Shandong Jiujiu Machinery Co., Ltd.

A Professional Wear and Heat-resistant Parts Casting Foundry

www.sdjjiu.com

About the company

Shandong Jiujiu Machinery Co., Ltd., founded in 2018, it is a company specializing in the production of all kinds of high-quality wear-resistant castings and heat-resistant castings. It is located in the Sino foreign cooperation industrial park in Binhai New Area, Weifang City, covering an area of 23,333 square meters and a building area of 24,000 square meters. The original intention and vision of the enterprise is to be honest and practical, and work hard for a long time. Stable quality is the foundation of the enterprise.

CERTIFICATE OF REGISTRATION

This is to certify that the quality management system of

Shandong Jiujiu Machinery Co., Ltd.

Unified Social Credit Code:91370700MA3MPEP30H
Registered Address:North of Xiangjiang East 2nd Street,West of Hai'an road,Sino foreign cooperation Industrial Park, Yangzi Subdistrict, Binhai District, Weifang City, 261108,Shandong Province
Business Address:North of Xiangjiang East 2nd Street,West of Hai'an road,Sino foreign cooperation Industrial Park, Yangzi Subdistrict, Binhai District, Weifang City, 261108,Shandong Province

Has been assessed and certified as meeting the requirements of

GB/T19001-2016 idt ISO9001:2015

The registered scope of this certified quality management system is as following :

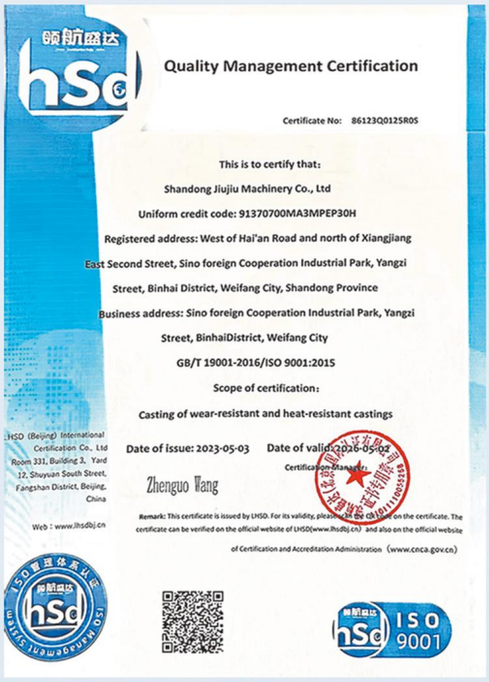

Casting of Wear-resistant castings and Heat-resistant castings.

Certificate No: 57121Q10114R0S — Registered Since: August 19,2021
Effective date: August 19,2021 — Expiration date: August 18,2024

Signature:

Qingdao Huazhong Century Certification Co., Ltd.
423-5, No.2 Building, No.6 Hongkong Middle Road, Shinan District, Qingdao City, Shandong,P.R.China

Obtaining this certificate does not mean that the holder of this certificate can be exempted from other legal obligations. When the product or activity in this certification scope has administrative licensing requirements, this certificate is valid within the holder's administrative licensing scope. The certificated organization must regularly accept the supervision audit and this certificate can continue to be valid only after being audited and qualified. The information of this certificate can be checked on the official website of Certification and Accreditation Administration of the People's Republic of China(www. cnca. gov. cn).

Certification Standard:

Remark: This certificate is issued by LHSD. For its validity, please see the CNCA mark on the certificate. The certificate can be verified on the official website of LHSD(www.lhsdbj.cn) and also on the official website of Certification and Accreditation Administration (www.cnca.gov.cn)

About the product

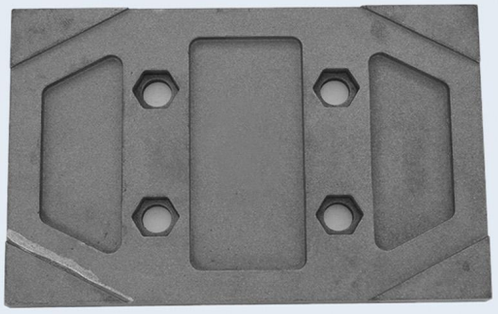

Various Lining Plates, Tooth Plates, Blow Bars, Hammers for Crushing lndustry. Grate Bars for Sintering Machines, Waste to Energy, Biomass to Energy.

- Product
  - Mine wear-resisant Castings
    - Liner
    - Impact Plate
    - Hammer
    - Feed Tube
  - Waste Incinerator Grate

Mine Wear-resistant Casting—Liner

The wear-resistant liner of the crusher is made of high manganese steel or composite alloy, with high strength and impact resistance. It covers the inner wall of the crushing chamber, effectively reduces material wear and extends equipment life. It is suitable for high-loss scenarios such as mining and building materials.

Mine Wear-resistant Casting—Hammer

The hammer of the crusher is made of high chromium cast iron or high manganese steel, which has high wear resistance and impact resistance. It can directly hit the crushed materials to the target particle size and is widely used in mining and other industries.

Mine Wear-resistant Casting—Impact Plate

The impact plate of the crusher is made of high chromium cast iron or alloy steel, with high wear resistance and impact resistance. It is responsible for rebounding the material to the rotor area for secondary crushing. It is suitable for mining, metallurgy and other industries to ensure crushing efficiency and finished product particle size.

