COMPANY PROFILE

Meida Industry was founded in 2002 to supply high quality bearings to the customers all over the world. Meida manufactures high quality engine bearings used for automobiles, light-duty and heavy-duty trucks, marines,generators and many other types of engines.

Seeking to distribute high quality bearings, Meida has built fully automatic bearing production process lines, electroplating production lines and spraying production lines. In the meantime, Meida has a complete range of testing equipment and means for raw materials and bearings.

MEIDA FACTORY

Raw material warehouse

As a company that specializes in bearing manufacturing, Meida are constantly implementing new equipment, including production equipment and testing equipment, for achieving a higher level of precision. For now, Meida has 4 fully automatic high performance bearing production lines and 4 semi-automatic high performance bearing production lines.

Workshop

Meida has a raw material warehouse of almost 27,000 feet, including steel-aluminum strips and steel-bronze strips. To ensure the quality of bearing, Meida will test every input of raw material.

Electroplating plant

Meida has its own plating plant, complying with the national environmental standards. The plating plant performs deposition of various overlays to meet the challenging demands of the engine applications.

Product warehouse

Meida has a product warehouse of nearly 45,000 feet, including more than 1000 kinds of bearings, bushings and thrust washers. The abundant stock can meet customers' both long-term needs and emergency needs.

R&D

As a top manufacturer, Meida is always searching for innovative solutions to meets customers' needs. With years of experience and highly skilled employees, we can support our customers through product design to operating risk anaylsis. Every step that we take on R&D is tightly alighned with customers' needs, which are high-performed quality and cost-effective price.
