

Pilot Operated Pressure Relief/ Unloading valve

HR5 SERIES

HR5 pilot operated pressure control valves with SAE flanges allow to mount the valves directly on the outlet flanges of pumps or inlet flanges.

Valves with SAE flanges can also be bolted together to combine functions without the need of a manifold block.

- Choice between Relief valve (V) and unloading valve (U).
- Optional vent function electrical or proportional control.
- Pilot operated with manual adjustment.
- with 3-port body :
 - 3 sizes (SAE 1", 1-1/4", 1-1/2")
 - SAE 61 and SAE 62 flange
- 3 pressure stages.
- Compact and easy to maintain.
