

Quality for the Value UNDERCARRIAGE

GSK

GSK SERVICES

GSK is the leading supplier of Undercarriage parts and GET parts in Korea!

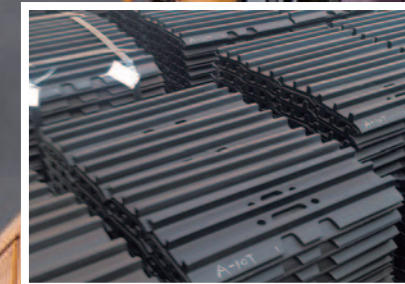

Maintaining fixed subsidiary factories, quality of GSK meets customer's diverse demand. With highest manufacturing technology and finest services, we are confident to start business with any potential partners around the world.

Accumulated feedbacks in the field helped us to upgrade the quality and performance. The changes through the feedbacks helped us to improve in quality and reduce in cost. Our high-quality Undercarriage parts will prove that we are the company striving into perfection. With our goal to continuously develop, we will not stop until our partners and customers are fully satisfied.

Be confident with GSK products as Durability, Work Performance, Parts Supply and Services will be covered by us. GSK will promise to show outstanding performance than your expectations.

We are GSK.

QUALITY FOR THE VALUE

WHY GSK?

Accumulated Engineering Background

2 Korean Core Engineering standing by controlling the whole production.
Both experiences over 20 years in manufacturing undercarriage parts field- fast feedbacks.

Wide Marketing Area

America, Japan, Europe, Australia, New Zealand, Africa, South East Asia,
over 60 countries around the world.

Strong Supply Chain

Unlike other competitors, we are Korean company directly running
factory in both Korea and China. We have strong network in Korea
and China, helping us to recruit experienced employees to build
GSK parts. Additionally, having core Korean labor force on R&D,
we are able to keep our price down low, but maintain high quality.

Developing and Engineering

GSK can develop new models within 35 days if
samples or drawings are provided.

Wide Range of Models

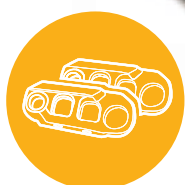

Currently covering from 1Ton ~ 100 Ton models of Undercarriage Parts.
We are always ready to develop new model and meet up with our
partner's satisfaction.

Quality for the Value

We know Quality will help us survive and will bring Value for GSK and
GSK partners around the world.

UNDERCARRIAGE PARTS PRODUCTS

TRACK LINK ASSEMBLY

- Providing widest range with pitches ranging from 90 to 317.5
- Special Heat Treatment on bushes providing 20% longer lifespan than other competitors.
- Using high-tech CNC machine for precision tooling, providing high accuracy.
- Using OEM Korean Seals only to prevent any oil leakage, giving a good guarantee on longer life time.

BOLTS & NUTS

- Full range of Bolts & Nuts including custom sizes, covering entire range for all makes of machines.
- Strength class of 12.9 grade & 10.9 grade to be used on the right purpose.
- Forged highly quality alloy steel and following OEM heat treatment specifications providing zero claim.

TRACK SHOE

- Advanced rolling facilities installed with fully automatic system.
- High Quality Materials are used to enhance the life span as well as the reliability.
- Equivalent manufacturing process and QC standard with OEM customers such as CAT, KOMATSU, HITACHI, DOOSAN AND VOLVO.

ROLLERS

- The Widest Range of Rollers for Dozer & Excavator up to D475, PC1250, D11N/R/T
- Designed and Controlled by Japanese Engineers, equipped with latest heat-treatment line.
- Friction Welding to ensure product quality and to keep high level stability.
- Roller Shells, Forged with High Quality Alloy Steel for Improved Hardness Using NOK F/Seal

SPROCKETS & IDLERS

- The Widest Range of Sprockets & Idlers for Dozer & Excavator up to D475, PC2000, D11N/R/T.
- Equivalent manufacturing process and QC standard with OEM customers such as CAT, KOMATSU, HITACHI, DOOSAN, HYUNDAI.
- Using High level Ni-Cr-Mo Steel and SCMn2B Manganese Steel.
- Constant development of new items with the same Q.C Standard of OEM customers.

SEGMENTS

- Dimensional Accuracy: Precision die forging makes uniform dimensional accuracy.
- Using High level of Alloy steel, which has been developed through wide range of real model tests.
- Equivalent manufacturing process and QC standard with OEM customers such as CAT, HYUNDAI AND VOLVO.
- The Widest Range of Segment Groups for Dozer from D3 to D11, D45 to D375 and JD700 to JD850.

TRACK TENSION DEVICES

- Wide range of track tension devices, almost all the makes of machines running in the market.
- Providing right tension for the machine to help enhance undercarriage parts life time.
- Custom size and option available in small quantity, providing 100% customer satisfaction.

TRACK GUARDS

- Full range of major machine classes in the market from 10 to 50 Tons.
- High quality steel made with precise specification, helping the tracks to remain within the tolerance of the machine, prevents damage on the Track Links and Rollers.
- Custom size and option available in small quantity, providing 100% customer satisfaction.

FORGING

HEAT TREATMENT

**CONTINUOUS INDUCTION
HARDENING**

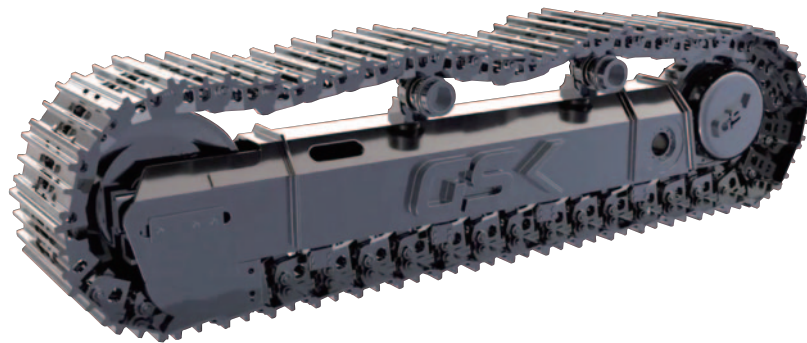

**MECHANICAL
COMPLEX MACHINING**

WIRE CUTTING

**HYDRAULIC PRESS
ASSEMBLING**
