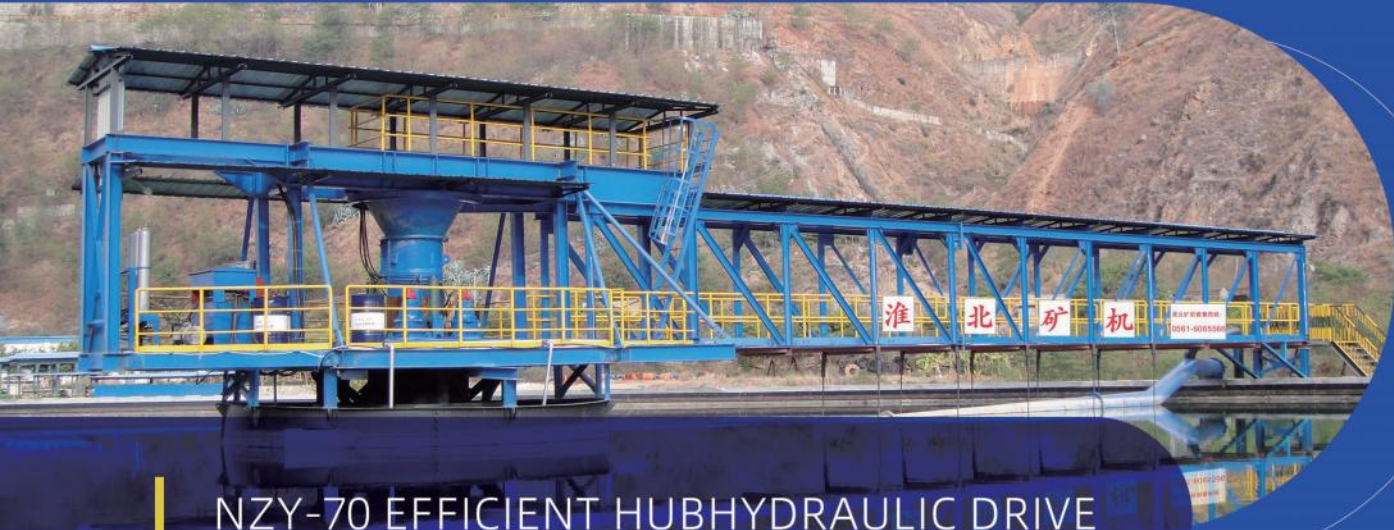

## TFLF Series Linear Vibrating Screen

The FLF series linear vibrating screen is a new type of vibrating screen manufactured by our company, incorporating foreign screening technology. Its efficiency is over 50% higher compared to ordinary circular vibrating screens, making it suitable for use in industries such as quarrying, mineral processing, coal preparation, building materials, power, and chemicals.

# A SOLUTION FOR A DEDICATED HYDRAULIC AND ELECTRICAL CONTROL SYSTEM FOR A ONE-STOP CRUSHER

**SINGLE-CYLINDER HYDRAULIC LUBRICATION SYSTEM**

**MULTI-CYLINDER CONE HYDRAULIC ELECTRONIC CONTROL SYSTEM**

Beijing MKHT Technology Development Co., LTD (formerly Beijing Meikuang Machinery Equipment Co., Ltd.) specializes in the research, production, sales, and import-export business of mining machinery supporting systems. The company is composed of professional researchers and senior engineers, forming a strong technical team. It is mainly dedicated to the hydraulic lubrication control systems for Metso/Sandvik cone crushers, gyratory crushers, jaw crushers, impact crushers, sand making machines, vibrating equipment, and track-mounted mobile crushing stations; the development and application of hydraulic lubrication control systems for mining/quarry aggregate production lines; and the supply of spare parts suitable for international brands such as Metso/Sandvik series crushing and screening equipment, which can perfectly replace imported products, significantly improving the product lifespan and reducing costs for customers.

Excellent products and outstanding services have earned us a good reputation. Our products are sold nationwide and exported to countries and regions including Europe, America, Southeast Asia, the Middle East, and Australia. First-class service, excellent quality, and affordable prices are our principles. Your satisfaction is our ultimate goal. We look forward to cooperating with you!

In order to ensure the healthy development of the foundry industry in Pei County, change the development mode, improve the market competitiveness, achieve the purpose of group heating and common development, and seek a broader development environment in opportunities and challenges, our association and all members warmly welcome people from all walks of life to visit the association for guidance.

