

创新预制 ⚙️ 高效建造

BM系列预制墙板 成组立模

BATTERY MOULD

制造精品设备 构筑美好未来
Manufacturing high-quality equipment to build a better future

设备简介 Equipment introduction

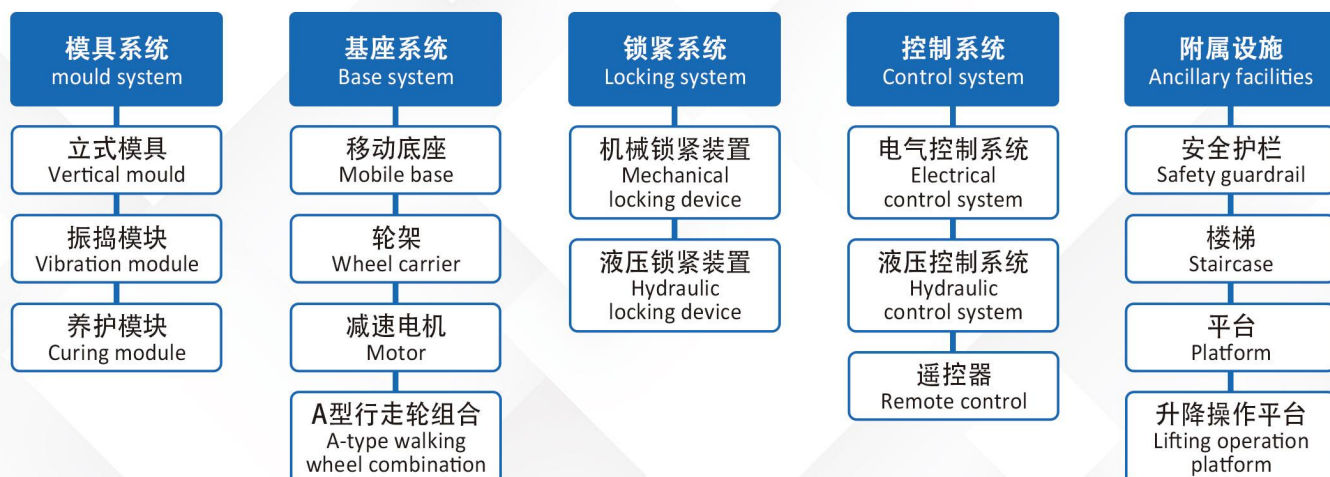

成组立模是将若干模具竖直放置，通过立式模板的移动形成若干空腔，经浇筑、振捣、养护成型的生产装备。

根据构件特点，我们可以选择合适的F型或B型设备。空腔数量可根据产能需求定制选型。

Battery mould is a production equipment that places several moulds vertically, forms several cavities through the movement of the vertical moulds, and shapes them through pouring, vibration, and curing.

Based on the characteristics of the components, we can choose suitable F-type or B-type equipment. The number of cavities can be customized and selected according to production capacity requirements.

结构组成 Structure composition

产品应用 Product application

内墙板
Inner wall panel

外墙板
Outer wall panel

全厚度楼板
Full thickness floor slab

非承重墙板
Non load bearing wall panel

U型墙板
U-type wall panel

T型墙板
T-type wall panel

混凝土装配式建筑
Concrete prefabricated building

钢结构 / 混凝土结构外挂板
External wall panels for steel/concrete structures
