螺旋钻机是振华机械集团研发生产的一款专为建筑基础工程设计的快速成孔施工设备，可高效应对土层、黏土层、填土层、粉土层、淤泥层、砂土层、强风化岩层及含少量卵石的复合地层。该设备配备强力动力头与高效钻具，凭借高扭矩与高速旋转输出，不仅能快速穿透坚硬土层，更可精准成孔、高效排土，实现复杂地层下的完美作业；通过操作挖机，既能快速完成桩基施工作业，又能兼顾木桩植入与林木栽植，实现工程现场的多功能一体化适配。凭借显著的施工效率与多功能一体优势，该设备已广泛应用于电力设施、通信工程、市政建设、高铁/高速公路基建、建筑地基、石油管线及林业工程等多个领域，符合现代基础设施建设及机械化施工规范要求。

The **Excavator-Mounted Auger Drill Rig**, developed by Zhenhua Machinery Group, is a high-efficiency borehole equipment engineered for foundation engineering. It effortlessly handles clay, silt, sand, weathered rock, and gravel strata. Equipped with a high-torque drive head and premium drilling tools, the rig delivers powerful rotation to penetrate tough soil rapidly, ensuring precise hole formation and efficient discharge. Seamlessly attached to excavators, it handles pile construction, pile driving, and tree planting with multi-functional versatility. Thanks to its outstanding efficiency, this equipment is widely used in power, telecom, municipal, high-speed rail, highway, and pipeline infrastructure, fully meeting modern mechanized construction standards.