Nowadays, the products of Pei county foundry industry are extensive. The products mainly include cast steel, cast iron, automobile ship accessories, engineering vehicle accessories, new wear-resistant materials (steel balls, steel forgings, linings are one of the main production areas of wear-resistant materials in China), mechanical equipment, mining accessories, aerospace, nuclear submarines and other traditional castings and precision castings. The process has been transformed from a single sand turning into a new process with low consumption, science and technology and intelligence. It has practiced the development concept of green manufacturing and intelligent manufacturing, enhanced product competitiveness, and provided a strong guarantee for enterprises to expand the market.

## LARGE CNC LASER CUTTING MACHINE

Liaoning Dapeng Heavy Equipment Manufacturing Co., Ltd. was established in 2020 with a registered capital of 30 million yuan. The core members of the company team have 30 years of experience in casting production and enterprise management, specializing in the development and production of wear-resistant, heat-resistant, corrosion-resistant, and impact resistant products.

The company's products mainly include: rolling bowl wall and crushing wall of cone crusher; The activity and fixed toothed plate of jaw crusher; The plate hammer and impact plate of the impact crusher; The high manganese and high chromium wear-resistant and impact resistant accessories such as the peripheral guard plate, dividing cone, impact block, and flow guide plate of the sand making machine. The product is widely used in industries such as sand and gravel building materials, metallurgy, and power generation.

# COMPANY PROFILE

HUITONG HAS A BENEFICIATION LABORATORY PROVIDING CUSTOMERS WITH ORE OPTIONAL EXPERIMENTS, WHICH CAN HELP CUSTOMERS TO ESTABLISH PERSONALIZED BENEFICIATING SYSTEM, AND OBTAIN THE BEST PRODUCTION RESULT AND OTHER TECHNICAL INDICATORS. WE ALSO FULLY USE OUR UNIQUE TECHNOLOGICAL ADVANTAGES TO DEVOTE TO THE SCIENTIFIC RESEARCH AND DEVELOPMENT OF SPECIAL AGENTS FOR REFRACTORY MINERAL PROCESSING SUCH AS HIGH ARSENIC, HIGH SULFUR, HIGH CARBON, HIGH CALCIUM, HIGH SILICON, HIGH OXIDATION, POOR, IMPURITY, AND FINE MINERALS. WE HAVE SUCCESSFULLY DEVELOPED SPECIAL BENEFICIATION REAGENTS HT203 AND HT216 WITH HIGH SELECTIVITY AND STRONG HARVESTING POWER FOR HIGH-SULFUR COPPER ORE AND HIGH-SULFUR GOLD ORE. THE CALCIUM CARBONATE INHIBITOR FOR THE FLOTATION OF FLUORITE ORE IS EXTREMELY EFFECTIVE AFTER BEING USED BY CUSTOMERS.

Drug classification		Product properties				
Classification	Name		Form	Specifications	Package	
Nonferrous metal flotation	selective collector for copper ore	HT203	Effective collector for copper ore,the separation effect of high sulfur	liquid	200kg/barrel	plastic bucket

# ZHONGFEN THICKENER

EFFICIENT, LARGE-SCALE, AND INTELLIGENT PRODUCTION

HIGH-TECH

ENERGY CONSERVATION AND  
ENVIRONMENTAL PROTECTION

PATENTED PRODUCT

Obtained 6 national invention patents in 2021 and 8 national invention patents in 2022

In 2023, 9 new national invention patents were obtained, and 38 valid authorized invention patents were obtained

Witnessed the strong technological strength of the enterprise

Currently, the GZN series programmable control periphery hydraulic drive hydraulic automatic sectional rake lifting high-efficiency intelligent thickener has been developed and produced with a diameter of up to 110 meters. Additionally, the NXZ series hydraulic drive central transmission hydraulic automatic rake lifting high-efficiency thickener has a diameter of up to 80 meters. The NXZS series central hydraulic drive deep cone thickener reaches a diameter of 45 meters, the nNXZ series multi-layer washing thickener has a diameter of up to 30 meters, and the ZJY series intelligent flocculant addition system's largest model reaches 500 cubic meters. With continuous improvement and innovation of the product matrix, Zhongfen's washing thickeners are at the forefront of domestic technology and advanced on an international level.

# Huaibei Zhongfen Mining Machinery

## Focused on producing intelligent thickeners for over 30 years

The company is committed to the research and development of large-diameter, intelligent, and high-efficiency thickening machines to further improve the technical level of domestic washing and selection equipment.

