

Heavy Duty Clamp

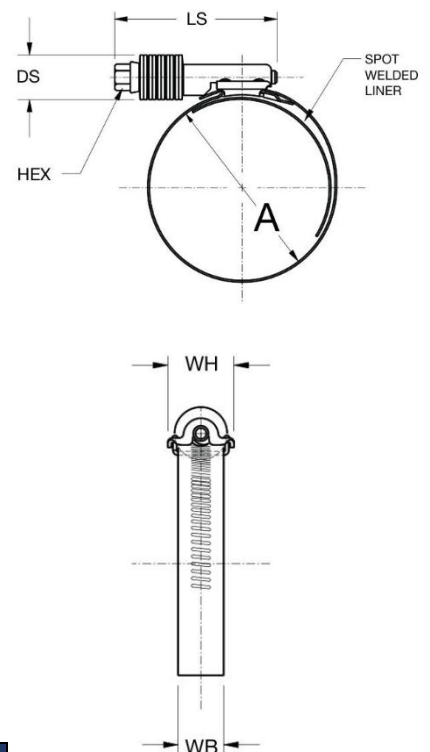

- ZAKER Constant Tension Worm Drive clamps compensate for changes in temperature, ensuring a leak free performance.
- Bellville washer “stack” provides spring action to accommodate increases/decreases in joint diameter, preventing loosening and loss of clamp load due to temperature fluctuations.
- Typical uses are in heavy duty truck, high performance automotive, marine, and severe duty industrial applications.

Extended Inner Liner | Constant-Tension Performance | SAE Standard J1508 Type SLHD
