

Yanggu Jindu Drill Tools Co., Ltd

Premium Service Achieve Unmatched Excellence

Company Profile

Yanggu County Jindu Drill Tools Co., Ltd. is a manufacturer of railway and mining drill tools and drill bits. It is located along the Beijing-Guangzhou Railway, with convenient transportation. Its production volume ranks among the top in the domestic industry. Our factory produces road and coal mine drill tools and drill bits using new scientific research achievements. The production process is standardized, and the equipment and technology are of high quality. People-oriented, manufacturing high-quality products, scientific management, stable and sustainable development are our production principles. Through quality system certification and inspection by the national drill tool testing center, our products are widely used in coal mines, metal mines, quarrying, and tunnel projects. They enjoy a high reputation. Among them, the single-point drill bit, ball tooth drill bit, cross drill bit, rotary digging tooth, tunneling tooth, coal cutting tooth, etc. are highly praised by customers. The company adheres to the business philosophy of "honesty as the foundation, pursuit as the essence", and the corporate spirit of "innovation and development, advancing with progress". With good reputation and products, we serve users and society, creating greater brilliant achievements in the fierce competition of the market economy. All employees of the company warmly welcome colleagues from the industry and customers to visit, guide, and negotiate business.