Over the years, the company has been dedicated to the introduction, digestion, absorption, and utilization of advanced technologies. It has engaged in technical cooperation with several companies such as SEDGMAN from the USA and DORR from the UK. Additionally, the company has established strategic partnerships with higher education institutions like Hefei University of Technology and China University of Mining and Technology, as well as with related design institutes and research institutes. This collaboration has facilitated continuous development of new products and technical upgrades of existing products.

### THE MARKET SHARE OF THE COMPANY'S THICKENERS HAS EXCEEDED 42% FOR THREE CONSECUTIVE YEARS

**RANKING FIRST IN THE DOMESTIC MARKET AND AMONG THE TOP THREE GLOBALLY.**

In 2019, the company undertook the major technological project of Anhui Province for the development and industrialization of the NXZ-73 center drive thickener which successfully passed the acceptance inspection in January 2023.

## NE type lymphatic chain

In various industrialized countries  
These countries are also used for  
Polar factory. Due to high  
Efficiency and energy conservation,  
He is the preferred choice for iron chains.  
Elevators, such as HL and TH.

## FU conveying equipment chain

For use in  
Powder transportation and  
Particle materials  
Horizontal tilt (S15),  
According to different  
Specification and speed range  
0.18 to 0.46 meters per second,  
Maximum throughput  
~460 cubic meters per hour,  
The maximum length is 55 meters.

## SCD clinker conveyor chain

Mainly used for transportation  
There are two forms of cement clinker:  
Bucket and bucket. instantaneous  
The temperature can reach 500  
Celsius degrees, the slope can be  
Reaching 60 degrees,  
The throughput is  
Exceeding 774 cubic meters per hour,  
Altitude exceeding 60 meters.

Jiande Kangwei Machinery Equipment Co., Ltd. is a modern enterprise that integrates research and development with production. The company always attaches great importance to product quality and has passed ISO9001 quality system certification. Our main products include over 60 specifications of NE plate chain elevators, NSE high-speed plate chain elevators, TGD steel belt conveyors, FU chain conveyors, hot material SCD trough conveyors, LD series high-temperature stainless steel conveyors, BL heavy-duty and medium-sized plate feeders, etc Seven categories. # HEBEI ZHONGWEI MINING MACHINERY MANUFACTURING CO., LTD.

was established in 1990 and has developed over thirty years into a modern mining machinery manufacturing enterprise that integrates scientific research, production, design, and EPC (Engineering, Procurement, and Construction) package installation. It is a member of the China Aggregates Association and the China Heavy Machinery Association.

Hebei Zhongwei is located in Wangdu County, Hebei Province, at the center of the Beijing-Tianjin-Shijiazhuang triangle. The company operates three machinery factories and two steel casting factories, covering a total area of 67,300 square meters, with more than 90 sets of specialized processing equipment and over 160 professional technical and production personnel. Its production capacity can reach up to 700 units/sets of mining machinery equipment annually.

Hebei Zhongwei comprehensively implements the ISO9001-2015 quality management system, ISO14001-2015 environmental management system, and ISO45001-2018 occupational health and safety management system certification standards. By introducing advanced foreign technology and conducting independent research and development, the company has produced the C series European version jaw crusher, GP series single-cylinder hydraulic cone crusher, HP series multi-cylinder hydraulic cone crusher, PCZ series heavy hammer crusher, B series vertical shaft impact crusher, N series impact crusher, 2PG series hydraulic double roll sand maker, YKJ series thin oil lubrication maintenance-free circular vibrating screen, and ZSW series vibrating feeder, among other mining machinery equipment in 15 series.

Hebei Zhongwei's self-produced high manganese steel wear-resistant parts feature advanced technology, low wear cost, and long service life. With excellent quality and perfect after-sales service, the products are not only sold well all over China but also exported to Southeast Asia, the Middle East, Africa, South America, and other regions, earning unanimous praise from customers.

COMPANY PRESENTATION

Founded in 2009, Guangdong Leimeng Intelligent Equipment Group Co., Ltd. is a modern high-tech enterprise specializing in R&D and manufacturing of large-scale crushing and screening equipment and providing related technical advice. The group covers an area of about 350,000 square meters, with various types of production lines in more than 100 countries and regions around the world.

The company has more than 150 sets of various mechanical processing equipment, **It mainly produces large-scale hydraulic gyratory crusher, jaw crusher, cone crusher, impact crusher, mobile crushing plants, dry sand making towers, sand washer, fine sand recovery machines, vibrating screens and feeders, filter presses, etc** And contracted the EPC project of sand and gravel aggregate mine construction.

