

Extend Engine Life with OEM-Quality Sensei Anodes

**DON'T WAIT, PREVENT CORROSION NOW
SENSEI ANODES ARE NOW IN STOCK!**

In marine engines, **anodes (zincs)** are essential to prevent corrosion caused by saltwater. Acting as “sacrificial metals,” they corrode instead of your engine’s critical parts, extending engine life and lowering maintenance costs.

Sensei Anodes are engineered from high-quality zinc, aluminum, or magnesium, depending on water salinity, ensuring maximum protection in all marine conditions.

- **The first line of defense against corrosion**

- **Delivered in custom Sensei-branded packaging.**

Sensei Anodes in our stock are compatible with the following **YANMAR** marine engine models:

- **1GM, 2GM, 3GM**
- **2YM, 3YM**
- **3JH, 4JH**
- **4LHA**
- **6LY3, 6LYA, 6LYM, 6LP, 6LPA**

Don't risk costly damage—replace your anodes regularly with Sensei quality. Contact us today for competitive pricing and immediate shipment.
