3D PPVC模块化系统

3D PPVC modular system

河北新大地机电制造有限公司
Hebei Xindadi electromechanical Manufacturing Co. Ltd.

3D PPVC 模块化建造是目前高效，高品质的建筑建造方式。我们的PPVC模块的制作方式多样， 专注为 3D PPVC 模块化建造提供定制化模具与设备服务。

3D PPVC Modular construction is currently an efficient and high-quality building construction method. Our PPVC modules are manufactured in a variety of ways. We specialize in providing customized molds and equipment services for 3D PPVC modular construction.

固定尺寸房屋模具 Constant size house mold

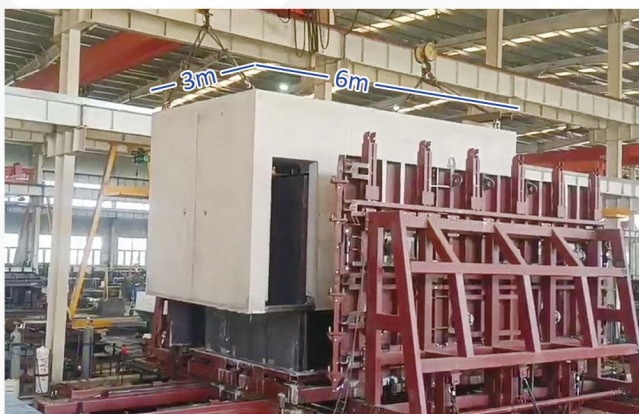

可调尺寸房屋模具 Adjustable size house mold

✓ 可调尺寸
Adjustable dimensions

✓ 自动液压控制
Automatic hydraulic control

✓ 注重可重复使用、灵活和模块化特性
Focus on reusability, flexibility and modular characteristics

整体式卫生间模具 Integrated bathroom mold

✓ 模块化设计
Modular design

✓ 集成化装修
Integrated decoration

✓ 标准化接口
Standardizes interfaces

整体式卫生间模具，按需定制精准尺寸，将最复杂的建筑部件转移到工厂环境中生产，有效减少了现场施工难题；一体成型适配工厂集成化装修，通过模具预埋功能（如给水管、排水管、电路管线），运抵现场后仅需连接外部管道与开关，大幅减少现场施工步骤与人工投入。

Integrated bathroom molds support customized dimensions on demand. By transferring the production of the most complex building components to a factory-controlled environment, on-site construction challenges are effectively mitigated. Thanks to embedded pre-installation features of the molds (including water supply pipes, drainage pipes and electrical circuits), only external pipeline connection and switch installation are required after on-site delivery, which greatly streamlines on-site construction procedures and cuts labor costs.