ZHONG HENG

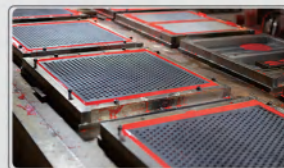

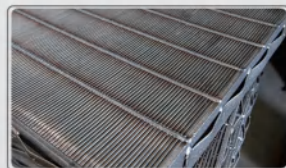

# ZHONG HENG

LOW PRICE, GUARANTEED QUALITY, HIGH COST-EFFECTIVENESS

Main products : Polyurethane screen mesh, mining sieve panel, dewatering sieve plates, vibrating screen panel, polyurethane fine screen, polyurethane edging mesh, modular polyurethane mesh, polyurethane anti blocking mesh, pu scraper, polyurethane accessories, etc. It is widely used in coal washing plant, mining, metallurgy, sand washing, solid waste disposal and many other fields.

Company advantage: Rapid production and delivery, capable of producing 300pcs sieve plates per day. Annual production of over 1000 tons of polyurethane screen mesh.

# Weihai Tongge Technology Co.,LTD.

Weihai Tongge Technology Co., Ltd established in 1992, is engaged in research, manufacture and sale of hydrocyclone and high performance polyurethane elastomer. The company is certified the Quality System Certification of ISO9001 : 2015 Standard.

Our purpose is technology, quality, integrity, and service. We pay attention to independent research and development, also cooperate with domestic relevant science and research institutes on technology.

Our products are widely used for the mining, coal, electricity, chemical industry, machinery, and environmental protection and so on, also exported to more than 20 countries including of USA, Netherlands, Russia, Malaysia, Brazil, Australia and so on.

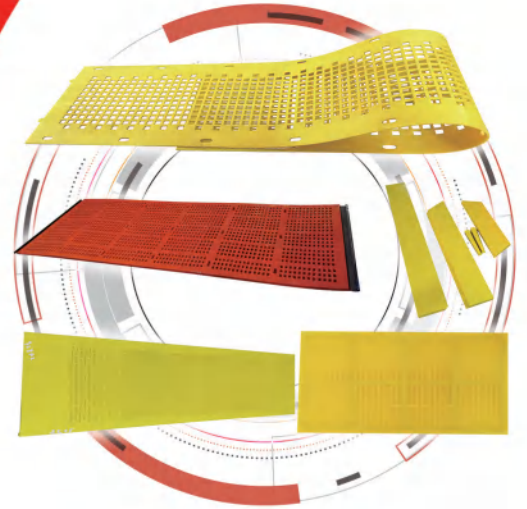

We also are the nominated supplier of FLSmidth, Beijing General Institute of Mining & Metallurgy, Zijin Mining,Jiangxi Copper Co., MAREL in Netherlands, MEGAFAB in USA, Rusmine Engineering in Russia and so on.

## PRODUCT & BUSINESS

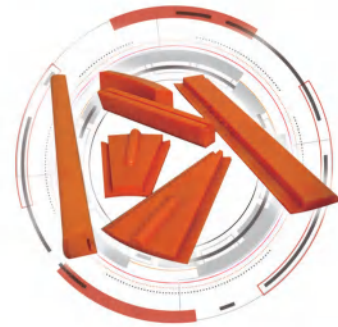

Offer our customers the separation test; design; manufacture; manufacture; installation; debug; after-sale service.

Manufacture the Variety Models of the hydrocyclone, hydrocyclone unit, valves, accessories and so on.

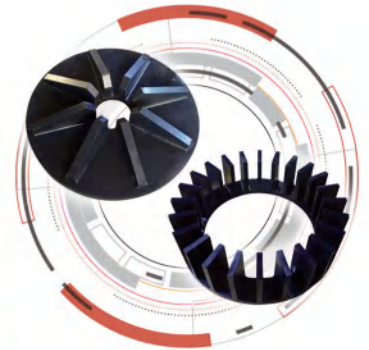

Manufacture the kinds of high performance polyurethane elastomer (stator and rotor of flotation machine, mill liners, pump impellers, pipelines, etc).