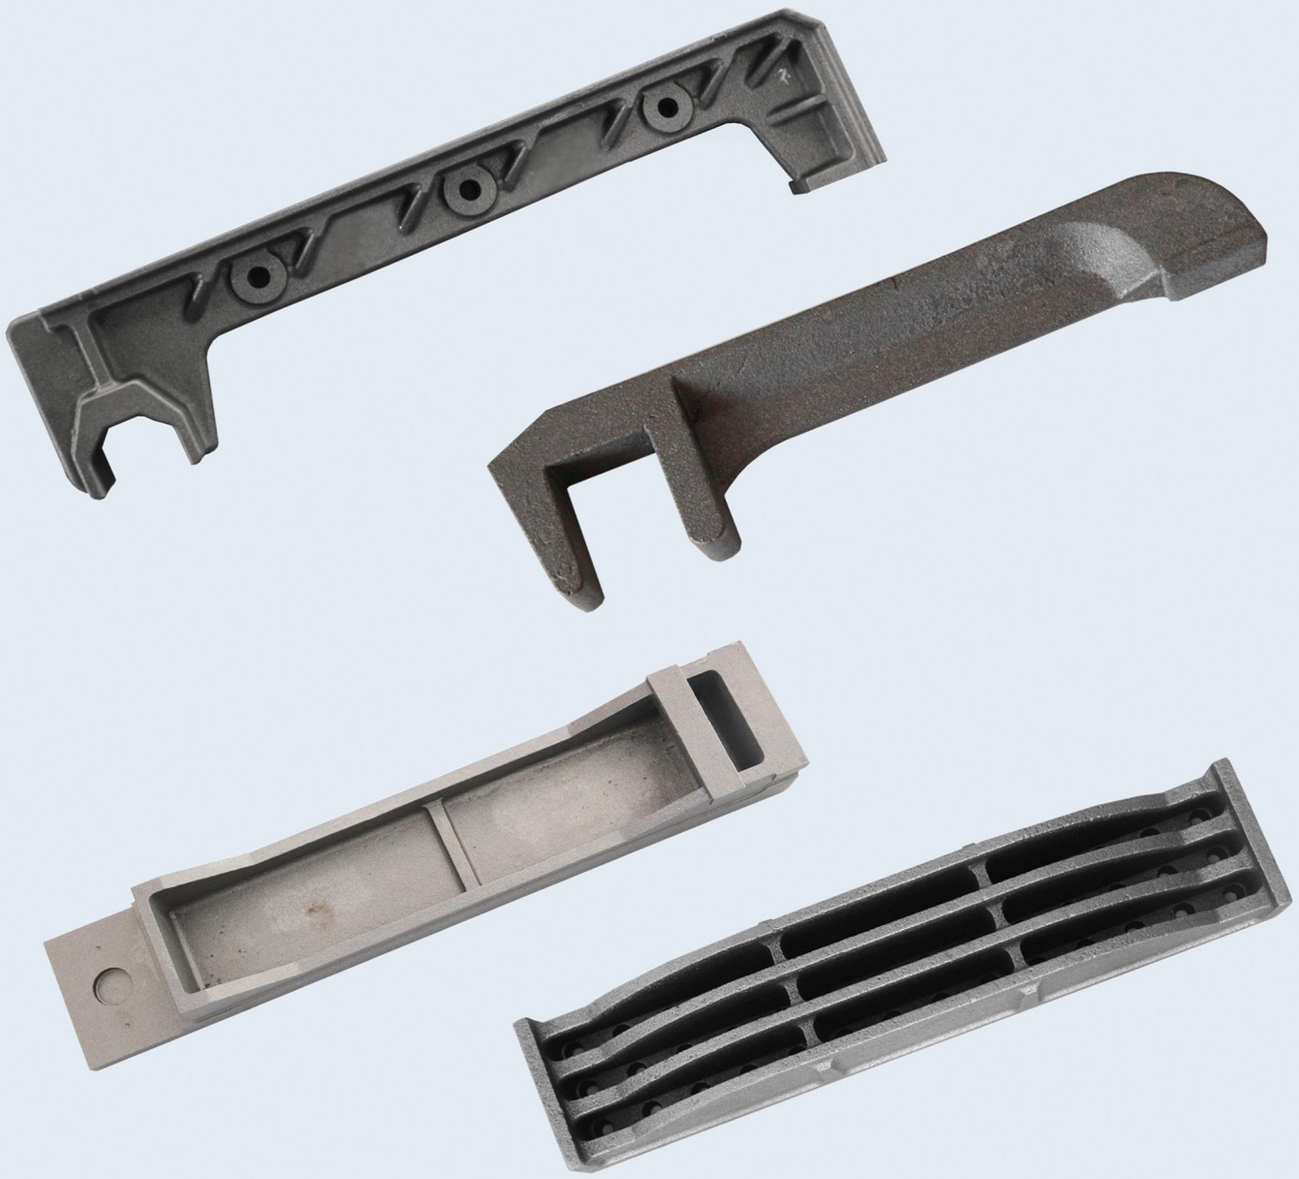

Mine Wear-resistant Casting—Feed Tube

The crusher's feed tube is made of high-chromium cast iron or alloy steel, which is wear-resistant and impact-resistant. It can evenly distribute materials to avoid unbalanced loading and improve crushing efficiency. It is suitable for high-loss scenarios such as mining and building materials, and requires regular maintenance to ensure performance.

Waste Incinerator Grate

The grate bars of industrial incinerators are cast from heat-resistant alloy steel, which is resistant to high temperatures and corrosion, supports waste and promotes uniform combustion. Ash accumulation needs to be cleaned regularly to maintain ventilation and incineration efficiency.