POLYURETHANE SCREENS

BALL MILL LINING

FLOTATION MACHINE ROTOR STATOR

### Product Features

1. Good separation effect and Longer service life
2. Higher capacity
3. Reasonable price and good quality
4. Strong technical support
5. Timely after-sales support

Shengjing Group is an enterprise with independent design, development, and manufacturing capabilities. Absorbing the advantages of excellent domestic and foreign manufacturers in the same industry, with complete processing equipment, advanced technology and processes, strong strength, and excellent product quality. Since its establishment, the company has developed rapidly and its business has continued to expand. It has explored an efficient and practical new process route for sludge disposal that is in line with national policies and suitable for the national conditions. With the advantages of thorough reduction effect and low disposal cost, it has created a new market-oriented operation path for standardized sludge disposal. It has rich experience in municipal, chemical, printing and dyeing, sand washing, lithium battery new energy, tailings and other sludge deep dewatering fields, providing you with the highest quality filtration technology. The company covers an area of 65000 square meters, with 300 employees and 26 technical personnel. The total investment is 500 million yuan, and the annual output value of equipment is 350 million yuan.

### Nature of Business

Production and sales of environmental protection equipment and accessories; Production and sales of plastic products; Production and sales of rubber products; Environmental engineering construction; Installation of mechanical and electrical equipment; Environmental technology development and consulting services; Production and sales of drying equipment and accessories; Recycling of renewable resources (excluding productive waste metals).

### Operating products

Box type filter press, diaphragm filter press, high-pressure self-locking filter press, and various filter press accessories.

## CHAMBER PRESSURE FILTER CORPORATE CULTURE —

Shengjing Environmental Protection is based on environmental protection and customer satisfaction as the standard,

Taking refined craftsmanship as the soul and technological innovation as the life,

With the confidence of improving quality and the driving force of enterprise development,

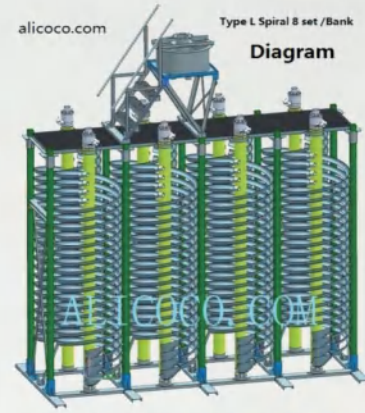

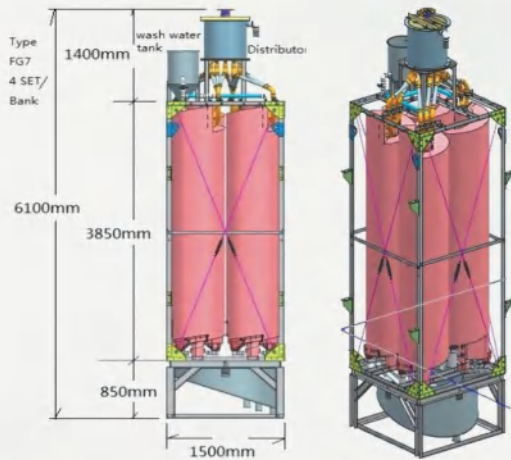

It is our responsibility to benefit the people with green mountains and clear waters!

**wear-resistant alloy chromium casting balls for mining**

Liaoning Fengde Wear-resistant New Material Products Co., Ltd. is a professional manufacturer of wear-resistant alloy chromium casting balls for mining. The product models range from  $\phi 30$  to  $\phi 120$ . The company's high chromium alloy balls (with chromium content greater than 10%), ultra-high chromium (with chromium content greater than 15%), and medium and low chromium (with chromium content between 2% and 8%) under the "Fengde" and "Guanwang" brands have been widely used in industries such as mining metallurgy, cement, and building materials.

### Cutter Suction Dredger

The cutter suction dredger integrates multiple advanced construction technologies, featuring high precision, minimal disturbance, and low pollution. It is designed for integrated operations, capable of performing digging, transporting, and discharging mud on its own, which significantly increases production efficiency. The equipment can be disassembled and assembled according to different working conditions, making it adaptable to various complex terrain environments. It also has the capability to operate under all weather conditions, ensuring that the construction progress is not affected by weather. This makes it suitable for projects requiring efficient construction in a variety of environmental conditions.

### Sand Suction Pumps

The Sand Suction Pumps come in a size range from 4 inches to 26 inches and are known for their smooth operation, light weight, and high flow rates. They primarily consist of three types:  
 1. Standard Pumps: These pumps feature high wear resistance, broad flow passages, and excellent cavitation performance. They are easy to install.  
 2. Remote Pumps: These pumps also have high wear resistance and high head capabilities along with good cavitation performance. They are similarly easy to install.  
 3. High-Pressure Water Pumps: These pumps operate smoothly, are lightweight, have a large flow rate and high head, and are easy to maintain.
